

NEW

BackTrack™

Air-Supplied Breathing System

**Converts AOSafety®
Air-Purifying Respirators
Into Type C Continuous
Flow Models –
For More Versatility,
Less Inventory.**

NIOSH Approved.

- Easily connects to all AOSafety 8000 Series Half & Full Face Masks
- No tools or additional fit testing required
- Available accessories include new lightweight breathing air quality hoses and cooling vortex tube.

NEW **BackTrack™**

Air-Supplied Breathing System

The simpler, better way to convert your respirators

Get double-duty performance from your respirator inventory with the new BackTrack system from AOSafety.

With just a quick hook-up, BackTrack turns AOSafety air-purifying respirators into air-supplied units. All without tools or added fit testing requirements. Sound simple? It is. Cost effective, too.

BackTrack. Another better idea in respiratory equipment from AOSafety.

- Compatible with all AOSafety 8000 Series Half and Full Face Respirators
- Easy hook-up with interchangeable cartridge connectors
- Dual airline Y-design wraps tubing around back – out of work zone
- Durable breathing tube resists kinks and flexes for mobility
- Adjustable belt helps reduce tube “drag” and stress on mask
- Belt-mounted flow control valve for easy access
- Quick-connect coupling for easy airline hose attachment
- Lightweight smooth reinforced polyvinyl chloride hoses meet "off gas" requirements per MIL H-2815 F, sections 3.12.2 and 4.5.10 for high breathing air quality.
- Optional vortex tube* cools the air in the QuickFit facepiece up to 30° Fahrenheit.

* For BackTrack plus vortex tube system, order only 50956-00000 (Cooling Tube with Belt Pad) and 50157-00000 (Replacement Breathing Tube) for a complete system.
