Capacity that GE appreciates

Up to 1.8 million units created each month

GE, Sanyo, RadioShack, Samsung and LG source headsets from us because we have the capacity and experience to handle their volume orders. Between our main factory with nine production lines and our two auxiliary factories, we can turn out up to 1.8 million units monthly. That's an output that ensures your orders will be seamlessly filled as well.

Choose one of our existing Bluetooth® headset models and we'll deliver your order of up to 20,000 units in as fast as seven days. Or, send us your specifications and we'll use our 10 years' experience in ODM to complete custom headset and earphone samples in 20 days. We also release two new models each month to give you more options.

After approval, we'll have your order ready to ship in as few as 20 days. Tune into the headset capacity that keeps big buyers stocked. Contact us today.

19 years of industry experience for your OEM/ODM orders

30 engineers for your OEM/ODM projects

Established in 1992, we – Diasonic Technology Co. Ltd – are trusted worldwide as a leading OEM/ODM supplier of security products. Our 30 R&D engineers, who are experienced in software – particularly Linux, Google's Android and Microsoft's Windows CE operating systems – can easily render your specifications, no matter how complicated they may be. Plus, they continuously refresh our collection with new multimedia and security surveillance devices, as well as audio recorders and DVRs.

In-house development and production

We carry out all of our processes in-house for quality consistency and low costs. And utilizing our own R&D center, our engineers develop cutting-edge technologies to keep you abreast of the latest trends.

Products that meet international standards

We operate under an ISO 9001:2008-certified management system and our goods bear CE, FCC, VCCI and RoHS marks for hassle-free distribution. Contact us now for more information.

Guangdong Coagent Electronics S&T was established in 1998, with headquarters located in Foshan. With years of experience in the automobile industry, we have received the National Torch Plan key high-tech enterprise award – administered by the Ministry of Science and Technology in mainland China.

We are independently engaged in the R&D, manufacture and marketing of feature-packed car electronics, including GPS navigation devices and in-dash DVD players, as well as automotive diagnostic, anti-theft alarm and parking assist systems. Furthermore, we can also

offer you precisely made parts and molds, intelligent traffic-control solutions, car interior decorations and preproduction and aftermarket services.

More than 5,000 personnel at our 400,000m² production base, located in one of the largest automobile electronic industrial parks between Guangdong and Jiangxi, are ready to process your order. We are also equipped with five wholly-owned subsidiaries, enabling us to produce nearly \$460 million worth of goods every year. For your sourcing convenience, we have offices located worldwide, including Hong Kong and Hungary. Inquire now.

- Google's Android 2.2 OS
- Front SD card slot, USB port and A/V input
- Built-in Bluetooth® connectivity

How can you benefit from working with a top-25 electronics manufacturer in mainland China? Variety – we offer in-vehicle infotainment products for 16 car brands, including Toyota, Honda, Nissan, Mazda, Subaru, Volkswagen, SEAT, Skoda, Opel, Buick, GM, Ford, Hyundai, Ssangyong, Kia and BYD. Our selection is something that not many suppliers in our industry, who only focus on designing DVD players for one specific car brand, can match.

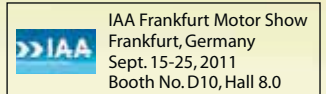

Our product lineup also includes TPMS, car CD/VCD/MP3 players and other in-car entertainment devices. With more

than 300 technicians at our R&D facilities in Shanghai, Shenzhen and Huizhou, we offer comprehensive design services. Our team members are experienced in mobile entertainment, particularly user interface and cosmetic design. In fact, they've helped us obtain over 30 patents in mainland China. A rigid QC process is in place to ensure your strict requirements are met. For more information regarding our products and services, contact us today.

Source LCD monitors designed for use with full HD video cameras

Interface of 665GL-70NP/H/Y/S

Interface of 569GL-50NP/HO/Y

7" LCD monitor for HD video cameras (665GL-70NP/H/Y/S)

- Shooting and viewing aperture
- 16:9/4:3 aspect ratio switch
- HDMI and video outputs
- 4 user-definable function buttons
- RGB monochromatic display
- Underscan/overscan switch
- 6-24V DC wide voltage range

Heavy investment in R&D to bring you new devices

We strongly believe that focusing on innovation is our competitive business advantage. That's why we spend over \$600,000 annually on R&D programs to create a steady stream of products for tech-savvy buyers like you and your customers. Take our latest LCD monitors, for example. These monitors are designed for use with full HD video cameras, and are ideal for viewing CCTV monitoring and professional film content.

An innovator with many firsts

We started out in 1993 with over 50 engineers, creating sonar and radar systems and GPS devices. Since then, we've been a leading developer of electronic devices in mainland China. In 1996, we became one of the first manufacturers in mainland China to produce LCD monitors. We began producing touch screens in 2001, 1-DIN and 2-DIN car PCs in 2006 and 2007, respectively, and in 2009, we became one of the first to produce USB monitors and 3D USB monitors. This emphasis on innovation demonstrates how dedicated we are to providing you with only the most sophisticated devices.

We offer OEM and ODM services

With over eight years of technical experience, we're able to redesign and adjust both hardware and software to match your cost and application requirements. Instead of outsourcing design, we have our R&D department handle it. Our 50 engineers are experts in industrial, PCB, process and software design. Equipped with advanced technologies, they work collaboratively with clients to design an extensive range of new products, meeting requirements from markets around the world. Contact us today.

15.6-42" LCD TV (03 Series)

- Optional DVB-T/ATSC/ISDB/analog models
- HD/SCART/YPbPr connections

25-year supplier of LCD and CRT TVs

Backed by 25 years of experience specializing in LCD and CRT TVs and 30 R&D engineers, we can help you develop high-quality units. We own advanced machines, including Panasonic's auto insertion and injection molding machines and signal generators. Our six fully automated production lines manufacture 15- to 55-inch digital TVs and boast an annual production capacity of 3 million sets. We mainly export to Europe, the US and Asia.

We carry out our production processes according to ISO 9001:2008- and ISO 14001:2004-certified management systems. Plus, we have 17 QC evaluations in place to ensure our products are fit to carry CE, CB, UL, CCC and other international and domestic product certification marks. Send us your requirements today so that we can provide you our excellent services and good quality TVs.

Quality tablet PCs from an 8-year manufacturer

7/10.1" tablet PC with capacitive touch screen

- Nvidia Tegra 2 1GHz dual-core CPU, 512MB DDRIII RAM
- Google's Android 2.3 OS
- Built-in G-sensor and camera
- 3G/Wi-Fi connectivity
- Supports Adobe Flash Player 10.1

Founded in 2003, Shenzhen State Micro Technology is a leading digital electronics manufacturer in mainland China. We supply tablet PCs and digital media players to big buyers worldwide. Thanks to 120 experienced engineers, we can tailor OEM/ODM requests to your specifications.

Products that meet international standards

We operate under an ISO 9001:2008-certified management system. Our QC team ensures every item is fit to bear RoHS, CCC, FCC and CE marks.

Close relationships with chipset companies

We are also one of the largest chipset agents for Telechips Inc. We also have good business relationships with other chipset companies such as Samsung and Nvidia. Our chipset solutions include Telechips series 8902, 9301, 8803, Samsung 210 and Tegra 2. For more information, contact us today.

COVER STORY

On the cover: Portable TV from Shenzhen Kaixuan Electronics Co. Ltd, page 49; A/V senders from Shenzhen Pakite Technology Co. Ltd, page 151; both of China

Portable TVs 49
The multifunction and digital trends are spawning releases with multimedia players, e-book readers and DVB-T receivers.

Personal Electronics 37
New products 127

- Portable speakers that double as flashlight
- Noise-canceling headphones delivering 108dB SPL
- Earphones for iPod with hypoallergenic soft flex gel sleeves

Home & Office Electronics 147
A/V senders 151

Suppliers project output of 5 to 5.8GHz units will continue to climb in coming months as wireless models gain ground.

New products 255
- ISDB-T TV with 7in screen
- Power bank featuring automatic recovery
- Sound bar integrating PLL FM stereo radio

Track buyer and supplier trends for high-demand products

Online metrics are taken from buyer and supplier activity in hundreds of high-demand product groups on www.globalsources.com.

In this issue:

A/V accessories	page 113
TVs & TV equipment	page 239
Car monitors & electronic accessories	page 337

In-Car Electronics

Car chargers & mounts

Enhancements broaden application base from mobile phones and car electronics to tablet PCs.

New products

- Car navigation system integrating GPS, rearview camera
- Car multimedia player featuring detachable MID
- GPS tracker with shock sensor

Condenser microphones with instrument- specific designs

From a 30-year maker of
audio products

The featured condenser microphones are the latest releases in our 30-year history of successful audio products. Each is engineered for compatibility with specific musical instruments. The microphone for drums is designed to hold fast to rims and provide high-fidelity audio reception, even during vigorous solos. The other unit for wind instruments is equipped with a screw-controlled fastener, which clips to the instrument's bell portion, while a flexible gooseneck enables audio reception from any direction. Also shown here is a 9V power pack that lasts up to 20 hours and simultaneously provides power to the aforementioned microphones.

We use specially designed acoustic chambers and other R&D equipment to develop six new products a year. We've garnered over 50 patents worldwide for our innovations. Once in production, these products undergo humidity, dry-heat, salt-spray and other quality tests. Only after passing these examinations are our microphones and megaphones shipped to you.

Almost all of our output is exported, so our business is geared to buyers like you. For more details or OEM inquiries, contact us today.

Introducing our extreme sports camera

Innovative designs for various activities

Let your customers capture extreme sports moments by offering them our durable HD video cameras. Thanks to in-house designs that follow the latest trends, and advanced HD technology from Ambarella, we have developed a range of all-in-one products for various activities. These devices can be mounted on goggles, helmets or other sports equipment for convenient handsfree use.

Quality control

We manufacture our products in a dust-free factory to ensure the highest performance possible. Finished products are then subjected to waterproofing tests to ensure optimum durability.

Versatile products with international certifications

At your request, we can customize our cameras to your market's needs. In addition to bearing CE, FCC and RoHS marks, our cameras are phthalate- and PAHs-free, as well as REACH-compliant. To start introducing our versatile cameras to your market, contact our sales team today.

We export to Europe, North America, Japan and Australia

We produce up to 200,000 units monthly

Every month, we turn out up to 200,000 receivers and modules using key components from industry-leading suppliers, such as DiBcom, Fujitsu, Hynix, Sunplus, Zarlink and Sanyo. And our products are well-received by a wide variety of other clients in Europe, North America, Japan and Australia.

Work with us for an extensive selection of DVB-T, ATSC, CMMB and ISDB receivers, as well as digital TVs and antennas for home and mobile applications. If your market demands certain specifications, we have experienced R&D engineers ready to make alterations based off of our original models. We have in-house molding, electromechanical and software development workshops, and we develop our own PCBs and digital TV modules.

Our facilities are ISO 9001:2000-certified and all items are FCC-, CE- and CSA-approved. We provide aftersales and comprehensive technical support. For more information, visit our Global Sources Online showroom today.

More than 100 unique digital set-top boxes for your selection

We're a 15-year OEM/ODM expert

HD DVB-T set-top box and DVD receiver combo

- Supports MPEG-4, H.264, AAC, AC3 and PCM formats
- Media playback: WMA, AVI, MP3, JPEG, DVD/+RW/+R/-RW/-T, CD/CD-R
- USB port, PVR and time-shift functions
- HD output: 576i, 720p, 1080i

HD DVB-T set-top box

- Supports Conax CAS 7 encoding
- Supports MPEG-4, H.264, AAC, AC3 and PCM formats
- USB port, PVR and time-shift functions
- HD output: 576i, 720p, 1080i, 1080p
- Media playback: WMA, AVI, DivX, MP3, JPEG, BMP

HD DVB-T set-top box

- Supports MPEG-4, H.264 and AVC formats
- PVR-ready via USB
- HD output: 576i, 720p, 1080i, 1080p

HD DVB-S2 set-top box

- Supports MPEG-4, H.264, AAC, AC3 and PCM formats
- USB port, PVR and time-shift functions
- Media playback: WMA, AVI, DivX, MP3, JPEG, BMP
- HD output: 576i, 720p, 1080i

HD ISDB-T set-top box

- Recording and time-shift functions via USB/HDD devices
- HD output: 480i, 720p, 1080i, 1080p
- Ginga-compliant for use in South America

With over 100 unique DVB-T and ISDB-T set-top boxes available, we're your number one destination for innovative A/V devices. You can also choose from our range of DVD players, home theater systems and other electronic devices. We have 14 senior engineers who design a new model every month and can create custom items to your specifications. And thanks to our 50 QC inspectors, we've kept our defect rate under 1 percent. These capabilities are a few of the reasons why Toshiba and Sanyo source items from us.

Our ISO 9001:2000- and 14001:2004-certified factory is equipped with 15 automated production lines, including four SMT packaging and two AI lines, as well as Fuji reflow soldering and lead-free wave-soldering machines. Accordingly, we make up to 150,000 units monthly, each guaranteed for one year.

For hassle-free distribution, all of our products come with CE, FCC and RoHS marks. To learn more about what a 15-year OEM ODM supplier can do for you, visit our website or contact our sales representatives today.

Find out why Sony, Sharp, Panasonic and other multinationals source from us

CDR-E05

Vehicle video recorder

- HD 5MP CMOS sensor • HD 1080p @ 30fps • Embedded GPS module
- H.264 compression • 3" TFT-LCD screen • Supports SD cards of up to 32GB
- Viewing angle: approx. 105 degrees

Want to know what distinguishes us from the competition? First of all, we make vehicle recorders, IP cameras, DVRs and accessories you can rely on — our defect rate is only 0.5 percent, compared to an industry standard of 3 percent. We also employ 40 R&D experts with more than 15 years of experience each, who help us to turn out 12 new models annually for our Fuho-branded line. And we're innovative — our designs have been patented in Taiwan, and we took home a Taiwan Excellence Award in 2011 for the vehicle video recorder shown here (CDR-E07).

Established in 1991, we've attracted the business of multinational corporations such as Sony, Sharp, Panasonic, LG, Toshiba, Hitachi and others because we control quality at every level — from chips to entire systems. Plus, our RoHS-marked products come with one-year guarantees and we provide OEM/ODM services.

Your finished items will be ready for delivery in as fast as 15 days. Contact one of our English-, Spanish- or French-speaking representatives today.

Why do Argos, Target, Tesco and Metro stock our keyboards?

Stylish electronic keyboard with stand (922)

Professional-grade electronic keyboard with LCD screen (933)

JK-632

JK-2061

Teaching-type electronic keyboards with microphones

There are a number of reasons why Argos, Target, Metro and Carrefour source our musical instruments. First, our products meet international quality and safety requirements – all electronic keyboards that leave our factory carry CE, UL, RoHS, EuP and MEPS marks. And to provide you with an extra level of protection, we check our goods piece by piece prior to shipment.

Second, we have a wide selection of customizable items to choose from – our catalog features 68 categories, which our 10 designers expand with several new models every year. Large output rounds it out – equipped with four production lines, we turn out 56,000 units every month. We can have orders ready for shipment in just 20 days, and we can get you started with as few as 200 units. Join top retailers in stocking up on our musical instruments. Inquire today.

Supplier Capability Assessment Report Online

Fender, Peavey, Aldi, Casino and Eldorado source our guitars

Handmade and spray-painted 10 times for a long-lasting finish

MJM-204C3E

MD314-12N

ME880-N

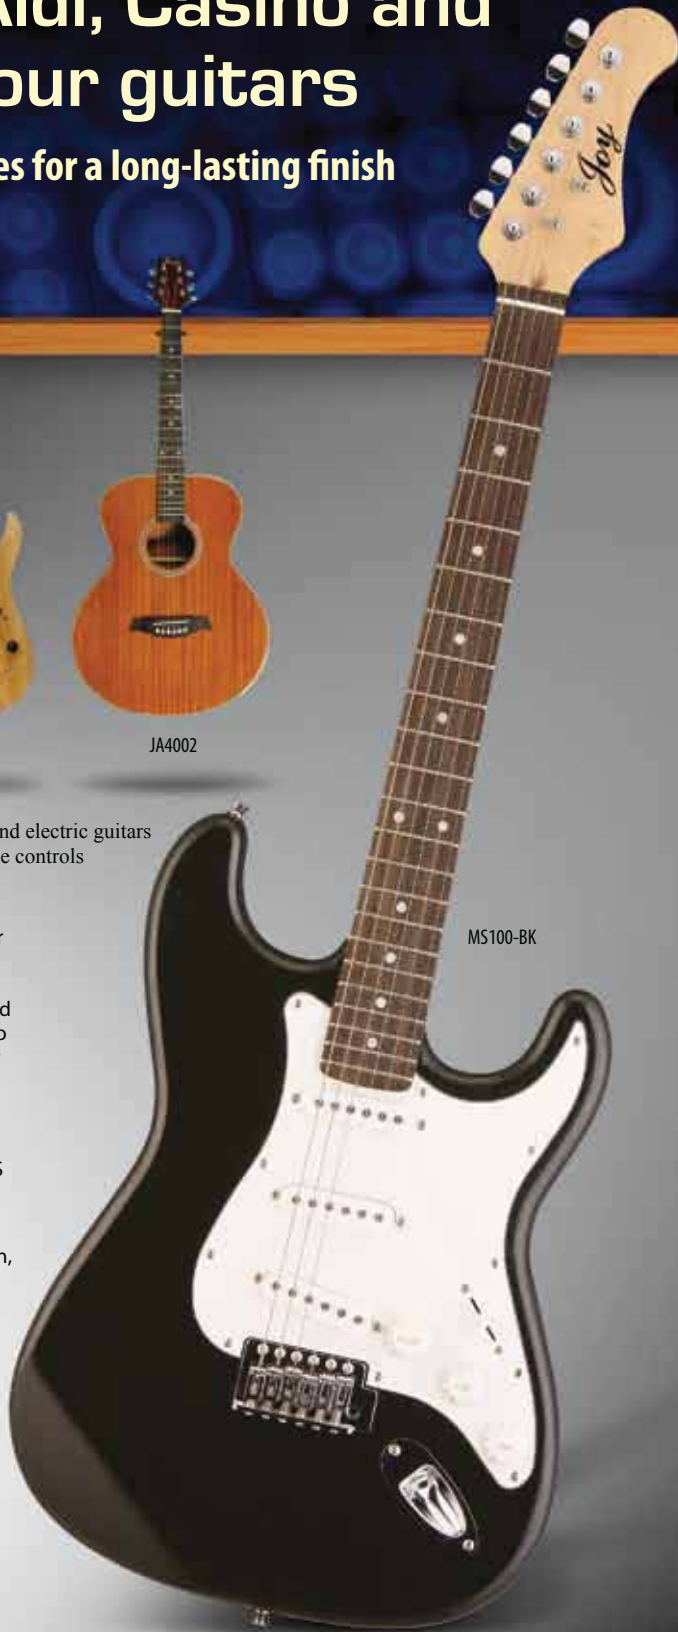

JA4002

A selection of our acoustic guitars and electric guitars with rhythm, volume, tone and treble controls

The attention and care we put into each guitar we manufacture is something that our competitors can't match. And it's also why our products are being sourced by Eldorado, Fender, Sonae, Peavey, Casino, Epiphone, Cora, Aldi and Argos and other well-known buyers. Our three spray-painting workshops for electric guitars and another three for wooden models are proof of our commitment to providing products that last. To ensure colors that won't fade over time, we painstakingly spray-paint each unit at least 10 times.

We further ensure the reliability of our guitars by conducting function tests, making sure the strings do not touch the frets to avoid distortion. All of our guitars come with CE, FSC, UL and RoHS marks for easier distribution in your region.

Choose from over 60 electric, acoustic and bass guitars, as well as more than 60 classical models. For precise rendition of your design, we take a picture of the mold and compare the product against it to make certain every detail is being followed. With two factories, we are ready for your volume orders. Inquire today.

Experienced R&D engineers to help you realize your ODM headphone projects

How do we make sure that you're entirely satisfied with your ODM headphone projects? All 10 of our engineers, each with six years of experience, will provide their input on how to best meet your requirements. Then, our dedicated sound technicians will tweak your headphones to guarantee the strongest bass and clearest midranges possible. Within three to four working days, we'll ship you a sample tailored to your specifications.

We can handle various types of projects. Our own Kimmar brand of products includes earphones and headphones for MP3/CD players, computers and radios, as well as handsfree kits and headsets. These items are widely used in entertainment, aviation, household and educational applications all over Europe, the US, the Middle East and Asia. And for smooth distribution in your target market, all of our products carry CE and RoHS marks.

Our minimum order requirement is just 5,000 units. To get your order started, contact our English- and German-speaking sales staff today.

New electronics to profit from growing consumer needs

The **China Sourcing Fair: Electronics** is designed to help buyers in South Africa and nearby markets seize business opportunities as more consumers want to get their hands on the hottest electronics in the market today. Well-timed to address new market trends, the Fair showcases a broad lineup of current bestsellers from Greater China.

The mainland has emerged as South Africa's major import source as China-made products become popular in the country. China also remains as the world's biggest electronics exporter generating US\$933.4 billion in 2010. The Fair is thus perfectly timed to help businesses capitalize on South Africa's growing economy and China's strong production capabilities.

Direct sourcing from Greater China's professional suppliers

Import straight from competent manufacturers from Greater China. These export-oriented suppliers offer attractive price quotations complemented by improved manufacturing expertise. Plus, they can help you source more conveniently as they bring their products within your reach in Johannesburg, South Africa!

Highly-functional, modern venue

South Africa's biggest exhibition ground, the Gallagher Convention Centre, offers 25,000-sqm exhibition space and multi-purpose halls for convenient sourcing. The venue is also accessible from the OR Tambo International Airport and other regional airports in the country.

Modernize your product line with the latest China-made electronics! Hurry and pre-register online now at **www.chinasourcingfair.com** to receive show updates and enter the Fair for free! ■

Your reliable EMS provider

With over a decade of experience

Since 1999, we – Maxway Technology Co. Ltd – have been providing our clients with reliable high-quality electronic assembly solutions. We are your one-stop shop for PCB fabrication, turnkey component procurement, PCB assembly and more. We even provide aftersales services, such as timely logistics arrangements and field repairs. Our combination of state-of-the-art equipment and facilities, as well as our 30 expert engineers, enable us to support a variety of requirements and custom projects. And we can create a prototype for you within three weeks.

Our dedication to quality services coincides with our ISO 9001:2008 certification and IPC-610-D workmanship standards. Our solid growth is a result of our reliability and cost-effective production for our local and international OEM/ODM clients. Send us your inquiry, and we will reply with a quote in just three days.

Pocket projectors with docking stations for Apple's iPhone and iPod

Designed to work with handheld devices such as smartphones, notebooks, gaming consoles and more

Your customers will love our latest feature-packed pocket projectors. Compatible with smartphones, notebooks and gaming consoles, and including docking stations for Apple's iPhone/iPod, they are sure to be a hit in your market. Powered by Texas Instruments' DLP technology, our focal product has an image projection size of up to 80 inches. And the unique 90° hinge makes it easy to project on any surface, eliminating the need for a stand or tripod. It also features built-in stereo speakers and a battery life of up to three hours. And your customers will value that its LED light has a life span of more than 20,000 hours.

As a division of the Foryou Group, which was established in 1993, we have the capacity and experience to meet your needs. Our CE-marked pocket projectors are produced in our 1,400m² dust-free and antistatic workshop, and we are ISO 9001:2008- and ISO 14001:2004-certified.

Have our 30 senior engineers work on your next OEM/ODM project. Or source from our own range of Adayo-branded products. To learn more, inquire now.

Over 300 lifestyle-oriented accessories

Lifestyle-oriented accessories

Our catalog includes over 300 up-to-date items, including protectors for Apple's iPods, iPhones and iPads, cases for Sony's PSP, CD libraries and laptop bags. We add up to 60 new designs each month to stay on top of changing market trends. Made in your choice of leather, PU, nylon, EVA, PP, acrylic plastic or silicone rubber, we offer you a wide range of products suitable for a wide demographic.

The right cases for your market

For work or for sports, for business or for pleasure, our range of items can be tailored to your consumers' needs. Create the perfect case for your target market by customizing the trim,

color and material of our products. With a team of 30 engineers and designers, we can have samples finished in as fast as 24 hours for products with existing tooling. Customized orders requiring new tooling can be completed in as fast as seven days.

Production you can rely on

Rely on us for all your sourcing needs. Our ISO 9001:2000-certified factory in Dongguan can produce 1.5 million units monthly to cater to your volume orders. And for small orders, we have a flexible minimum order requirement, ranging from 1,000 to 3,000 items depending on the product. Inquire today, and receive a quote within 24 hours.

- Install without tools
- Various colors available

BS/CS, UHF and VHF outdoor booster (BUV-1000)

Antenna for both indoor and outdoor applications (DA-600)

Outdoor HDTV antenna (WA-2807)

Having been in the antenna industry for 16 years, we know how important time is to your business. To ensure rapid time-to-market, we employ 10 engineers who have more than a decade of experience in antenna R&D. We've equipped them with network analyzers from Japan and Advantest RF network analyzers to speed up the design process. And because we are partnered with a factory which houses 20 plastic injection molding machines, we can have samples molded and ready for production in 40 days.

As soon as we receive your confirmation, we will begin filling your order at our ISO 9001:2000-certified factory. Here, 19 semiautomated production lines turn out 250,000 CE-marked antennas monthly. Plus, with four other partner factories, we have the resources to ship orders in as fast as 25 days. And for quality assurance, we subject our products to noise, mobile radio transmission, high-voltage, salt-spray and vibration tests.

To benefit from our speedy antenna manufacturing, send us your requirements today.

2.0-ch. docking stations for Apple's iPod, iPhone and iPad
 • With speakers
 • Line-in/out jacks

Our docking stations undergo 5-step QC evaluations

Why is sourcing docking stations from us a sound choice? Unlike many of our competitors, we have 30 QC technicians who carry out five separate inspections, including software and hardware analyses. Moreover, all of our production processes are implemented under an ISO 9001:2000-certified management system to ensure uniform quality. Our confidence in our products is reflected in the one-year warranties we offer.

Select from our wide range of speakers, e-book readers, mobile Internet devices, PMPs and USB flash drives. We'll apply our 15 years in the consumer electronics industry to precisely render your custom specifications. Volume production is handled at our factory, where we make 30,000 speakers, 50,000 PMPs and 50,000 e-book readers each month. This output enables us to deliver 1,000 speakers in five days and 5,000 PMPs in 10 days.

Buyers in North America, Europe and Southeast Asia have already made the right choice. It's time you do – contact us now.

16 years of providing car electronics to buyers worldwide

We have hundreds of items to choose from

Source from us and benefit from the know-how we've acquired after 16 years in the industry. Over this time, buyers in Europe, Asia and the Middle East have profited from our wide range of in-car electronics, including black boxes, DVD players, LCD monitors, GPS devices, parking sensors, camera recorders and alarms.

With 40 R&D engineers developing two new items a month, we offer a range of more than 370 IB-branded items. Our 70-member QC team follows a rigorous evaluation system, subjecting all our products to high/low temperature, life span and waterproofing tests. This guarantees all our items are worthy of the CE, FCC and RoHS marks they carry.

Our 700 workers at our 100,000m² ISO 9001:2000-certified factory turn out over 100,000 items a month. And by manufacturing all major components in-house, we are able to pass cost savings on to our clients. To begin working with an established manufacturer, contact our Korean-, French- and English-speaking sales team today.

10 years of experience developing car GPS devices

Our latest models boast i9 processors we developed in-house

Established in 2001, Roadrover is one of the earliest manufacturers of car GPS devices in mainland China. For 10 years, we've offered multifunction car GPS navigation and entertainment systems for both local and international markets. Our featured model boasts an i9 processor that was developed in-house.

With two R&D centers and 220 engineers, who each have 10 years of experience, we offer comprehensive OEM/ODM services. These include platform structure, PCB design, hardware and software customizations, as well as tooling. We release six to seven new models every month to cater to market demands.

Moreover, we can ensure efficient production thanks to our new fully operational 30,000m² factory, which opened earlier this year. This facility houses 15 assembly lines and 10 Fuji SMT lines that are operated by hundreds of skilled employees. As a result, we have increased our monthly capacity from 30,000 to 50,000 units. To work with a supplier who can help you launch your products in major markets, contact us today.

In-car GPS navigation system for Lexus RX270/350 (C8019LR)

Our e-cigarettes are targeted at 1.3 billion smokers

These items are flameless, odorless, ashless, tarless and free of carbon monoxide and dioxins, and are ideal alternatives to real smoking

As the biggest e-cigarette manufacturer in mainland China, JSB insists on designing and producing the highest-quality products targeted at 1.3 billion smokers. Our JSB-branded and OEM e-cigarettes are flameless, odorless, ashless, tarless and free of carbon monoxide and dioxins – making them an ideal alternative for users who plan to quit smoking. We provide both OEM and ODM services, and possess the following advantages:

Strong R&D

- 50 professional engineers
- 800 skilled technicians
- Physical and biochemical laboratories
- New products released monthly

Top-ranking manufacturing system

- First-class dust-free and germ-free GMP workshop
- 10,000m² factory
- 25 automated production lines

International certifications and patents

- CE, RoHS, FCC, SGS, UL, PSE, EK and TÜV marks
- ISO 9001:2010- and ISO 22000-certified quality management systems
- Design patents in the EU and the US for our PCCs

In addition to a wide variety of disposable e-cigarettes and portable charging cases, we offer 100-plus flavors of e-liquid for your selection. We welcome you to market our JSB-branded items in your region. If you're interested, contact us today.

Vpark e-cigarettes

At least 5 new items developed each month

We place 4 to 8 QC technicians on each production line

Source your multifunction radios from us and you will never be short of new products to offer your customers. That's because our R&D engineers – who each have between eight to 10 years of experience – develop five to eight new items every month. They can also have a new sample created based on your specifications within two months.

Our 15,000m² factory houses eight production lines, which we use to produce 250,000 units monthly. We have our own brand name – NNS – and apart from multifunction radios, we also manufacture digital radios and voice recorders.

Quality control is carried out by 60 technicians who each have more than five years of experience. We place between four and eight of these QC team members on each production line, ensuring our products have a qualification rate above 98 percent. Contact us now.

We have been manufacturing A/V products since 1996. Sanyo is just one of the recognized market leaders from North America to Southeast Asia that has benefited from our extensive knowledge of the industry. Work with us and take advantage of our design and production strengths.

R&D support from 150 designers

We're always on top of the latest trends in portable entertainment devices, thanks to our team of 150 designers. Each month, they add up to three new products to our selection of portable CD/VCD/DVD players, radio cassette recorders, receivers, home DVD players and mini speaker component systems. These

items can be customized to meet consumer preferences in your market.

Monthly output of over 500,000 units

To ensure precise and efficient manufacturing of your orders, we've equipped our ISO 9001:2000-certified factory with imported SMT machines, AI-insertion machines and COG bonders. And with over 6,800 employees and 45 production lines, we are able to turn out more than 500,000 CE-certified units each month to accommodate your volume orders.

MP3 CE ISO 9001:2000

Over 500,000 portable electronic devices monthly

From a 15-year A/V product supplier

Digital music boxes (LP-455/LP-456/LP-459)
• Folding LED lights • Rechargeable batteries included

Docking stations for Apple's iPod/iPhone (IP-001/IP-004/IP-003/IP-005)
• PLL radios • Alarm clocks

A recognized market leader

We have been manufacturing A/V products since 1996. Sanyo is just one of the recognized market leaders from North America to Southeast Asia that has benefited from our extensive knowledge of the industry. Work with us to take advantage of our production and design power.

Monthly output of over 500,000 units

To ensure precise and efficient manufacturing of your orders, we've equipped our ISO 9001:2000-certified factory with imported SMT machines, AI-insertion machines and COG bonders. And, with over 6,800 employees and 45 production lines, we are able to

turn out more than 500,000 CE-certified units each month to accommodate your volume orders.

R&D support from 150 designers

We're always on top of the latest trends in portable entertainment devices, thanks to our team of 150 designers. Each month, they add up to three new products to our selection of portable CD/VCD/DVD players, radio receivers, home DVD players and mini component systems. These items can be customized to meet consumer preferences in your market.

Learn more about what a 15-year industry veteran like us can do for you. Visit our website today.

Multifunction, digital models lead R&D

The latest releases pack a multimedia player, an e-book reader and a DVB-T receiver.

China manufacturers of portable TVs are releasing more multifunction and digital models to keep up with trends in the mobile device industry. The latest selections combine a multimedia player, a voice recorder, an e-book reader, an FM radio and a digital photo frame.

Integrated products account for about 26 percent of total output in the line. For some suppliers, these take up 60 percent. Makers are also planning to incorporate digital camera, gaming, touchscreen, HD video and GPS functions in future variants. This is to support the convergence of consumer, computing and communications electronics.

Shenzhen Kaixuan Electronics Co. Ltd offers the KX-2093 model, which boasts a 3.5in TFT LCD and multiformat playback in MP3, WMA, RM/RMVB, 3GP and FLV. The unit packs an e-book reader, a digital photo frame, an FM radio and a voice recorder.

Shenzhen SDMC Technology Co. Ltd's 7in model DV6007-T DVB-T TV plays AVI, WMV, MKV VOB, MPEG-4 and H.264 video in 720p or 1080i/p. It also has e-book, photo frame, calendar and EPG functions.

Moreover, businesses are hastening the development of units that can handle digital signals as the total shift nears. Among such products from China, DVB-T variants account for 55 percent of output, and ISDB-T types make up 30 percent.

Devices supporting DVB-T2 are becoming popular in more areas worldwide because of enhanced efficiency, robustness and flexibility based on the new modulation, coding and error correction techniques used. These attributes enable better mobile reception and HD content playback.

continued on page 60 ►

Shenzhen Kaixuan's KX-2093 model includes an e-book reader, a picture viewer, a voice recorder and an FM radio.

Price guide: Portable TVs

Price range (per unit)	Basic features
\$12 to \$35	5 to 9in color CRT; PAL, NTSC, SECAM; FM radio, games; A/V input ports; ABS housing

Source the world's smallest and slimmest AC adapters

Source from our collection of our ultra-small and ultra-slim AC adapters, laptop batteries, digital camera chargers and gaming console batteries. Our 10 engineers, each with five to 15 years of experience, design 30 new products every month.

Quality is our top concern. That's why we make sure that all of our raw materials meet CE, UL, FCC, SGS, SAA, GS, UA and CB standards and are RoHS Directive-compliant. And we ensure the reliable performance of our adapters by putting each unit through a four-hour aging test. Most of our competitors only perform this test for one hour. Over-voltage and overheating protection tests are also carried out in-house so that we can closely monitor the quality of our items.

With a wide range of models to choose from and stringent QC evaluations, it's no wonder over 1,000 buyers across Europe, the Americas and Australia source our batteries and chargers. We're improving day by day – why not benefit from it? Contact our 24-hour online service representatives now.

- Portable power bank
- Can also be used as hand warmers
 - Available in various colors

90W universal in-car AC adapters

- Multifunction portable external batteries with flashlights
- Compatible with Sony, Nokia, Sharp and Motorola mobile phones, Apple's iPods and iPhones, Sony's PSP, Nintendo's DSi and various MP3/MP4 players
 - 120-hours of continuous light use
 - Three brightness levels
 - 5,200mAh
 - Available in various colors

Ultra-slim portable universal AC adapters, 115 x 49 x 29mm

90W AC adapter, 90 x 61.5 x 18mm

- Silicone anti-shock layer
- Easy access to all switches and jacks
- Available in different colors

Charging stand for Sony's PS3 Move (JM-3021)

- Built-in high-capacity protective circuit
- Game disc display cradle
- Can charge 2 wireless controllers and 2 PS3 Move controllers simultaneously
- Charging status LED indicators
- AC adapter not included

\$450,000 invested in R&D annually

Every year, we invest \$450,000 in our R&D department to bring you innovative gaming peripherals. This gives our 15 experienced engineers the resources they need to add up to 10 new products monthly to our range of 500 models. And if you're looking for customization services, we can also help. Simply send us your OEM/ODM requirements, and we'll complete a prototype for you in as fast as seven days.

Meeting global social accountability standards

To ensure quality, we carry out all processes – from PCB assembly, molding and plastic injection to IC bonding, assembly and QC – in-house. Moreover, we operate under an ISO 9001:2000-certified management system and in accordance with SA8000 global social accountability standards. Plus, we assign 33 inspectors to conduct random tests prior to shipment.

International approvals for smooth distribution

For easy importation into various markets, all of our peripherals carry CE, RoHS, EMC and UL marks. Our monthly capacity is 1.2 million units, enough to support your volume demands. To put our R&D resources to use on your orders, send us your specifications today.

We redefine audio listening

Our vibrating speakers can turn any surface into a large speaker

Who says that a table, door or window can't be turned into a speaker? Utilizing our latest patented vibration-resonance technology, which is similar to Terfenol-D, we are able to develop speakers without membranes. These enable our products to transmit audio waves on vertical and/or level solid surfaces – wood, glass, plastic, furniture such as tables and chairs, or doors and windows – and transform them into large speakers with omnidirectional sound.

Our strong R&D team adds four to five new models to our selection monthly. We can also customize products within two months. Our extensive range includes mini, portable, notebook PC and two-channel speakers, as well as a series of Bluetooth® adapters, speakers and more. Contact us today.

Award-winning quality and designs

Our creative designs have won us numerous accolades such as the Good Design Award from Japan and the International Forum Design Award from China. Equipped with 3-D design software and rapid-prototyping machinery, we constantly release new products to keep you ahead of the competition. Our balanced armature driver earphones utilize high-tech patented audio components that enhance sound delivery. And our CH116 lightweight headphones are designed to optimize the rich sounds of stereo music.

Count on us for all your OEM/ODM projects from design to production. Our ISO 9001:2008- and ISO 14001:2004-certified manufacturing facilities, housing over 47 production lines and 3,500 staff, can handle your volume needs. For your projects in audio headphones, multimedia headsets and Bluetooth® wireless products, contact us today.

The LCD968 model from Shanghai Kingstronic has a 9in TFT LCD and supports DVB-T and DVB-T2 standards.

Europe is the main adopter of DVB-T2, with countries such as the UK, Italy, Sweden and Finland offering related services. Within the region, Austria, Spain, Denmark and Germany are implementing system trials. India, Singapore and South Africa have signified their intention to use the updated standard. With this trend, Shanghai Kingstronic Co. Ltd expects its shipment of portable DVB-T2 TVs to grow in the next six months.

China's output of ISDB-T types also rose by 5 to 10 percent YoY because of increased penetration in South America, including Argentina, Brazil, Chile, Ecuador, Paraguay, Peru, Uruguay and Venezuela.

ATSC-T models are widely used in the US, Canada and

Mexico. Although their global share is not expected to equal rival digital systems, the category's supply remains stable. Makers predict the ATSC-M/H variation will have a better potential, owing to its mobile reception capacity at speeds of up to 180kph.

The portable CRT TV segment, meanwhile, is shrinking, with less than 10 percent share of aggregate yield. Although suppliers can add digital signal reception to the analog products, most are not keen to pursue the line due to lower overseas demand and thin profit margins. Enterprises forecast the decline will continue as LCD units strengthen foothold on the mainstream market.

One challenge China manufacturers face is the widening availability of other devices with TV function such as mobile phones. The latter's global market value is predicted to reach \$4 billion by end-2011 from \$3.2 billion last year, according to Informa Telecoms & Media. Because of this, makers expect portable TV orders to drop slightly in the next six to 12 months. Export volume will likely follow suit, with a less than 5 percent decrease projected in the next half year.

Europe, South and North America, the Middle East and Africa are the major destinations. The first three absorb midrange and upscale models with LCD screens, more advanced ICs, analog and digital signal reception, and a host of other functions.

Entry-level variants that are shipped to the last two locations are typically analog units with CRTs or small LCDs and basic A/V playback.

A series of ErP Directive Stage 2-compliant 5W power supplies

Since 1991, we have been exporting to buyers in Europe, the US and Asia. Our ErP Directive Stage 2-compliant power supplies, such as the 5W switching models featured here, are customizable for a variety of applications. With constant current modes and output voltages ranging from 3 to 24V DC, our CE- and GS-marked products are widely used with smartphones and PMPs.

At our 5,000m² Dongguan factory, over 400 skilled workers turn out 400,000 units monthly. And our high QC technician to staff member ratio of 1:12 ensures consistent, quality volume production. Our parent corporation, Fujikon Industrial (Holdings) Ltd, is listed on the Hong Kong Stock Exchange (SEHK: 0927). Call us today.

Our 10 R&D engineers create 15 new headphones and earphones monthly

More than 10 years' OEM/ODM experience

We release 15 new headphones and earphones monthly to add to the 400-plus models we already have in our collection. This is made possible by our R&D team of 10 engineers with four years of experience in this industry. If you have a design in mind, we – a manufacturer with 10-plus years of OEM/ODM experience – can have a 3-D drawing completed for you in only seven days. Once you confirm the blueprint, a sample will be finished for you in just 15 days.

All of our manufacturing processes are handled at our two ISO 9001:2000-certified factories equipped with seven production lines. At these facilities, our 600-plus workers can make 1 million mobile phone, Bluetooth®, PC and MP3 player earphones and headphones, and 200,000 microphones monthly. This output ensures that your volume orders will always be filled. Custom water-transfer printing is also available.

Buyers worldwide, including US hypermarkets and major clients in South America, are already sourcing our products. Recent

equipment and raw material upgrades mean that all of our items are now RoHS Directive-compliant. And for facilitated distribution into your market, our products are CE- and FCC-marked. For more information, contact us today.

More than 20 new portable electronics monthly to enhance your lineup

Our 30 engineers develop over 20 e-book readers, mobile Internet devices, portable DVD players, portable TVs and PMPs each month to ensure you can choose from the latest models. They can also design a custom product according to your specifications within 15 days. We develop more than 30 of our own molds per year at our 1,000m² mold factory. This strength is the result of a 43 percent investment of our annual sales revenue toward R&D ventures.

We have a factory boasting SMT machinery from Japan. Here, we produce up to 300,000 units monthly. This ensures we can ship up to 1,000 devices in just three weeks. Our components come from 30 suppliers – many of whom we've cooperated with for over eight years – in Hong Kong, Taiwan, Japan and South Korea. Contact our English-speaking representatives today.

- E-book reader (KX-913)
- 7-inch TFT-LCD touch screen
- Supports TXT, DOC, PPT, PDF, PDB, FB2, EPUB and HTML formats
- Supports MP3, WMA, FLAC and Ogg Vorbis audio playback
- Supports WMV, RM, RMVB, AVI, 3GP, FLV, MP4, MPG and MPEG video formats
- Built-in voice recorder, FM radio, calendar and clock

Customized wireless headphones from a 15-year manufacturer

Our experienced engineers can have OEM/ODM items ready in 30 days

Our 15 years of experience researching, developing and manufacturing wireless headphones means we can offer you superb customization options. In fact, our 15 R&D engineers, who have been in the wireless headphone industry for 10-plus years, can develop a new product for you in 30 days. This efficiency is possible because we develop transmitters and PCBs, as well as customize the housings and carry out aesthetics design, in-house.

To provide you with trendy and functional headphones, we've partnered with a design house based in Hong Kong. This cooperation has enabled us to offer our clients wireless headphones that specifically cater to Western markets. Our monthly capacity is 100,000 units. For more information, contact us now.

Quality, competitive prices, quick deliveries and fast responses you can't ignore

There's a lot to expect when you partner with us. Each of our production lines is monitored by three QC members. These specialists utilize IR and ultrasonic spectrum analyzers and scanners from Japan, as well as conduct explosion-proof testing – a rarity in the industry – to ensure quality. To demonstrate the confidence we have in our USB flash drives, SD cards and laptop batteries, we offer five-year warranties.

We eliminate the fees of the middleman by sourcing chipsets directly from Samsung. This enables us to offer prices that are up to 20 percent lower than those of other suppliers. A shipment of 7,000 units takes no more than three days. Over 300 internationally recognized buyers, including HTC, Samsung, Mercedes, BMW and IBM, source from us. Inquire now and we'll respond in English, Japanese, Hindi or Spanish within 12 hours.

 - Microphone input
 - CD-400 headphones (optional)

For over 26 years, premier companies — including Sony, EV, JVC and others — have sourced headphones and accessories from us. Our innovative product line is highlighted by our featured 10-position listening center, which includes individual volume control for each of the 10 output jacks. It's a perfect match with our collection of noise-canceling headphones. With over two decades' experience and a stellar client list, you can rest assured knowing that our engineers have the experience needed to tailor products to your OEM specifications.

For an added degree of quality assurance, our Taiwan and Guangdong factories are ISO 9001:2000-certified and accredited by TÜV. And everything we produce is CE-approved — ready for immediate import into your market. For more information on our line of headphones and microphones, contact us today.

Receive samples up to 10 days faster

With a new, fully equipped R&D center in Hong Kong and molding facilities in mainland China, we've reduced our sample lead time to just 20 days – that's up to 10 days faster than our competitors'. Our 20 reliable engineers can render your requirements accurately, so we get your immediate approval. And they add three new headphones or earphones to our collection monthly to broaden your choices.

We have also opened a new 70,000m² ISO 9001:2000- and ISO 14001:2004-certified factory to handle your volume needs. For more information regarding our products and services, inquire now.

Our ISO 9001:2008-certified factory outputs 500,000 units a month

Major buyers source our headsets because we have over 31 years' international trading experience and — at 500,000 units a month — a production capacity that's five times greater than our competitors. We ensure quality production by manufacturing items in-house at our ISO 9001:2008- and ISO 14001:2004-certified facilities, using our own plastic injection and mold-making machines. Additionally, all of our products meet RoHS Directive and REACH requirements. Our product line features headsets, headphones, earphones and more. Contact us now to receive an OEM/ODM sample in as fast as three days.

Designing and manufacturing Li-ion batteries for 11 years

Batteries for digital cameras

Batteries for smartphones and PDAs

Since 2000, we have been a leading designer and manufacturer of Li-ion batteries and chargers in mainland China. More than 100 big buyers in Europe and the Americas source our products, because we always put quality first. Our QC team screens all raw materials and strictly conducts five-step inspections throughout the manufacturing process – ensuring our return rate remains at less than 0.1 percent. As a result, you can trust the quality of the 1.5 million units we make monthly. Choose from our 5,000 models of Li-ion and Li-polymer batteries and chargers for digital cameras, mobile phones and other personal electronics. Inquire now.

MP3 players for Samsung and Hyundai

Three new models designed monthly

- MP3 player (KM-SB01)
- 128MB to 16GB storage
 - 6 to 8 hours of play time per charge
 - 50 x 50 x 11mm, 20g
 - Available in red, black, white, blue and other colors

We have been exporting MP3 players and USB flash drives since 2005, completing OEM and ODM projects for big buyers such as Samsung, Hyundai, Nissan, Fedex and DHL. Just last year, our export turnover reached the \$500 million mark.

Currently, our product range features 60 models of MP3/MP4 players, 80 USB flash disk styles, 10 mini laptop series, and 15 speaker types. Every month, our creative team introduces three brand-new units. We can also customize our items, with working samples ready in 15 to 30 days.

Although we are manufacturing close to 850,000 units monthly, we also accept orders for as few as 200 units to cater to small buyers. Delivery lead times are 10 to 15 days. To learn more about our products and services, contact our multilingual sales staff today.

Portable TV range & price trends

Mainstream portable TVs from China manufacturers have 7, 8 and 9in LCDs, analog or digital signal reception, A/V playback, USB 2.0 ports and ABS housing. Entry-level products represent 30 percent of output. These play JPEG, MP3, WMA, WAV, AVI, 3GP or MPEG-4 files and support DVB-T, ATSC-T, ISDB-T, PAL, NTSC or SECAM. The 2.8 to 6in LCD units have a speaker, an FM radio, an e-book reader, an earphone jack, an SD/MMC slot, and USB 2.0, RF and CVBS ports. Aside from OSD, these come with a remote control. Housings are made of acrylic or ABS.

Midrange devices represent 45 percent of yield. Sporting 7 or 8in displays, the variants are compatible with BMP, GIF, Ogg Vorbis and RM/RMVB formats and ATSC-M/H signals, in addition to attributes shared with low-end counterparts. These also have VGA, S-Video and YPbPr ports, a voice recorder and an HD video player.

High-end varieties pack 8 to 9.7in screens, and support DVB-T/T2 systems and APE, FLAC, FLV, MKV and VOB formats. These are equipped with an HDMI port, touchscreen and touch button. EPG, GPS, Bluetooth, Wi-Fi, and gaming and digital camera functions are also included.

LCD panels and chips are the key components in portable TV manufacture and together account for more than 70 percent of product costs. The first is sourced locally or from Taiwan.

Analog TV ICs are purchased from the last, Japan, South Korea and homegrown companies.

Makers complement the domestic source of digital inputs by

importing from international providers Anyka, Actions, Sunplus, ALi, Siano and DiBcom. The cost of ATSC-T/M/H and ISDB-T chips are higher by 30 percent and 10 to 20 percent, respectively, than DVB-T. Makers project a steady supply of these and other components and raw materials, including NAND flash memory, plastic and metal.

Despite the rising labor and material outlay and the appreciation of the yuan, most companies foresee 5 to 10 percent export price reductions in coming months because of weakening demand. The stable cost of key components and tight competition are also contributing factors.

Rates of 7, 8 and 9in LCD panels used in mainstream portable TVs, for instance, have remained the same, according to DisplaySearch. The first stayed at the \$12 level for four months, and the 8in type at \$20. The 9in version lists at \$21.20.

2 new feature-packed devices each month

Each unit boasts a capacitive touch screen and Google's Android 2.2/2.3 OS

- Tablet PC
- 7-inch capacitive touch panel
 - Google's Android 2.2 OS
 - Wi-Fi and 3G connectivity
 - Renesas EV2 Cortex-A9 dual-core CPU
 - Built-in GPS, Bluetooth® connectivity
 - Supports voice calling

Our 10 experienced engineers create two new devices each month that are packed with features. Take, for example, the tablet PC shown here. It's available with a capacitive touch screen that ranges from 7- to 10.1-inch sizes. Plus, each unit boasts Google's Android operating system and a Samsung CPU, as well as built-in GPS, camera and 3G modules.

Our R&D team can also customize a product for you within 60 days. We attend several major trade shows each year, including the China Sourcing Fair, CES, China Import and Export Fair and CEB, which enables us to stay up-to-date on the latest market trends.

We can produce up to 70,000 such devices per month – 98 percent of which are exported around the world. Start with an order for just 500 units to test our products in your market. Contact us today.

Reduce CO₂ with solar-/hand-crank-powered products

50 new designs annually

SB-5020B:
Radio with LCD screen, can be powered by solar cells or crank

SB-2109:
Solar power bank, suitable for mobile phones and digital cameras

SB-2110:
Travel solar charger, with short-circuit protection

Let our goods light up your product catalog. We have 178 invention, utility and design patents. For over 16 years, we have been producing solar-/hand-crank-powered products, so you can be assured we possess the skills necessary to manufacture high-quality merchandise. What's more, these products are totally environmentally friendly and help reduce CO₂ emissions.

To keep up with market trends, our design team develops up to 50 new products each year. The plastic shells of our CE- and RoHS-marked lights are created using imported raw materials, while key components are sourced directly from reputable companies.

Send your OEM requests to our team of 60 engineers. They will complete your sample in only one week. More than 1,300 skilled employees are ready inside our ISO 9001:2000-certified factories. For your volume demands, we can produce up to 1.5 million units each month. Visit our Global Sources Online showroom and send us an e-mail today.

Introducing our newest high-definition digital sports camera

One of 5 new models this year

Our engineers are proud to present you with our latest innovation – the 720p HD sports camera featured here. A sure hit among your outdoor enthusiasts, this device can record up to 150 minutes of high-definition video on a single charge. Plus, your adventurous end-users can also use the 1.2-megapixel camera to capture photos at two-, five-, 10-, 30- and 60-second intervals. The camera is compatible with up to 32GB microSD cards for extra storage, and comes with mounting suction and clamps for helmets, handlebars, surfboards and more for handsfree use.

Each year, we add five new world-class designs to our lineup of cameras, car black boxes, GPS log trackers and more. Give us just four weeks, and we'll have your order delivered. We also offer one-year warranties. Inquire today.

Global Sources Verified Supplier ★★★★★

Serving 30 long-term OEM clients in Europe

MID (G10)

- Google's Android 2.2 OS
- Marvell's PXA166 CPU, 800MHz
- 256MB memory
- 7" TFT-LCD touch screen
- 800 x 480 resolution
- 3-D graphics acceleration
- Built-in GPS

Over 30 major OEM buyers from Europe have been sourcing from us for more than six years. We deliver at least 10,000 units every week to one of those clients – and you'll get the same prompt delivery and volume support if you work with us.

Despite this speed, we carefully inspect each unit according to an ISO 9001:2000-certified quality management system. And our products comply with the RoHS Directive, so our clients have no trouble importing them.

Our R&D team works hard to satisfy even the toughest requirements, whether for appearance, features or software. We also release 20 new models every month to update our collection. For more on our products and services, contact us today.

PRODUCT GUIDE

Typical parts & components

• **Housing:** ABS is the common material used in China-made portable TVs. Some entry-level units utilize acrylic, while high-end variants employ aluminum alloy for enhanced sturdiness.

• **Display:** Midrange and upscale products have 7 to 9in screens. Low-end selections pack 2.8 to 6in displays. Although 5 to 9in color CRTs are available, most devices from China adopt LCDs. Some boast touchscreens and OSD menus.

• **Controls:** Buttons are provided for volume and TV channel adjustment, menu options and switching among TV, FM radio, e-book reader, voice recorder, photo viewer, video player and digital camera functions.

• **Ports:** CRT varieties have the basic A/V ports only. Entry-level LCD versions incorporate USB 2.0, RF and CVBS. Intermediate ones include VGA, S-Video and YPbPr, and upscale models HDMI. The last two categories also integrate an SD/MMC slot.

• **TV receiver:** Dominant models accept both analog and digital reception. Low-end types comply with DVB-T, ATSC-T and ISDB-T standards, and PAL, NTSC or SECAM systems. Midrange and high-end units receive ATSC-M/H and DVB-T2 signals, respectively.

Producing 100,000 units every month

And capable of delivering 50,000 units to you in only 20 days

With a production process as efficient as ours, it's no wonder Costco, Sweex and Sigma-Tek source digital photo frames, MP3 players and MIDs from us. We source our main components from local suppliers, enabling us to complete your orders in a timely manner. Each month, we can turn out 100,000 units and deliver 50,000 items to you within 20 days. To find out more about our products, please contact us today.

- 4.3" digital greeting/marketing video card
- TFT-LCD screen
 - Supports 8 or 16MB NOR flash memory

- 7" digital photo frame with HD TFT-LCD screen
- Supports MP3 and DivX formats
 - Supports SD/MS cards and MMCs
 - Built-in calendar and alarm clock

- 1.8" digital photo frame with TFT-LCD touch screen
- 160 x 128 resolution
 - Stores up to 100 pictures
 - Downloads photos from computers via USB cable
 - The figurine on top of the digital photo frame is customizable according to the client's needs

We oversee everything from design to delivery

Foldable headphones with built-in microphone

Established in 2004, we have consolidated every step of the manufacturing process of our headphones. Everything from wire and speaker production to ear-shell injection, silkscreening and final assembly is completed in-house. By doing this, we can offer you lower prices, ensure quality products and provide timely deliveries. Each year, we allocate 20 percent of our profits toward R&D ventures. And every month, our R&D team develops up to four new products for your selection. We operate an ISO 9001:2000-certified facility, and our products are CE- and RoHS-marked. Inquire now.

Our Hong Kong team double-checks every order

To bring you the detail-oriented services you expect from a Hong Kong supplier, we have a specialized QC team that travels regularly to our mainland China factory for order inspections. Before shipment, finished products are checked again at our Hong Kong headquarters. This is how we ensure the quality of the personal electronics items we produce. No matter the size of your order, we have a commitment to your satisfaction.

Our factory in Dongguan can produce over 250,000 units monthly, including hearing-aids, personal alarms, phone amplifiers, megaphones and more. All products are fitted with quality ICs from Taiwan, South Korea or Japan. Your design ideas are welcome and we can provide a prototype in three weeks.

For quotations and more information, visit our website or contact our Hong Kong office today.

Your trustworthy supplier for digital cameras and camcorders

Checked 5 times for quality assurance

- ▶ 15MP digital camera with 2.7" TFT-LCD screen (DC-530A)
- 3x optical zoom, 4x digital zoom
- Facial recognition • Microphone
- Supports up to 32GB SD cards

- ▶ Tablet PC with 8" TFT-LCD capacitive multi-touch screen (WT-S004)
- Google's Android 2.2 OS • Wi-Fi and 3G connectivity
- 512MB RAM and 4GB ROM (up to 32GB T-Flash card supported)
- Built-in GPS and G-sensor

- Digital video cameras with 3" touch screens (HDV-160)
- 1920 x 1080p full HD video recording
 - Face tracking • Max. 16MP still image resolution
 - 5MP CMOS sensors • Up to 16x digital zoom
 - Support up to 64GB SD/SDHC/SDXC cards

Why should you choose us as your supplier for digital cameras and camcorders?

- We've been providing reliable OEM/ODM services for eight years
- Our products come with CE, FCC, REACH and RoHS marks
- We have a 300,000-unit monthly production capacity
- Our R&D team releases three new items every month
- Samples are available within three days
- 1,000-piece orders can be delivered in 20 days
- We keep 80,000 to 100,000 items in stock to deliver small and urgent orders within 24 hours
- All of our goods are tested five times before leaving our factory
- We source materials in large volumes – making our products cost \$2 less than comparable models on the market

To discover more about the benefits we offer, call us now.

Mini aroma diffuser, one-year warranty available

Our products might be small, but our experience isn't

Mini speaker with TF card slot, one-year warranty available

With 15 years of industry expertise, we're not short on know-how. Neither are our engineers. We employ 24 R&D technicians – with an average of 15 years' experience – who can complete a customized mold or circuit design in just 10 days. You'll never be caught short with a lack of selection either. We add five new items a month to our catalog of mini speakers, mini ultrasonic aroma diffusers, automatic soap/sanitizer dispensers and mini massagers. The components we use are sourced from Taiwan and Japan, and we export to the US, Australia and Asia. Contact us today.

12 years' experience as a professional MP3/MP4 player manufacturer

We supply to Fortune 500 companies

MP4 player

- 1.5" TFT touch screen • Video player
- Digital voice recorder • 2-16GB capacities
- Supports MP3/WMA/WAV/AVI formats
- Dimensions: 46 x 45 x 14mm

Established in 1999, we specialize in the design, development and manufacture of MP3/MP4 players, Google's Android-enabled devices, HD video players and more. With an emphasis on personal audio and video products, we have created items which are well-received in various international markets. In fact, we supply electronics to well-known retailers, including several Fortune 500 companies. And, if you need customization services, our English-speaking R&D engineers will work closely with you to integrate the features your market demands.

Production is carried out at our 8,000m² ISO 9001:2008-certified factory equipped with SMT, plastic-injection, hot plastic packing and high-cycle seal machines. And with more than 600 skilled workers, we can turn out up to 500,000 units every month. We are also a member of the Sisvel S.p.A. licensing program. For more information regarding our CE-, FCC-, REACH- and RoHS-marked items, contact us today.

Receive an OEM/ODM sample in as fast as 5 days

When you place an OEM/ODM request for custom headphones and other audio accessories, you'll have a completed sample in as fast as five days. And we respond to all inquiries in less than 24 hours. Founded in 2007, we manufacture innovative headphones, microphones and other audio accessories for clients around the world. With the help of our in-house molding workshop and team of 19 engineers with an average of six years of industry experience, we release up to five new models each month. We can also provide individual samples for each product.

Production is carried out at our two factories that together span 10,000m². With six production lines and 360 workers, these two facilities have a combined monthly capacity of 10,000 units. To ensure the highest quality, we utilize state-of-the-art production equipment, including vertical injection molding machines, oscilloscopes, digital multimeters and digital caliper machines, to craft every unit. And our 30-member QC team ensures all products are fit to

bear CE, FCC and RoHS marks. For added assurance, all orders come with one-year warranties.

We have no minimum order requirement and our standard delivery time is as fast as 30 days. Contact us today to learn more.

OEM/ODM samples in as fast as 15 days

Place your OEM/ODM orders for our electronic devices. We can finish a customized sample according to your specifications – for any of our MIDs, tablet PCs, PMPs, e-book readers, portable GPS devices and MP3/MP4 players – in just 15 days. And we also offer variety. Each month, our engineers develop up to two new products to refresh our lineup.

For quality control, we allocate 36 officers to monitor each production line. They conduct thorough product evaluations to ensure each unit is fit to bear CE, FCC and RoHS marks. It's no wonder our return rate remains lower than two percent. Should you have any questions after your purchase, we offer technical support. Inquire today.

Global Sources Verified Supplier ★★★★★

Choose from over 150 prepackaged camera and camcorder models

From a 29-year manufacturer

We've been in the business of producing and exporting cameras for 29 years – far longer than many other makers. Though we've switched from analog to digital, our history still gives us a significant advantage over our younger competitors. Our extensive experience has allowed us to build a team of more than 50 R&D technicians. It has also earned us preferred-buyer relationships with reputable material and component suppliers. This cuts down on sourcing costs – and we pass those savings on to you.

Production is carried out at our mainland China factory, where over 1,500 staff members operate machinery from the US and Japan. Our factory produces up to 1 million units monthly. And our products ship with one-year guarantees, inspiring greater consumer confidence. Whether it's high-end models or low-cost promotional versions, with over 150 prepackaged cameras and camcorders, we're sure to have what you're looking for. Contact us today with your OEM/ODM requirements.

 - SD memory card input

Since 1999, we have been offering clients worldwide a range of portable DVD players, MIDs and other handheld electronic devices. We release up to two new products monthly and also offer OEM/ODM services. Our monthly output capacity is up to 120,000 units. This capacity is thanks to three factories that cover over 60,000m² in our own industrial park, and our team of 500 workers. Big buyers such as Roadstar, Zeta and Curtis source their electronic devices from us. We also ensure all products are fit to bear CE, FCC, FDA, UL and RoHS marks prior to shipment. Our minimum order requirement is 200 pieces. Inquire now.

Our MIDs boast chipsets from Samsung, Rockchip, Telechips and Freescale

- Tablet PC (MID070S4A)
- 7" screen
 - Samsung CPU with 512MB RAM
 - Google's Android 2.2 OS
 - Supports 3G USB modem (WCDMA/EVDO optional)

- Mobile Internet device (MID101F2)
- 10.1" multitouch screen
 - Freescale CPU with 512MB RAM
 - Google's Android 2.2 OS
 - Supports 3G (WCDMA/EVDO optional)

For MIDs that boast high-quality components from trusted suppliers, source from us. We utilize chipsets from Samsung, Rockchip, Telechips and Freescale, so that each device performs optimally. Then, we use four SMT lines to turn out up to 50,000 units monthly – 90 percent of which are for export. For custom models, our 10 English-speaking engineers, who have eight years of experience each, can develop a new product and mold for you within 45 days. And for your peace of mind, we offer one-year warranties. Contact us now.

Over 10 years' experience designing and manufacturing silicone items

Bluetooth® keyboard with leather case for Apple's iPad, CE- and FCC-marked

Ultra-thin silicone cases for Apple's iPhone 4

Wireless charger for Apple's iPhone

Two-toned silicone cases for Sony's PlayStation 3 Move controllers, OEM orders are welcomed

We have more than 10 years of experience producing silicone items. Utilizing our in-house molding department, our team of 25 R&D engineers and designers creates trendy, yet functional silicone cases for game controllers, mobile phones and Apple's iPads, as well as silicone keyboards, kitchenware, baby products, bracelets and more. Every month, our R&D team develops over five new products to keep our catalog updated. Plus, we implement strict quality controls throughout the entire production process. We also offer customize packaging services. For more information, contact us now.

Chargers that come with different plug socket adapters for worldwide usage

Co-developed with leading university researchers

Multi-plug USB charger

LED driver

Power tool charger

USB in-car charger

Our 60 R&D engineers cooperated with Hong Kong Polytechnic University to co-develop some of the most innovative power management technologies on the market. Established in 1979, we have evolved into a multinational company that produces eco-friendly power supplies. Take, for example, our multi-plug charger. It is supplied with different plug socket adapters for convenient use worldwide.

Choose from our extensive catalog of switching power supplies, chargers, adapters, transformers, high-frequency magnetic components and PCB assemblies. All of our products pass rigorous tests – including thermal shock, temperature and humidity evaluations – to guarantee optimal functionality. We are based in Hong Kong and operate manufacturing facilities in Guangdong and Guangxi, enabling us to provide you with efficient and cost-effective production. Contact us today.

Over 34 years of experience go into your orders

Since 1977, we've been committed to providing safe, quality products. This is evident in our compliance with WEEE and RoHS Directive requirements, which ensures that our products are hazard-free and minimizes the emission of harmful substances during production.

We're committed to producing eco-friendly goods

Our products are compliant with the ErP Directive Stage 2 – meaning they're energy-efficient and eco-friendly, safer for the environment and can be distributed in markets in the EU trouble-free.

We offer MFi-licensed OEM services

We offer more than just MFi accessories. We provide MFi-licensed OEM/ODM services to customers, so they can have MFi items with their own brand name. Our power supplies and other accessories are made for various electronics and for use in regions worldwide. They also carry international approvals for easy importation anywhere in the world. Only 30 days to create a new device with the features you want

Portable media player with touch screen and camera

Slim e-book reader
• 7" color touch screen
• Wi-Fi connectivity

Internet TV box
• Google's Android 2.3 OS
• Supports up to 1080p HD videos
• Ethernet and USB port
• Wi-Fi connectivity

MID with 7" touch screen and camera
• Rockchip 2918 CPU
• Google's Android 2.3 OS
• Wi-Fi and 3G support

Integrating the features you want in your mobile Internet devices or media players is easy when you have electronics experts working for you. Applying their seven years of industry experience, our 30 engineers can develop a new device – with all the features you specify – in just one month. Our design strength is a major reason why leading retailers such as Kmart source from us.

Each month, we turn out up to 5,000 MIDs, 5,000 e-book readers, 5,000 netbooks and 15,000 MP3/MP4 players. To ensure peak performance, we subject our products to a gamut of tests, including DC power supply, electrical resistance, vibration and humidity testing. As a result, we can confidently offer one-year warranties. Our delivery time is as fast as five days, and we welcome orders for as few as 10 pieces. Send us your requirements today.

NiZn batteries

Rechargeable NiMH batteries

We offer premiums and website services to help you promote our batteries
More than 100 models to choose from

Work with us, and you'll not only get quality batteries and chargers, but you'll also receive services that are unmatched by our competitors. We help all of our clients strategize marketing plans and offer them premiums that include promotional T-shirts, notebooks, pens, posters and more – at no extra cost. Plus, if needed, we can even help distributors build websites to promote our batteries.

Our collection has more than 100 types of rechargeable NiMH, NiZn, NiCd, Li-ion and Li-polymer batteries and chargers, as well as disposable alkaline, ZnCl and ZnC batteries. If you need custom products, we can have samples ready for you in only three days. Our annual capacity is 100 million units – all of which are SGS-approved and CE- and RoHS-marked. For more information, contact us today.

OEM electronics in 15 days

Best Buy, Target, Virgin Records and Walmart source from us

With 25 partner factories, we can complete OEM orders for speakers, universal home controllers, Blu-ray disc and DVD players, PMPs, TVs, cameras and other electronic products in as fast as 15 days. For 35 years, we've built up this supplier network and filtered out substandard manufacturers. Best Buy, Target, Virgin Records, Walmart and others are already benefiting from our three decades of networking, and now, you can too. We can take you from a product concept to a retail-ready solution in as fast as 60 days.

We employ our own quality management team that regularly checks our partner factories to ensure your orders are flawless. This team handles everything – raw materials checking, sample confirmation and volume production inspections, as well as pre-packaging and shipping supervision. Work with us and these services mean fewer headaches for you.

We export to markets worldwide and orders as few as 1,000 units are welcomed. Our sales representatives can speak English, Spanish, Hindi and Chinese. Contact us now.

One of the first in our industry to be ISO/TS 16949:2002-certified

336V, 100Ah battery system for electric buses

We're one of the first battery suppliers in mainland China to have implemented an ISO/TS 16949:2002-certified management system. In addition, we also have ISO 9001:2000 and ISO 14001:2004 certifications. As a leading manufacturer of LiFePO₄ batteries, we have successfully supplied battery systems for more than 1,000 electric buses. We have also provided solutions for over 800 personal electric cars. The raw materials that we source from our suppliers are strictly evaluated according to IEC standards prior to production. To get your business up and running, contact us today.

We specialize in creating innovative flashlights and spotlights

Our R&D engineers design unique products that are appreciated by clients all over the world. For years, we've been supplying big buyers with our LED flashlights, rechargeable spotlights, halogen spotlights and high-power LED spotlights. We also carry dynamo combo lanterns, emergency lamps and nightlights.

As an award-winning supplier, we're ready to work with you on your next project. In fact, to handle your orders efficiently, we have a team of experienced sales specialists that understands the requirements of buyers in different markets. That's because well-known multinational corporations choose us as their supplier. Inquire now.

Battery-operated 1W LED flashlight (KB8146)

- Up to 90lm
- 3 modes: constant/strong/SOS distress signal light
- Requires two D batteries
- Weatherproof
- Usage time: Up to 40 hours
- Hanging hook for easy storage

Battery-operated 3W LED spotlight (KB2147)

- Up to 140lm • Swivel handle
- Two brightness settings
- Weatherproof
- Requires four C alkaline batteries

Battery-operated LED spotlight (KB2164)

- Three 0.5W LEDs
- Two brightness settings
- Swivel handle
- Weatherproof
- Requires four C alkaline batteries

Rechargeable solar 3W LED spotlight (KB2148)

- Up to 140lm • Swivel handle
- Charges via detachable solar panel base, AC/DC charger or 12V in-car charger
- Two brightness settings

Rechargeable 3W LED spotlight (KB2166)

- Up to 140lm
- SLA battery included
- 3 modes: constant/strong/blinking light
- AC/DC charger and 12V DC in-car charger included

Rechargeable 3W LED spotlight (KB2167)

- Up to 140lm
- Two brightness settings
- SLA battery included
- AC/DC charger and 12V DC in-car charger included

Switching power supplies that meet RoHS Directive, REACH and EuP requirements

Our factory is ISO 14001:2004- and ISO 9001:2008-certified

Our entire portfolio of products is compliant with REACH regulations, as well as both the RoHS and EuP Directives. This, together with more than 20 safety approvals, illustrates our ability to meet your most stringent requirements.

We – along with our 20 R&D engineers – have been meeting buyers' OEM demands for over 29 years, and more than 85 percent of our products today are exported to markets in the US, Europe and Japan. You can rely on our experience to bring you quality switching power adapters, chargers, transformers and more.

Our ISO 14001:2004- and ISO 9001:2008-certified factory is manned by 2,000 skilled workers, and is equipped with SMT lines for fast completion of your orders. We also have advanced manufacturing equipment, including plastic injection, milling and lead-free soldering machines. Our monthly capacity exceeds 3.5 million adapters, chargers and transformers. Contact our Hong Kong office today with your OEM specifications.

Our name card scanners undergo strict tests in our TÜV-certified lab

Guaranteed for up to two years

Portable name card scanner

- Scans over 1,600 cards per hour directly to Microsoft Outlook
- Recognizes up to 8 languages
- 2MP CMOS sensor

Two-year warranties

Discerning buyers know better than to settle for less. With us, you can rest assured that our name card scanners and other devices are produced according to the highest standards at our ISO 9001:2008-certified factory. We station 16 inspectors throughout the production process and subject each unit to stringent tests in our TÜV-certified lab. As a result, we can confidently offer two-year product warranties. Plus, our devices come with CE and FCC marks, and are compliant with the RoHS Directive for smooth distribution.

Up to 10 new models monthly

Each month, our designers add up to 10 new models to our catalog of 200-plus customizable name card scanners, IP cameras, projectors, HDD media players, portable speakers, docking stations and other electronics. Our latest name card scanner, featured here, can scan more than 1,600 cards every hour and has a recognition accuracy rate of over 99 percent.

Supplying 150-plus clients

Currently, 150-plus buyers from Europe, the Americas, Southeast Asia and Australia place orders with us. These clients have been so satisfied with our services that in the past two years, 90 percent of them have placed repeat orders. Send us your inquiries today.

LED pocket projectors from an industry pioneer

LiCoS projectors (HOS10 HS1)
• Support 1080p HD images
• Original resolution: 1,024 x 768 (XGA), support 1,280 x 1,050
• Brightness: 200 lumens (ANSI)

We are one of the first makers in our industry in mainland China to integrate LED technology into our projectors. This has resulted in devices with an average power consumption of only 50 watts and life spans of up to 50,000 hours – standard projectors consume over 170 watts and last only for 4,000 hours. We release five new models monthly and all of our items carry CE, UL, RoHS and UN 38.3 marks. We can have 5,000 units ready to ship in just 25 days. Inquire today.

Breathalyzers accurate to 0.005% BAC

Thanks to our fuel cell sensor technology

Breathalyzer for police use

Accurate results from fuel cell sensor technology

The results from breath alcohol detectors can have serious consequences. Make sure they are precise. Using state-of-the-art fuel cell technology, our breathalyzers are accurate to within 0.005 percent BAC so that there is no doubt. You won't find many suppliers who utilize fuel cell sensors in mainland China. We're now listed on the Shenzhen Stock Exchange, so expect more technological innovations from us in the near future.

Over 25 years of R&D backing

In addition to alcohol testers, our R&D staff has developed a wide range of portable gas detectors, with their over-25 years of experience. Unlike most other gas-detector suppliers, we have developed our own gas-sensing technology. Many of our competitors come to us for sensors, so you can source from us directly and enjoy significant savings.

Approved for international markets

Since 1984, we have served clients in Europe, the Middle East and South America. Our products are CE-, UL-, TÜV-, and ATEX-approved as well as compliant with the RoHS Directive. With a 20,000m², ISO 9001:2000-certified factory, we can turn out over 200,000 units every month. You can also put our 100 experienced engineers to work on your OEM/ODM projects. Contact us today.

Our breathalyzers meet NF, MHF and FDA standards

For breathalyzers that meet NF, MHF and FDA standards, source from us. Instead of using traditional sensors, we use electrochemical fuel-cell sensors from the UK in our alcohol testers. These reliable sensors are extremely accurate and are the choice of police officers around the world. They detect alcohol only and are unaffected by fumes, food particles, sugar and other substances often found in breath.

Each year, we create as many as 20 new alcohol, UV and breath testers and other electronic items. These devices are developed in collaboration with design houses in the US, Japan and Europe. With such R&D support, we're able to cater to the OEM/ODM requirements of buyers in various markets. Contact us today to become our next satisfied distributor.

Every aspect of our items is customizable

And undergoes an extensive QC process

When we say our headphones, earphones and other items are customizable, we mean it. Just select the model you want, and you can adjust the parameters, colors, logos, prints and even choose the packaging. To ensure you only receive high-quality, flawless products, we subject our audio accessories to an extensive QC regimen, including tension, temperature, swing, salt-spray and electroacoustic tests. And as an added assurance, we conduct pre-shipment spot checks.

Since 1997, we've been exporting our CE-, RoHS- and FCC-marked audio accessories to buyers in the Americas, Europe, the Middle East, Australia and more. Our factory is ISO 9001:2000- and ISO 14001:2004-certified and our products meet CPSIA guidelines. We also comply with GSV requirements. To join some of our big clients such as Mercedes-Benz and Virgin, contact our eight English-speaking foreign trade specialists today.

Investing in R&D to bring you 2 new models monthly

IPX8-rated MP3 player, can be worn while swimming

The key to R&D success is continuous investment. That's why we pour \$50,000 into the development of PMPs, MIDs and tablet PCs every year. As a result, our engineers – each with at least five years of experience – can create two new designs monthly. They can also develop a product according to your requirements in just 15 days. Each month, we manufacture up to 100,000 units on six production lines to fill your volume needs. Orders for 5,000 items can be delivered within 15 days. Call us now – we'll respond in less than 24 hours.

Wireless configurations gaining steam

Suppliers project output of 5 to 5.8GHz units will continue to climb in coming months.

Wireless models are gaining traction in China's A/V sender industry despite the continued dominance of wired types as makers buoy margins. The trend is also spurred by growing demand for cable-free home entertainment and high-frequency devices.

The rising popularity of the latter, in particular, is speeding up the development of 5 to 5.8GHz variants. These are forecast to account for a bigger share of suppliers' yield in future. At present, 2.4GHz A/V senders account for 50 percent of the total output of wireless types, and 5 to 5.8GHz versions 20 percent.

Soyo Technology Development Co. Ltd is cooperating with the Tsinghua University and the University of Science and Technology of China to develop 2.4 and 5.8GHz units.

The widening adoption of the Wireless Home Digital Interface standard provides additional momentum for high-frequency A/V senders.

Manufacturers such as Hunan Space Satellite Communication Co. Ltd and Gopell Smarhome are offering WHDI kinds. The former's WTD-700 model supports WHDI 1.0, HDCP 1.2, DTS, Dolby Digital and 1080p.

Meanwhile, high demand for HDMI-enabled products is driving R&D efforts in the wired A/V sender line. Makers focusing on this segment such as Hangzhou Signal Technology Co. Ltd will emphasize types that incorporate HDMI 1.4. Global shipments of devices supporting this standard will jump by 110 percent YoY to 630 million units in 2012, according to iSuppli.

Manufacturers of wired models are also underscoring multiport capability. Mainstream versions typically enable

Shenzhen Pakite's PAT-240 model boasts at least 5m transmission distance and works with DVD players, DVRs and CCD cameras.

CVBS, S-Video, YPbPr, VGA, DVI, DisplayPort and HDMI signals.

In general, makers in China forecast exports will rise by 5 to 10 percent in coming months, and some businesses even predict a 20 percent increase. Fueling this upturn is the climbing demand for A/V products such as projectors, Blu-ray players, digital set-top boxes and 3D TVs. Compared with 2010, global shipments of the last will surge by 463 percent this year to 23.4 million units before soaring to 159 million in 2015, estimates iSuppli. By the

Product performance that keeps

Our power inverters boast 100% conversion rates

We've attracted 300 repeat clients from around the globe. Why do they source from us? The answer is simple – it's our outstanding product performance. While our competitors' power inverters convert 40 to 80 percent of direct current into alternating current, ours boast 100-percent conversion rates. Results like these are possible because we use high-quality components such as power valves from Taiwan.

Our variety will help boost your sales. We offer 75 to 5,000W inverters – most of our rivals only offer models below 2,500W. Plus, alarms alert users when input voltages are too low. Soft start circuits, overload protection, polarity

reversal, connectivity to solar-powered devices and thicker aluminum housings also add to the appeal of our inverters. In our catalog, you'll also find 200 chargers, UPS, voltage regulators and antennae, as well as thermoelectric coolers and warmers.

With 500 workers manning five production lines at our 30,000m² ISO 9001:2000-certified factory, we guarantee your orders will be ready within 35 days. Our QC inspectors carry out three-step evaluations to ensure each item meets your standards. And CE, CB and RoHS Directive compliance make for easier distribution. To start distributing more efficient inverters, contact us now.

TV mounts, tablet stands

From a mounting solutions expert

Established in 1995, we are one of mainland China's leading manufacturers of wall mounts for plasma, LCD and LED TVs. But that's not all we offer clients like you. We've also developed a full line of tablet stands for Apple's iPad, Samsung's Galaxy Tab and various e-book readers. And our new desktop mount has been warmly received in our numerous markets.

Our 80 senior R&D engineers draw upon their collective expertise to design one new product every month. These are added to the over 300 products already available in our catalog. Our experienced team will also handle your OEM/ODM orders as well – give us your idea, and we'll have blueprints ready in just three days.

In 2009, we reinvested \$3 million in a new molding center. And our new \$10 million, ISO 9001:2000-certified factory, opened just this year, spans over 50,000m² and has enabled us to increase our monthly capacity to 1 million units. With all production now performed in-house, we're able to offer lead times of 30 days or less. For more information, contact us today.

Desktop mount for 10 to 24" LCD/PDP TVs and computer monitors

Tablet stand for Apple's iPad, Samsung's Galaxy Tab and various e-book readers

Our new 50,000m² factory

and desktop mounts

- Articulated mount/bracket for 37 to 55" LED/LCD TVs
- Made of cold-rolled steel
 - Ultra-slim design – 32mm between the wall and the TV
 - Fully adjustable

Molding center, with wire cutting, EDM and milling equipment as well as lathes

CNC center, with laser cutting as well as CNC bending and punching machines

Gain a larger market share

Each unit boasts a variety of value-added features

Tower speaker (TVS-307i)

- Dock for playing and charging Apple's iPod and iPhone
- 3.5mm jack, RCA, iPod/iPhone input and video output
- 1 x 5.25" woofer, 2 x 3" midrange speakers, 2 x 1" treble
- Remote control

Docking speaker for Apple's iPod, iPhone and iPad (IPA-iS8)

- FM radio with 30 preset stations
- 3.5mm audio input to connect external audio source
- Dual alarm function
- Time synchronization function
- Sleep and snooze function
- Charging function

Docking speaker for Apple's iPod and iPhone (IPA-iS5)

- FM radio with 30 preset stations
- 3.5mm audio input to connect external audio device
- Dual alarm function
- Time synchronization function
- Sleep and snooze function
- Charging function

by sourcing our sound bars

2.1-ch. sound bar with 2.4GHz wireless subwoofer (TVS-WS3)

- High-gloss finish wooden and tempered glass panels
- Coaxial (PCM), optical (PCM), RCA and 3.5mm inputs
- 1 x 6.5" woofer, 2 x 3" full range speakers and 2 x 1" treble
- LED screen
- Remote control
- Base stand included, wall-mount

To help you capture a larger share of the electronics market, we offer a variety of innovative sound bars for you to select from. Have your pick of models that boast built-in HD media players, karaoke mixers and docking stations for Apple's iPhones, iPads and iPods. Also, 2.4GHz wireless versions are available.

You will also find high-end wireless microphones, wireless tour guide systems and PA systems in our collection of more than 200 A/V products. However, if you don't find exactly what you're looking for,

we have over 30 engineers who can create a new item according to your specifications.

At our 14,000m² factory, which is manned by 300-plus experienced workers and houses advanced equipment, we manufacture 200,000 units monthly. Quality is ensured by 30 inspectors who monitor every step of the production process. All of our products bear CE, FCC and RoHS marks for facilitated distribution. Put our 10 years of OEM/ODM experience to work on your next project. Contact us today.

One of the largest manufacturers of radios in the world

- 11-band MP3/DSP radio (KK-MP804)
- FM/MW/SW (1-7) • Digital wave filtration
 - Frequency locking and tracking technology
 - Supports TF cards and USB flash drives
 - Built-in large MOS amplifier with low audio distortion
 - 240 x 130 x 82mm

- 12-band MP3/DSP radio (KK-MP2015)
- Digital wave filtration • Frequency locking and tracking technology
 - High-sensitivity FM/TV/MW/SW (1-8)
 - Supports TF cards and USB flash drives
 - Built-in large MOS amplifier with low audio distortion
 - 208 x 124 x 52mm

- 11-band MP3/DSP radio (KK-MP905)
- Digital wave filtration • Frequency locking and tracking technology
 - LCD screen • FM/MW/SW
 - Alarm, digital clock, calendar and 10- to 90-minute automatic sleep/off functions
 - 122 x 78 x 25mm

- 11-band MP3/DSP radio (KK-MP903)
- Digital wave filtration • Frequency locking and tracking technology
 - LCD screen • FM/MW/SW
 - Alarm, digital clock, calendar and 10- to 90-minute automatic sleep/off functions
 - 122 x 75 x 23mm

Multiband DSP radio with rechargeable lithium-ion battery (KK-D96L)

- Automatic turning circuit design for high-sensitivity
- High-definition large matrix display
- 40-band FM/MW/SW radio
- Digital radio chip from the US
- Adjustable AM bandwidth
- Jog dial for slow or fast station selection
- Direct frequency input function
- Scan and memory functions
- Built-in timer
- 145 x 90 x 23mm

In the radio industry, we're a production powerhouse. In fact, we are one of the largest manufacturers in the world. When you source from us, you benefit from:

- A selection of over 200 types of manual, digital and PLL radios
- 20 factories that can handle large-volume orders
- A monthly output of 3 million units
- DSP technology in our latest releases
- 185 inspectors who ensure product quality

CE FC 
 ISO 9001:2000

Gecen's GC-2G4D model boasts 100m transmission distance and supports 1Vp-p audio and video input level.

same year, sales of set-top boxes will have climbed to 219 million units from 199 million in 2010.

Worldwide revenue from Blu-ray players is expected to hit 40 million units by this year's end or an annual growth rate of 40 percent. Deliveries of front projectors, meanwhile, increased 13 percent YoY, hitting 2.1 million in 1Q11.

Key destinations Europe and North America will continue to drive demand, particularly for midrange and upscale types. At Soyo, orders from the two regions account for 70 percent, and the share is expected to climb by at least 50 percent in the months ahead. Several manufacturers are targeting emerging markets Southeast Asia, the Middle East and South America. Shenzhen

Pakite Technology Co. Ltd sends 50 percent of outbound volume to the first.

Although deliveries to these destinations comprise mostly mainstream and midrange units, high-end types are steadily gaining popularity.

Price guide: Wireless A/V senders	
Price range (per unit)	Basic features
\$8 to \$15	VHF, UHF; CVBS, S-Video, auxiliary, optical fiber, coaxial ports; 30 to 70m transmission distance; IR remote control; ABS housing
\$20 to \$40	2.4 and 5 to 5.8GHz; CVBS, S-Video, YPbPr, VGA, auxiliary, optical fiber, coaxial ports; 30 to 100m transmission distance; IR remote control; ABS, aluminum, magnesium alloy housing
Above \$40	5 to 5.8GHz; CVBS, S-Video, YPbPr, VGA, SCART, HDMI 1.3, auxiliary, optical fiber, coaxial ports; 30 to 200m transmission distance; HDCP, EDID, CEC, AES 128-bit encryption; IR remote control; OSD; ABS, aluminum, magnesium, titanium alloy housing

Our 1,200 employees turn out 600,000 assembled and SKD TUs monthly

We are trusted by partners such as Sansui

We've grown by leaps and bounds since our establishment in 2006. We now employ 1,200 staff members who work across 15 production lines, allowing us to output 600,000 TVs monthly. Our CRT, LCD and LED TVs make their way to countries in Europe, South America, Asia, the Middle East and Africa. And we complete OEM/ODM projects for big-name companies such as Sansui.

Our clients appreciate that our 20 R&D specialists – with an average of eight years' experience – can provide a prototype designed for their market in just 20 days. They also value that our items come with CCC, CQC, CB, CE, RoHS and SASO marks for easy importation. We also offer SKD services. And we have 80 QC technicians overseeing all production processes, so you can put your quality concerns to rest. Visit our Global Sources Online showroom today.

Get blank discs, cases and sleeves from the same supplier

Capacity of 20 million units monthly

Double layer DVD±Rs, DVD-Rs, BD-Rs and CD-Rs with spindle cases

Sourcing materials for storing and packaging music and videos just got a lot easier. We'll provide you with double layer DVD±Rs, BD-Rs, CD-Rs and DVD-Rs with the cases, sleeves and spindles that your customers are looking for. And they'll appreciate the durability of our items, which are made out of plastic sourced from Japan.

Our monthly capacity is 20 million units. This large figure is possible because we've sourced computer-controlled production lines from Germany's Singulus Technologies and hired engineers from Taiwan and Hong Kong to operate them.

To ensure the level of quality demanded by international markets, we conduct spot checks on all of our products both manually and with automatic testing machines. For discs and packaging solutions that help you save time, contact us today.

We also offer Blu-ray disc, 7/14mm DVD, 5.2/10.4mm CD and double-disc cases

20 new items every

Mounts made to handle 3 times the rated load

Mounts, stands and much more

When we manufacture products, we don't just make them to meet your requirements – we make them to surpass them. Our dedication is on display when you view our latest line of TV wall mounts. We test our products to ensure they are able to safely support three times the weight of their rated load. Besides mounts, we also offer stands and accessories for TVs and other A/V equipment. Every six months, our team of designers creates 20 new items to choose from.

220-item product range

Choose from 220 types of products spanning across five product categories. We are able to finish orders within 30 days. In fact, we possess a 22,000m² facility with eight workshops for stamping, plastic injection molding, aluminum die-casting, hardware, welding, powder coating, assembly and tooling. Customized requests are accepted, and samples take one to two weeks. For more information on our products, go to our Global Sources Online showroom today.

We've been a professional manufacturer of audio products for 16 years

Our monthly production capacity is 600,000 units

Established in 1995, we are a professional manufacturer of audio products in mainland China. We – Leetac – possess sufficient R&D capabilities, strong production capacities and refined QC systems. Our collection features radios, stereo music centers and DVD players. And as an MFi licensee, we can offer docking stations for Apple's iPhone/iPad.

Backed by the 50 skilled engineers and 2,000 staff working at our 40,000m² factory, we are dedicated to serving our customers in a timely manner. For maximum efficiency, we utilize advanced production equipment, including injection-molding, SMT and AI/IC bonding machines.

As a result, we're able to turn out 600,000 units from our 10 production lines monthly.

All of our products meet global standards for hassle-free distribution throughout major chain stores and retailers in the US and the EU. Our goods are compliant with the RoHS and REACH Directives, as well as come with UL, FCC, EMC, CE and other marks.

Let us offer you our one-stop services from the design stages to final shipment. We are also capable of handling your OEM/ODM projects. Don't hesitate to contact us today.

DSE 601

DSE 701

DSE 901

DSE 901 PCC

Just how fast do we work? When you place an order for 2,000 electronic cigarettes, we'll have it completed and shipped in just seven days. This speed is thanks in part to our four factories, with a monthly capacity of 40,000 electronic cigarettes and 1 million smoke cartridges. Add to that a network of 150 material suppliers, and you know why we're so efficient.

Our speedy delivery doesn't come at the expense of quality. We have 16 inspectors who carry out an eight-step QC regimen according to ISO 9001:2000 standards. Plus, we subject our products to electrical tests to make sure each unit is fit to bear CE and RoHS marks. We release two new models each month and have designers ready to work with you on your specifications. E-mail us now.

Keep ahead with help from R&D centers in Silicon Valley, Beijing and Hong Kong

RadioShack, Otto and Carrefour source from us

Bringing you the latest designs

Only cutting-edge designs will sell in your market. To keep up with industry trends, we attend trade shows such as the International Consumer Electronics Show in Las Vegas and IFA in Berlin. Our R&D centers in Silicon Valley, Beijing and Hong Kong help us stay ahead of the competition. We develop at least 10 new items for the OEM market annually.

The choice of big buyers

Every year, we do more than \$20 million worth of business with big retailers and OEMs worldwide. As one of mainland China's top 100 export enterprises, we've served an impressive roster of clients, including RadioShack, Otto, Kmart and Carrefour. You can count on us too.

LCD panels from Taiwan

In line with the FCC's 2007 requirements, we offer TVs with digital ATSC tuners for buyers in the US. Our TVs are also available with DVB-T tuners that are suitable for buyers in Europe. We also use LCD panels from Taiwan for clearer picture quality.

Samples in a week

Our R&D staff is ready for your OEM projects. We'll have samples ready to ship in one week. E-mail us today with your retail-ready and custom order inquiries.

- LED backlight

Wired & wireless variants offered

Wired A/V senders, which account for 70 percent of overall yield, support CVBS, DVI, DisplayPort, VGA, S-Video, YPbPr and HDMI. They deliver VGA to 1080p resolution and come with manual control and IR remote. Smart switch function is incorporated.

The HD04CT01 model from Hangzhou Signal converts A/V input to HDMI output. It can charge handheld devices via two built-in USB 2.0 ports.

Entry-level types, which are priced from \$2 to \$10, account for 40 percent of output in this category. These units come with auxiliary, optical fiber, coaxial, CVBS, S-Video, YPbPr and VGA ports, and use ABS housing.

Midrange products have DVI, DisplayPort and HDMI 1.3 ports on top of those available in low-end alternatives. They feature smart switch function and list between \$15 and \$35.

Upscale variants, which represent 10 percent of total wired A/V sender yield, add SCART and HDMI 1.4 ports to the standards supported by the other types. Such releases deliver higher bandwidth with low power consumption and have locking function besides smart switch. The IR remote control boasts learning capability. Quotes exceed \$35.

For wireless A/V senders, there are VHF, UHF, and 2.4, 5 and 5.8GHz configurations. Prices are usually determined by the operating distance.

Mainstream models adopt 2.4GHz and have auxiliary, optical fiber, coaxial, CVBS, S-Video, YPbPr and VGA ports, and IR

continued on page 186 ►

Taiwan

Growing user base spurs burgeoning line

Taiwan's A/V sender suppliers are taking advantage of the product's broadening adoption in home and office electronics to stimulate the line. Buoyed by the rising popularity of Internet TVs, the category finds widening application in set-top boxes, PCs, TVs, game consoles, projectors, satellite receivers, and DVD and Blu-ray players. Aside from enabling video streaming, online gaming and data sharing, units can work with keyboards and mice for switching operations between PCs and TVs.

Selections from the island support HDMI, and 2.4 and 5GHz for wireless transmission. The first is adopted to enable connection to TVs or computers. Power line communication is employed for wired network connectivity.

Media boxes incorporating the Android platform are also becoming popular. These units allow 802.11n and Ethernet 10/100 or 10/100/1,000Mbps.

Models likewise support various video formats such as MPEG-1/2/4, H.264, RM, RMVB and VC-1. In addition to VGA, 3D resolution at 1280x720 pixels at 120Hz is permitted in some variants.

USB ports and memory card slots, mostly for SD and SDHC, are incorporated for data expansion.

Taiwan's manufacture pool consists of 10 to 20 players, mostly small and midsize operations.

Don't settle for duplications

We offer 20 new items monthly

To ensure your options never get outdated, our R&D engineers design 20 new remote control duplicators every month. And to guarantee our products contain the latest technology, we also conceive two to three new software programs in the same period. Our engineers can work with you in English to design a customized prototype which can be ready in as few as seven days.

With chips sourced from the US and Japan, raw components acquired from 30 different suppliers, and a QC team of 20 experts, we can control the quality of our products effectively. All of our items come with one-year warranties, and should you encounter any problems, we promise to offer a solution within two days. We can output 150,000 remote control duplicators each month and our minimum order requirement is 500 pieces. To get started, contact us today.

Multi-frequency remote control duplicator

- 5 keys, equivalent to at least 2 ordinary remotes
- Each key supports up to 10 different frequencies
- Auto-learning, copies fixed codes in seconds

Fixed/adjustable frequency remote control duplicator

Remote control receiver kit

Over 100 new products added to our 1,000-item catalog last year

Design better OEM/ODM products with over 25 R&D staff

- EAT2-112
Full-motion wall bracket for 13 to 23" LED and LCD TVs and screens
- Tilt: -15 to +15 degrees
 - Horizontal swivel: 180 degrees
 - Pivot: 360 degrees
 - Meets VESA 75 and 100 standards
 - Profile: 97 to 417mm
 - Load capacity: 15kg

Wondering how to start your next project? Bring your bright ideas to our experienced team of over 25 R&D technicians, and we'll help realize the perfect OEM/ODM product for your market. Each of our technicians has at least eight years of experience creating stand-out designs based on custom requests for color, material and shape. You'll be impressed when you browse the over 100 new LCD wall mounts, LED TV brackets, TV stands, DVD brackets and projector brackets we released last year. Choose from these or 1,000 other items in our catalog.

Established in 2004, we've grown quickly. Despite the difficult global financial climate, our export sales still reached \$45 million in 2010 – a 15 percent increase over 2009. We've been able to produce brackets confidently thanks to our 20,000m² factory, which is equipped with over 30 sets of punching machines that reach a force of 200 tons.

Besides meeting standards such as UL and GS, we also ensure quality by conducting all molding in-house. Contact us today.

- Glass and wood TV stand for up to 55" LED, LCD and Plasma TVs
- 10mm special arc black tempered glass
 - Includes 2 wood doors
 - Size: (L) 1,400 x (W) 400 x (H) 480mm
 - Load capacity: 50kg

UPS and DC to AC inverters/switching battery chargers that supply 5,000W of uninterrupted power

Quality components keep our defect rates under 0.1 percent

- DC to AC modified sine wave power inverter
- Output: 300/600/1,000/1,500/2,000/2,500/3,000/5,000W
- Emergency backup power supply
- Switching battery charger
- AC output voltage: 220/230/240V
- DC input voltage: 10-15V
- With soft start, cooling fan and overload and short-circuit protection
- CE and RoHS marks

We utilize 27 years of experience to manufacture green and renewable energy products. Our featured item is a DC to AC modified sine wave power inverter and switching battery charger with soft start and overload/short-circuit protection. This device has a continuous power output of up to 5,000 watts, and a backup power supply system that ensures power won't be interrupted. Plus, this product bears RoHS and CE marks for smooth distribution into international markets.

To keep our defect rate under 0.1 percent, we manufacture our products with components sourced from Japan and Taiwan. Our ISO 9001:2008-certified factory in Taiwan can turn out up to 120,000 units monthly. This production capacity ensures that your large-volume OEM/ODM orders are delivered within a month. You can also order our highly regarded Genius Power-branded items, which are ready for immediate delivery.

As a result of our commitment to innovation, we're now the top Taiwan-based exporter of inverters to Japan. Start sourcing from a major supplier in the solar UPS and inverter industry. Contact us today.

Outdoor solar power UPS, available in 150 and 400W models

Modified sine wave power inverter

- Output: 3,000, 4,000, 5,000 and 6,000W models
- AC output voltage: 110, 120, 130, 220, 230 or 240V

Switching battery charger

- Available in 5, 10, 15, 20 and 25A DC charging currents
- Fully insulated clamps
- AC input voltage: 110, 120, 130, 220, 230 or 240V

Outdoor solar power UPS, available in 150 and 400W models

UPS for homes and offices

- Available in 800, 1,600, 2,400, 4,000, 6,000 and 8,000W models
- AC output voltage: 100, 120, 220, 230 or 240V

Portable solar power station

- Available in 12V DC 150/400W models
- AC output voltage: 100, 120, 220, 230 or 240V
- Internal battery capacity: 17.8Ah (400A surge current)

Movable DC and AC solar power system

- Net weight: 45kg
- Maximum power: 1,500W
- 492 x 362 x 515mm
- External battery connections for additional capacity

We make TVs and digital

- FHD LCD TV (SPJ88)
- Smart/Internet/hi-fi/Blu-ray/DVD player combo
 - USB port and SD card slot

- Ultra-slim FHD LED TV (SPS88)
- Low power consumption
 - Optional borderless screen
 - USB port and SD card slot

With over 18 years of experience exporting to various international markets, we have the know-how to meet your country's import requirements. We manufacture LCD/LED/PDP/CRT TVs and monitors, tablet PCs, mobile Internet devices, 2-D and 3-D advertising players and digital multimedia products. And each of our devices carries CE, CB, CSA, ETL, SAA, FCC and SASO certifications to ensure smooth distribution in your market. That's why satisfied buyers in North America, Europe, Australia, the Middle East, Southeast Asia and Africa choose to work with us.

Operations at our 20,000m² factory are ISO 9001:2008-certified to bring you consistent quality no matter how many TVs or monitors you order. Our diligent team sees to it that QC standards are maintained by inspecting each unit at every stage – from parts procurement to packing of finished goods. See the quality of our products for yourself – samples will be sent to you in only 10 days and full orders will be delivered in 25 days. We have no problem meeting your volume needs either, with our monthly capacity of 120,000 units. SKD and CKD orders are available. To take advantage of our international certifications and quality focus, call us today.

Over a decade of experience in digital set-top boxes

We have models for nearly every market worldwide

Two new models monthly

Work with us to benefit from our 10-plus years of experience in manufacturing DVB set-top boxes. Our 110-member R&D team has just developed a range of new models that are ready for test-marketing in various regions worldwide. In fact, we add two selections to our collection every month. We are also offering pay-TV set-top boxes, striving to become one of the top suppliers of digital TV equipment and solutions.

Subjected to a myriad of tests

To meet the strict requirements of discerning markets, we check our devices according to AQLs of

0.5 and 1.0. In addition to subjecting completed units to vibration- and impact-resistance tests, we also put them through sensitivity analyses for optimal performance. And with 11 SMT machines and over 1,100 workers, we can turn out 800,000 units monthly. Accordingly, we can have volume orders ready for shipment in as fast as 25 days.

On-location technical support

We also provide on-location technical support such as field testing, software debugging and more. For more information on our products and services, contact us today.

IV2XX Full HD IP set-top box

HD multimedia players for your selection

Unparalleled R&D power

Are you looking for a supplier with the variety and R&D power to keep you updated? If so, we're the one for you. Founded in 1999, we offer a catalog featuring more than 150 set-top boxes and HD multimedia players to choose from – a range that expands with three new additions weekly. Such a huge selection is made possible by our cooperation with ALi, Mstar, Realtek, Sunplus, Cheertek, Amlogic, NEC, Sony and MTK, plus the efforts of our 100 engineers. Our resources also allow us to provide extensive product develop-

ment support. We can have an entirely new design ready for production in 30 days or less.

Large capacity

In our modern industrial zone, we have a 25,000m² ISO 9001:2000-certified factory. This facility houses 1,800 skilled employees, 28 SMT machines and 20 assembly lines that allow for a monthly capacity of 500,000 units. This manufacturing power ensures your volume OEM/ODM orders can be shipped within a month. Contact our sales team today to learn more.

Electronics & Components
China Sourcing Fair

Hong Kong
April 12-15, 2012
Booth No. 7K27

Verified supplier
★★★★★

The HD04CT01 model from Hangzhou Signal has A/V, VGA, S-Video, HDMI and USB 2.0 ports.

remote control. The transmission range is 30 to 100m.

VHF and UHF varieties, which belong to the low end, work between 30 and 70m and go for \$8 to \$15. These incorporate auxiliary, optical fiber, coaxial, CVBS and S-Video ports. The typical housing is ABS.

Considered midrange units, 2.4 and 5.8GHz models have YPbPr and VGA ports on top of those available in entry-level types. Similar to the latter, these varieties are encased in ABS. The operating distance, however, can extend to 100m. Quotes range from \$20 to \$40.

High-end releases are typically 5 to 5.8GHz versions that can function up to 200m. Priced above \$40, these incorporate

SCART and HDMI 1.3 ports besides those already found in the other two categories. Many units support OSD, HDCP, EDID and AES. The housing may be in ABS or metal alloy.

Upscale versions represent 40 percent of wireless A/V sender yield at Shenzhen Pakite. The supplier's PAT-530 5.8GHz model connects to DVD players, set-top boxes, IPTVs and CCD cameras.

Wireless chips, MCUs and transmitter are the key components in production, taking up 60 percent of the total outlay. The last two are sourced from foreign providers ADI, Freescale, Intersil, Pericom and Silicon Image.

Makers turn to Amicom, Broadcom and Nordic for 2.4 and 5.8GHz and WHDI ICs.

Prices are forecast to remain at current levels in the months ahead, thanks to stable input costs. Some suppliers even anticipate a 5 percent drop in quotes amid stiff competition.

Hi-fi digital wireless headset

2.4GHz wireless headphones for PCs/TUs/notebooks

Look to us for a complete range of wireless audio solutions that operate on the 2.4GHz frequency. Our products include:

- Wireless headphones
- Wireless microphones
- Wireless audio transceivers
- Wireless speakers

Our 12 engineers – with an average of 10 years of experience each – develop five to six innovative products monthly. The headphones shown here, for example, are patented in mainland China. Start with an order for less than 100 units for any of these items. OEM/ODM orders are also welcome. To find out more, contact us today.

Licensed to manufacture HDMI cables

In-house PVC production to control your quality and costs

We are one of the few mainland China-based producers that are licensed to produce HDMI® goods. We run our own factory for PVC production to help control quality from the onset and eliminate outsourcing costs from your invoice. The \$500,000 worth of electronics accessories that we produce monthly is mainly distributed throughout Europe and the Americas.

We have eight years of exporting experience, and know how critical a timely delivery can be to your business. So when you source from our range of 3,000-plus HDMI, A/V and computer cables and accessories, we'll make sure your full order is in transit in 25 to 30 days. And when you request an OEM/ODM sample, you'll receive it in as few as 15 days. Inquire today.

HDMI splitter, distributes 1 HDMI source to 4 HDMI displays

Our products include:

- HDMI/DVI cables and connectors
- HDMI devices
- A/V cables and connectors
- Computer cables and accessories
- Satellite/CATV/SMATV accessories
- Speaker and microphone cables

TV wall mounts with design patents in mainland China

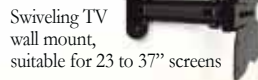

Plasma/LCD TV wall mount, loading capacity: 110lbs/50kg

Our UL-listed TV wall mounts can fit 10- to 104-inch screens and have a loading capacity of 40 to 400 pounds. Clients in the Americas and Asia appreciate this selection because, unlike manufacturers who build TV wall mounts from steel or iron, ours are made of lightweight aluminum. Our strong R&D ability has won most of our products design patents in mainland China. We also develop two new items monthly, and can finish OEM/ODM samples in three days. Inquire now.

A new 20,000m² factory ready for your custom DJ equipment orders

DJ mixer with dual CD players (CDT-1012)

Portable sound system with docking station for Apple's iPhone and iPod (PS003)

Leading DJ equipment and electronics retailers in the US, Germany and Holland have been sourcing from us for the past 10 years. One reason is our volume capabilities – we have a new 20,000m² factory to accommodate custom orders for mixer amplifiers, MIDI controllers, turntables, dimmers and more. R&D strength is another reason – besides handling complex OEM requirements, our 20 engineers develop 60 new models annually. All of our devices carry CE, RoHS, TÜV and UL marks. Inquire now.

Up to 10 new models released monthly

Thanks to a team of over 40 engineers

With over 40 engineers – averaging five years of industry experience – and an in-house molding workshop, we add up to 10 new models monthly to our selection of DVB receivers and set-top boxes. Our three factories, covering a total area of 15,000m², boast seven production lines and employ 500 workers. With these resources, we produce up to 100,000 units each month.

We currently export our products to the Americas, Europe, Asia, Africa and the Middle East. Thanks to our team of 50 QC inspectors, we ensure every finished product is fit to bear CE, RoHS, FCC and CCC marks. All of our items also come with one-year warranties. Our minimum order requirement is 2,000 pieces, and delivery is as fast as 15 days. Contact us now to learn more.

- HD DVB-S2 receiver (S10)

Full HD LCD TV

We've been manufacturing LCD TVs and TV components – including tuners and mainboards – for over 10 years. We specialize in OEM and SKD orders. Our main materials come from TI, Sanyo, Toshiba, Philips, CMO and LG, while the rest are obtained from trusted suppliers in mainland China. The software for our LCD TV boards is developed and kept up-to-date by our own engineers, and we produce all of our boards in-house. Our factory follows ISO 9001:2000, ISO 14000:2004 and 5S management systems, and our products meet UL and CE standards. Contact us today.

Stereo amplifier (AD-3/AD-3D)

- Class A circuitry
- Eight pairs of Japan-made hi-fi transistors on each channel
- 4-bit/192kHz DAC chip
- Distortion: 0.02% (1kHz)

7.1-ch. A/V processor (AD-7100HD/7100PA)

- 5 HDMI 1.3 inputs and 1 output
- Dolby digital and DTS decoding
- Upscaling function
- Automatic room equalization system
- OSD menu

Power amplifier (PS-200)

- Distortion: <0.1% • S/N ratio: >90dB (A weighted)
- Frequency response: 20Hz-48kHz
- Mic gain: >65dB • Impedance: 600 ohms/10k ohms
- Output: 340W (4 ohms), 200W (8 ohms)

12 years' OEM/ODM experience

Reinforced by R&D partnerships with industry leaders

Whether it's for your existing market or expansion into other areas, we can easily put together an A/V package tailored to your needs. Our 12 years of OEM/ODM experience and R&D partnerships with leading electronics companies provide us with the platform to do so. Our design program is further reinforced by licensed technology from Dolby Labs and DTS.

Our current catalog includes A/V amplifiers, home theater systems, hi-fi amplifiers and speakers, PA systems, car amplifiers and karaoke players. Filling your volume orders for any of these devices isn't a problem since we turn out 55,000 units each month to ensure your production base is covered.

To benefit from our strong R&D capabilities as buyers in North America, Europe and Australia have, send us your OEM/ODM requirements today.

13 years of experience as a home electronics manufacturer

Established in 1998, we specialize in the development and manufacture of A/V transmitters and receivers, set-top boxes, LNBs, network media players, satellite antennas and other home TV electronics. In 2010, our R&D team developed a wireless HD transmitter and receiver that is popular among our clients all around the world. And a plug-and-play feature makes it perfect for home theater entertainment systems.

With over 100 engineers, we are more than capable of backing your OEM/ODM projects. Plus, the 370 skilled workers at our two factories will ensure that the processing of your order goes smoothly. To ensure hassle-free distribution, our products come with CE, FCC and RoHS marks. Contact us now for more information.

Global Sources Verified Supplier ★★★★★

One of the first MHL™ cable manufacturers in mainland China

We have over 100 series of cables for your selection, and we develop an additional 10 new items monthly. Our 20 R&D designers, each with at least eight years' experience, work closely with our 30 engineers to ensure each month's new batch of models can satisfy the current market demand. And it's hard to doubt their expertise, with buyers from the US, Germany, the UK and over 25 other countries and regions sourcing our products. They'll also take on your OEM and ODM projects, with samples in just one week if new molds are not required.

Our MHL cables allow mobile phones to connect directly to HDTVs and other entertainment products without using an adapter. Our cables feature complete 1080p support, and include a silicon image chip for crisp and clear audio and video performance.

ISO 9001:2000-certified, we use advanced testing equipment from the US and Germany, and also source key components and raw materials from Taiwan and the US, ensuring precise and stable products. We make all cables, cable assemblies and packaging materials in-house to further control quality. We hold all finished goods in our warehouse for one week to provide ample testing opportunities for our QC team, each member of which has over 10 years' experience with cables.

Contact us today – we respond to inquiries within 24 hours.

MHL cable, for use with the following products:

- Samsung Galaxy S II phone
- Samsung Infuse 4G phone (bundled with an MHL to HDMI® adapter)
- HTC Evo 3D phone
- HTC Flyer tablet
- HTC Sensation phone

Super-slim HDMI® cables with ABS housing

- HDMI® Ethernet channel
- Audio return channel
- 3-D over HDMI®
- 4 x 2K resolution support
- Expanded support for color spaces

PRODUCT GALLERY

A selection of A/V senders from mainland China & Taiwan

Finder Electronics Co. Ltd (mainland China)

Model: AV-T206

Description: 2.4GHz wireless; CVBS; 100m transmission distance; 10dBm transmission power; -90dBm receiver sensitivity; 1Vp-p/75ohm video, 1.5Vrms/47kohm audio impedance; 100 to 240VAC, 5VDC 1A adapter power supply

Finder Electronics Co. Ltd (mainland China)

Model: HD-T001

Description: 5.1 to 5.9GHz wireless; HDMI; 30m transmission distance; 1080p/i, 720p, 576p, 480p, 640x480, 800x600, 1024x768, 1280x1024 pixels; PCM, DTS, Dolby Digital; <1ms image delay; 12dBm maximum transmission power

Gecen Electronic Co. Ltd (mainland China)

Model: GC-2G4D

Description: 2.4GHz wireless; CVBS; 1Vp-p audio, video input level; 100m transmission distance; 10dBm transmission power; -85dBm minimum receiver sensitivity; ±100kHz frequency stability; four channels; PAL/NTSC, stereo audio

Gecen Electronic Co. Ltd (mainland China)

Model: GC-5G8B

Description: 5.8GHz wireless; CVBS; 1Vp-p typical video, audio input level; 17dBm transmission power; -85dBm minimum receiver sensitivity; ±100kHz frequency stability; eight channels; PAL/NTSC; 500mA current consumption; 433.92MHz IR control radio return feature; 9V voltage; compatible with camcorders, CMOS cameras

Good Mind Industries Co. Ltd (Taiwan)

Model: PowerLine HD AV Sender

Description: HDMI, YPbPr, S-Video, CVBS; H.264; 1920x1080 pixels at 60i/50i/23.98p/24p; QOS, 200Mbps rate HomePlug AV PLC technology, powerline Ethernet bridge; transmitter works with multiple receivers simultaneously; video source remote control

Hangzhou Signal Technology Co. Ltd (mainland China)

Model: HD04CT01

Description: Wired; HDMI; A/V, VGA, S-Video, R/L analog; 720p 60Hz HDMI output; 800x600, 1024x768 pixels at 60 and 75Hz, 1280x720, 1280x768, 1280x960, 1280x1024 at 60Hz; USB 2.0 charging; PAL/NTSC; 3.5mm stereo mini-jack audio input port

55" all-in-one PC TVs with multi-touch LCD/LED screens

We produce 15 to 55 inch all-in-one LCD/LED PC/TUs

We manufacture all-in-one PC TVs that boast 15- to 55-inch screens. You can rest assured that our products are made to the highest standards because we hire managers to implement the same type of quality control systems used by consumer electronic companies from Japan. In fact, we have 10 QC inspectors on every production line. We have achieved ISO 9001:2000 and ISO 14001:2004 certifications and have a monthly output of 20,000 units. Major electronics manufacturers, including Panasonic, Hisense and Konka bring their OEM/ODM projects to us. Why not join them by sourcing from us? Contact us today.

Serving your OEM, ODM and EMS needs for 32 years

Printed circuit board assembly

Fuji SMT line

At Daiwa, we take pride in a tradition of quality and innovation that stretches back to 1978. For 32 years, we've been providing OEM, ODM and electronic manufacturing services, as well as helping our clients maintain their competitive edge in the market. In fact, we can also offer product solution services such as developing applications for Apple phones and PMPs. And we're pleased to say that over 95 percent of our sales come from repeat orders from satisfied clients in Japan, the US and Europe.

We cater to small and big businesses alike, and offer services for consumer electronics, automobile accessories and industrial equipment. Our three factories in mainland China have a total area of 40,000m² and are equipped with production facilities and machinery valued at \$12 million. These include advanced clean rooms, anti-static assembly workshops, SMD lines and machinery from Samsung, Sony, Teledyne, Yamaha and other renowned brands.

To discuss your sourcing needs, contact us today. Our customer representatives, who are fluent in English, Japanese and Mandarin, are ready to take your inquiries.

Global Sources Verified Supplier ★★★★★

iPod and iPhone are trademarks of Apple Inc.

Our factory in Yantian, mainland China

R&D on accessories for Apple's iPod

10 QC and 2 QA specialists on each production line ensure the quality of our TVs

For quality you can count on, partner with us. Our factory is ISO 9001:2000- and ISO 14001:2004-certified, and operates under an ERP management system. We station 10 QC and two QA specialists on each production line to inspect every TV as it is manufactured. And we subject our TVs to drop tests and other evaluations that our competitors rarely do. As a result, our acceptance rate is 99 percent. All of our products come with CE, RoHS, FCC, CB, UL and CCC marks and are backed by two-year warranties.

Start with an order for 200 units, and we'll have it delivered to you in 30 days. But our commitment to you doesn't stop here. You'll also benefit from extensive aftersales services from our foreign trade staff. Each team member has at least four years of experience and is proficient in English. Contact us today.

Two-port KM link cables for data bridging between computers

More and more consumers own two or more computers. Our featured two-port KM switch cable allows user control of two computers and associated display screens by using a mouse or keyboard via USB connection. Compatible with Microsoft's Windows and Apple's Mac operating systems, this product has plug-and-play compatibility for ease-of-use. It includes file transfer and clipboard sharing features for PCs, enabling you to simply drag files from one PC to another without a portable storage device.

Let us work with you on your new OEM/ODM projects. We use the latest CAD/CAM software to create new items seasonally for production in our mainland China facilities. And, to ensure a high acceptance rate, our products are tested on-site at multiple stages. Contact us today to find out more.

Established in 2000, LVSUN is a high-tech enterprise that focuses on innovation, quality and customer service. Our three production bases in Shenzhen – LVSUN Electronics, LVSUN Optoelectronics and LVSUN New Energy – cover a total area of more than 20,000m². As a result, we have a manufacturing capacity that is sure to meet your power bank needs.

Our specialty is the production of high-capacity power banks that are just 11 millimeters thin, as well as laptop AC adapters, Li-ion batteries, waterproof LED drivers, digital camera and camcorder chargers and more. Our smart chargers automatically detect the device being charged, resulting in maximum charging efficiency. We are ISO 9001:2008-certified and implement an ERP management system. All our products are lead-free and comply with the WEEE and RoHS Directives. To ease importation into your market, we also hold many other quality certifications.

With over 10 years' experience behind us, we've assembled a team of first-class R&D engineers. We are also equipped with a variety of specialized testing devices and have gained hundreds of patents in both mainland China and around the world. Our adherence to the concept of putting customers first and focusing on market demands ensures our clients receive not only innovative products but also outstanding services. To find out more, inquire now.

We offer:

- HD/SD DVB-T and DVB-T2 terrestrial receivers
- HD/SD DVB-S and DVB-S2 satellite receivers
- DVB-S radios and TV receivers
- HD/SD DVB-C and DVB-C2 cable receivers
- DVB STB and DVD/Blu-ray player combo sets
- DVB STBs with Ethernet/Wi-Fi connectivity

Gain the benefits of working with a pioneer in the STB industry

As a pioneer in the STB industry, you can gain many advantages by working with us. Thanks to our modern production facility located in Turkey, we can distribute our devices in the EU without paying customs duty – resulting in savings of 14 percent. As a result, we can offer you more competitively priced set-top boxes. We utilize automatic SMT and wave soldering machines from the US for precise, efficient and cost effective manufacturing.

Not only are our products examined by SGS, but we also conduct temperature, aging and drop tests at our ISO 9001:2008-certified factory. These measures ensure we maintain a defect rate that's nearly zero percent. We always send you 1 percent more of your order for free to cover any defective items. Plus, we offer two-year warranties and comprehensive aftersales support.

We sell our devices under our Numeriqs brand name. Our R&D engineers, who have trained in Germany and Italy, utilize over 10 years of experience to work on your orders. As proof of our success, we ship up to 1.7 million patented units to clients in Europe every year. We have offices in the Netherlands and Turkey. For more information, call us now.

10W HID rechargeable torch

Ensuring quality by conducting 3 more QC steps than the competition

- Wireless game controllers for Sony's PlayStation 2
- Dual vibrating motors
 - 2.4GHz models available, ≥10m operating distance

We never overlook quality. At the very least, we place two inspectors at each production line to conduct eight-step QC procedures – most competitors only carry out five-step tests. These measures ensure the 250,000 video game accessories and PC peripherals we manufacture monthly are fit to bear CE marks. All of our products come with one-year warranties. Not only can our R&D team develop up to three new products every month, but they can create custom samples for you in 30 days. Contact our English- and Spanish-speaking representatives today.

16 years of experience producing cables

Choose from 10 new cable accessories each month, or let our 30 engineers customize something for you in just three to five days. During our 16 years of cable production, buyers in Europe, the US and Southeast Asia have been benefiting from our R&D abilities.

Our export experience means that we're in touch with a wide variety of markets and their consumer trends. And the CE, GS, VDE and UL approvals that our products carry mean you won't have any worries about regulatory compliance.

We supply more than \$260,000 worth of items each month. Our ISO 9001:2000-certified facilities contain five production lines for cables, two for jacks and plug adapters, and two for SCART cables and boxes. Orders take 30 days. Inquire today.

Our products include:

- A/V cables with connectors
- AC plugs and AC extension cables
- RCA plugs, jacks and pin plugs
- Banana plugs and binding posts
- A/V adapters
- USB, OFC and SCART computer cables with connectors
- Telephone/communication cables with connectors
- TV plugs and splitters
- Audio plugs, DC plugs and DC jacks
- Networking tools
- Indoor antenna amplifiers

200-plus game console accessories, plus 10 new items monthly

Steering wheel for Sony's PlayStation 3

No matter what game console – Sony's PlayStation 2/3/Move, Nintendo's Wii/DS/DS Lite/DSi/Game Boy or Microsoft's Xbox/Xbox 360 – you're sure to find a matching accessory in our catalog of over 200 items. Our eight visionary designers are continually looking for ways to take your customer's gaming experiences to the next level, and they do this by creating 10 new products every month. If you have better ideas about what buyers in your market want, send them to us, and our R&D team will turn your ODM products around in just 20 days, complete with your choice of packaging.

Each month, we produce up to 50,000 units to cater to your high-volume needs. We'll deliver orders for 1,000 units in as fast as one week. And all of our accessories are shipped bearing CE, FCC, UL and RoHS marks.

To join our list of 100 buyers in benefiting from our wide selection, talk to our 15 sales representatives today.

OEM services for companies such as Velleman

Our products are checked for quality by independent laboratories

Sourcing circuit boards for your next electronics project? Whether it's a bare PCB, SMT, through-hole or cable assembly – or a turnkey solution – our ISO 9001:2000-certified facilities can deliver to your precise needs. We're an EMS provider with 15 years of experience. OEM/ODM orders are our specialty, and we've completed them for internationally recognized companies such as Velleman.

Design, component sourcing, testing, packaging – we do it all in just four to six weeks. Or, provide us with your component list for three-week lead times. We use imported machinery from HP to test our products, and even carry out QC at independent laboratories upon request to ensure quality. To place an order for 500 units or more, contact us today.

HDMI and optical cable assemblies for digital video and audio formats

Our feature-packed HDMI 1.4 cables are ready for your market

As a certified HDMI Adopter, we're your one-stop solution for HDMI cables and assemblies. We've already provided OEM/ODM services for buyers worldwide. Our collection includes the latest market-ready 1.4 specification, which is packed with features including:

- Audio return channel function that eliminates the need for additional audio cables, as it allows TVs to send audio data upstream to a surround sound system
- Supports Ethernet connections and 3-D content to offer your customers optimal gaming and home theater experiences
- Supports video resolutions that are four times that of 1080p displays

With us, a USB-IF member, you'll also find USB 3.0 cables. Additionally, we supply powerful travel packs, DisplayPort to HDMI converters, DisplayPort to VGA converters and accessories for Apple's iPod, iPhone and iPad devices. We also offer video game peripherals. Our monthly output of 2 million cables and assemblies enables us to fill volume orders quickly. A stringent QC system, coupled with 20 years of manufacturing experience, ensures defect-free, high-performance products. More than 100 QC personnel perform inspections using Agilent and TEK equipment, as well as X-ray fluorescence analyzers and other advanced machines. Inquire today.

Sourcing materials from reliable suppliers for over 10 years

We offer 24-hour customer service support

Line interactive pure sine wave UPS (SLP)

Offline LED UPS (PCF)

High-frequency online UPS devices with LCDs (SKG)

You should never have to question the reliability of the power supplies you source from us. To ensure the quality levels you demand, we station five QC specialists at each of our 20 production lines. We also cooperate with 500 materials suppliers, some for over 10 years, to find top-grade components. To further put your quality concerns to rest, we offer one-year warranties.

An annual investment of 8.4 percent of our turnover in R&D enables us to meet your customization needs. Our 73 English-speaking engineers, some of whom have worked for Emerson and Eaton, understand what discerning markets require. That's why they can finish a product designed to your specifications within 25 days.

We've furnished our three factories with automated equipment from Mitsubishi. Accordingly, our 3,600-member team is able to manufacture 30,000 UPS devices, 20,000 inverters and 60,000 stabilizers each month. Since our start in 1993, we've accumulated more than 800 clients in the Middle East, Europe and South America. Our 125 customer service representatives are available 24 hours a day. Join buyers, such as APC, Foxconn and Dell, by inquiring today.

One-of-a-kind products that will impress and sell well

Take a look at our collection, and you'll only find one-of-a-kind products. In fact, our designs are so different that they've made Forbes' list of the "World's Coolest Gadgets" and were honored at the 2007 CES Innovations Awards. And, as an Apple MFi licensee, we offer speakers and other accessories for Apple's iPhone and iPod.

Place an order with us, and start offering award-winning items in your market. For more information on how you can benefit from our products and services, inquire today.

Let our engineers work on your MID and power bank projects

Power bank with 4,000mAh cell capacity

Li-polymer power bank with 2,000mAh cell capacity

- Ultra slim 7" MID
- 8.8mm thick
 - Capacitive touch screen
 - HD 1080p viewing capabilities
 - Supports e-book formats
 - CE and FCC-certified

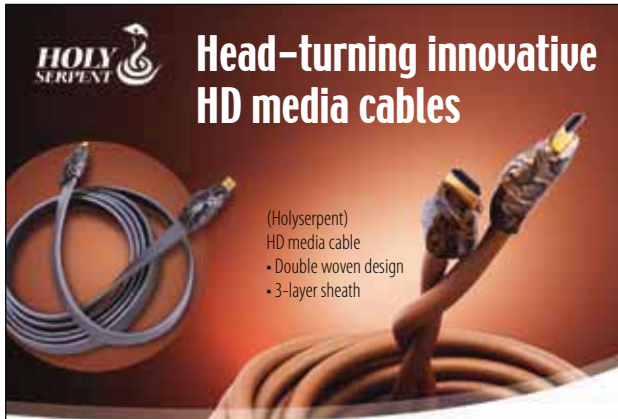

Our 20 R&D engineers utilize their rich experience in consumer electronics to complete your OEM/ODM orders for MIDs, power banks, HD media and VOD players. And we develop both hardware and software in-house.

The ultra slim MID, shown here, is just 8.8mm thick and weighs only 370 grams. This is the thinnest MID in the world. Only we can produce MIDs of that thickness and at the same time, keep the functions and standby times of larger MIDs. The raw materials we use are purchased from top suppliers and we make 181 inspections before they are used in mass production. This leads to repair rates below 0.05%. Inquire today.

Head-turning innovative HD media cables

- (Holyserpent)
HD media cable
- Double woven design
 - 3-layer sheath

Our innovative HD media cables are bound to attract your customers' attention. These snake-like connectors are unique in this field and make an interesting alternative to standard connectors. They're not only eye-catching, but they perform to the highest standards too. They are made from high-purity tin and copper, ensuring there is virtually no signal loss. These designs and optimal performance are thanks to our R&D engineers who develop 15 new cables monthly. Contact us now.

LED TVs

Our experience shines through in our LED TVs

Manufacturing for 18 years and exporting for 11 years

R&D technicians with 15 years' industry know-how

We've been honing our trade since 1993, and during this time, we've become adept at customizing our products according to the needs of our international clients. With 11 years' experience exporting to Europe and the Middle East, as well as R&D engineers who have been in the industry for an average of 15 years, we are well-qualified to meet your OEM and ODM requirements as well.

Warranty periods of 3 years

In our catalog, you'll find over 60 models of LED/LCD TVs and air conditioners to choose from. With two new devices added monthly, we can keep you ahead of the curve. For your peace of mind, we offer three-year product warranties, and our professional QC inspectors ensure everything we make is fit to bear CE, CB and SASO marks.

A minimum order requirement of only 100 units

Our 2,000m² factory is able to turn out 10,000 units per month. However, you can place an initial order for just 100 pieces. To get started, contact us today.

 **Verified supplier**

Source from a professional 11-year joypad manufacturer

Keeping up with increasing demands for video game accessories is easy when you partner with us – a professional joypad manufacturer with 11 years' experience. With eight semi-automated production lines – boasting screen-printing, injection-molding and ultrasonic machines – we make up to 200,000 CE- and RoHS-marked units each month. You can trust the quality of our products, as they are made using materials sourced from our 100 suppliers. Plus, our accessories are inspected by our 35 QC officers according to Six Sigma practices.

We invest 30 percent of our annual sales revenue in R&D, enabling us to release two new models monthly. And equipped with an in-house molding department, we can create custom products for you within one month. Our minimum order requirement is 3,000 pieces, and we can ship 10,000 units in as fast as 15 days. To get your projects moving, inquire today.

LCD screen protective filters with patented designs

Established in 1989, we are one of Taiwan's leading makers of screen protectors. We regularly research and develop optical technology using acrylic materials to stay ahead of market trends. The featured LCD screen protective filter is anti-glare, anti-UV, easy-to-install and prevents dust build-up. It also protects from impact damage and won't fatigue users' eyes while watching TV. These patented filters meet RoHS standards and are SGS-certified. We welcome OEM/ODM projects and have a strong desire to build long-term relationships with our clients. Call us today.

LCD screen protective filter
• Anti-UV and anti-glare
• Fits 26-65" LCD TVs
• PMMA material

- Humanpower-series inverters (i-Group)
- ERBCS circuitry design
 - Converts DC power to AC power
 - Low-voltage, overload, reverse polarity and thermal protection

Increase your sales with our power inverters

Help increase your sales by sourcing our featured power inverter. It converts DC power to AC power for PDAs, TVs, power tools, radios, kitchen appliances and more to run on. And boasting an ERBCS™ circuitry design, it has a high surge function for equipment that requires more start-up power.

Furthermore, this device comes with a built-in low-battery alarm, as well as reverse polarity, thermal, over-voltage, short-circuit and overload protection. Plus, it operates quietly and is maintenance-free, making it an ideal replacement for noisy generators that have high maintenance costs. For ease of storage, we've also designed it to be compact in size.

All of our devices ship with CE and UL marks for trouble-free distribution, and models of up to 800W are available with replaceable spade fuses. To add our products to your current collection, contact our representatives now.

- Indoor and outdoor power system (HP-605F)
- Provides shorepower for electronic appliances with 400/600W ratings
 - Powered by a pre-installed Brillhaus™ rechargeable AGM battery
 - Compact wheels and adjustable handle

- Power socket (SB-1648)
- 3 pins with earth-grounded receptacles
 - Rear screw-mount design for panel-type installation

- DuoTect-series microprocessor and battery reader (DT-101&201)
- Compatible with most VRLA batteries
 - Monitors DC negative ground systems, and back-up, automotive and marine batteries

CWM-309

Double-arm VESA-compliant MIS-F mount

- Supports LCD screens up to 55" or 45kg
- 600 x 400mm screw patterns
- Adjustable tilt: 8° up and 18° down
- +/- 3° of roll to level screen horizontally
- Swivels left and right
- Wall clearance: 3.4 to 54cm
- Easy no-tool adjustment

A wide selection of VESA-compliant mounts

Over 300 production-ready designs to choose from

A full spectrum of installations

From wall- or ceiling-mount swivel arms for projectors to wall-mount TV installations and stands, we supply a full spectrum of VESA-compliant mounting solutions. With over 300 brackets and arms that bear maximum loads of up to 100kg, we have the framework to support all of your customers' entertainment installations.

Relentless design and rigorous QC

Experts in CAD applications, our Taiwan-based R&D team creates over 30 models annually, incorporating the latest A/V system display trends. Our QC technicians test corrosion durability with salt-fog testing and ensure load requirements are met with electronic pull-force testing equipment – ensuring that our mounts and brackets support their precious loads.

Manufactured and delivered in 30 days

Select from over 300 production-ready designs. Or, if you need more tilt and swivel range – or any functional modification – let us design mounts that meet your specific needs. Our integrated facilities produce over 60,000 units monthly for your volume demands. And we deliver both customized and our standard products within 30 days.

To find the installations that suit your market, contact us with your OEM ideas today.

PLAW-9060

Adjustable LCD mount

An R&D team with an average of 18 years' experience

Experience counts for everything, so ours shouldn't be overlooked. Having been in business since 2001, we've assembled a team of 10 R&D engineers who average 18 years in the industry. By utilizing their wealth of knowledge, they've designed a range of power inverters, AVRs and transformers that boast the latest technologies. Our AVRs, for example, contain microcontrollers designed in-house. And our 15 QC technicians – with an average of 20 years' experience – work hard to ensure your products ship defect-free. Orders can be ready in as few as 10 days, and OEM/ODM samples in half that time. Inquire now.

HD DVB-S/S2 receiver

- Embedded Irdeto/Conax/Avit CAS system
- MPEG-1/2/4 and AVC/H.264 compression
- Supports OTA software

We provide total solutions for the digital broadcasting industry

From headend systems to receivers

Many companies can design and manufacture digital receivers, but how many of them are capable of providing comprehensive solutions? We – AVIT – offer a wide variety of digital headend equipment, as well as standard- and high-definition DVB-C/T/S/S2 set-top boxes. We have already set up more than 50 headend systems with over 1,000 streams that have been utilized by 30 million users in the past 10 years. Other advantages of partnering with us include:

- Licensed technologies from Irdeto and Conax
- 120-plus R&D engineers

Thermal cooling systems used by Coleman and Ericsson

In-line water chiller

Just how hot are our thermal cooling systems among major industry players? Coleman and Ericsson are using them in their products. Walmart also stocks our items. You too, can rely on the quality of our TE modules and other thermal cooling systems. Throughout our 25 years in the refrigeration industry, we've enforced a strict QC process to maintain our products' reliability. In fact, we have 17 inspectors who monitor every stage of production. Our monthly output is 80,000 units, all of which meet REACH and RoHS Directive requirements. Inquire today.

95% repeat-order rate

Our professional product line keeps buyers coming back

7" slim TV (TV-C711BL)
• USB port
• SD/MMC/MS slot

7" super-slim TV with rubber housing (TV-700T)

8" DVB-T /analog TV (DVB-TC800T)
• USB port
• SD/MMC/MS slots
• 800 x 600 RGB resolution

7" ATSC TV (ATSC-C728)
• USB port
• SD/MMC/MS slot
• Rechargeable battery

We have a 95 percent repeat-order rate on our portable LCD TVs and monitors. Daewoo and Beko are just two of many buyers that continually come back to us. Our 80-model line, which includes units from five to 15 inches, has what our clients need to satisfy different types of customers. And since our 50-member R&D team designs 10-plus new products annually, we can adapt our models to support emerging technologies. Plus, we welcome ODM orders, customizing samples within just 60 days.

You can also benefit from our production capabilities. With 1,100 factory workers and six Yamaha SMT machines, we make up to 100,000 TVs and monitors monthly. This capacity, along with our volume component purchasing, effectively reduces costs.

As a final step in meeting your needs, our own design team will customize packaging, logos and user manuals according

to your requirements. So you can be sure that all products will accurately reflect your company's image. To learn more about our LCD TVs and monitors, contact us today.

A specialist in LCD TVs for hospital rooms

LCD TVs for hospital use, 13.3 to 55" screens available

For nearly a decade, we have been manufacturing LCD TVs and peripherals, especially for use in hospitals. We have invested over \$2 million in production machinery from the US and Europe. Our senior R&D engineers – each with more than 25 years of experience – can create an OEM/ODM custom sample within 60 days. With this amount of experience at our disposal, clients can be confident that we can cater to needs of hospitals. The raw materials we use are sourced from Japan, South Korea and mainland China. Our strong QC team ensures product quality that keeps 90 percent of our clients placing repeat orders. Our products fully comply with UL standards. Inquire now.

Your total solution for professional audio and lighting products

Over 300 models to choose from

PA speakers and plastic cabinet speakers

Retailers, traders and project managers from the UK, Germany and Brazil rely on us to provide them with one-stop services. In fact, our annual export volume reaches up to \$12 million. Our factory is able to efficiently fill orders for up to 2,500 units per month, thanks to our 10-year relationship with other factories.

Come to us for a wide range of professional audio and lighting equipment. Our R&D team members, each with at least 10 years of design experience, add two to three new products each month to our catalog of over 300 models. We can also work on your OEM/ODM orders. And to keep up with the latest international trends, we have another R&D center based in the UK.

Most of our products come with one- to three-year warranties. To ensure customer satisfaction, we personally visit buyers in different countries every year. Our trade staff has years of experience in trading, and can communicate with you in English and Spanish. Inquire today.

Offering off-grid solar power systems and solar UPS devices

150,000 energy-efficient products manufactured monthly

We've been designing and manufacturing energy-efficient off grid solar power systems, solar UPS devices and solar inverters for nearly 10 years. At our 30,000m² factory – which is equipped with a total of seven production lines and three Fuji automatic SMT machines – our 300 workers help us maintain our monthly production capacity of 150,000 units. And our 30 R&D engineers, each with up to 10 years of experience, create three new items each month and complete customized samples in 15 to 35 days.

Our export revenue in 2010 reached \$10 million, and our target for this year is \$15 million. We've established solid relationships with nearly 100 customers from all over the world. A few of our clients who source our inverters are DAT, EGI and Hydrive. We are interested in forming a close partnership with you, so call us today.

No quality complaints in two decades

Thanks to a TQM system and production lines from Germany

Recordable DVDs

Last year, our sales took off – we sold a whopping \$50 million worth of CD-Rs, DVD-Rs, cases and housings to buyers in Europe, the US, South America, Africa and Asia. And over the past 20 years, with several hundred million dollars in shipments sent out of our factory, we have not received any quality complaints. How do we maintain such a spotless record?

We run a tight ship where quality is concerned, with a TQM system in place during the entire production process. And we carry out manufacturing using 42 optical disc production lines from Germany to ensure our products are a cut above the rest. Our monthly capacity is 40 million CD-Rs and DVD-Rs, 20 million CD/DVD cases and 10 million audio cassettes and C-0 housings.

Our quality focus has helped our YDD brand earn recognition as one of Guangdong's famous brands. These YYD brand products are registered in over 10 countries and enjoy success in over 80 countries. To see for yourself the quality that has buyers worldwide coming back for more, contact us today.

Inspiring innovation

“

Innovation is the great challenge facing China's electronics industry today. It's a challenge we cannot meet alone. We started working with Global Sources in 1983, and we now supply many of the world's top electronics brands. Over the years, we have always been impressed by Global Sources' creativity as demonstrated by its integrated magazine, online and trade show channels. And we get the most up-to-date market feedback from Global Sources, which inspires us to upgrade our products with new and effective features that meet market needs. We never reduce our commitment to innovation and creativity. Global Sources has taught us this.

Pure sine wave inverters, suitable for solar-powered systems

Pure sine wave power inverters with 70A charging circuits

Up to 20,000 units monthly

Our engineers each have over 10 years of industry experience, and this experience has put them in touch with what types of features your customers will appreciate. In fact, we have recently released a pure sine wave power inverter with a 70A charging circuit – a level few of our competitors have been able to achieve.

Our ISO 9001:2000-certified factory measures over 20,000m² and has a monthly capacity of 20,000 units. We have already exported to markets in Europe, the US, Russia, Southeast Asia and Africa. And all of our products are CE-compliant. With a design center in Shenzhen, we can finish samples within 15 days. Sales representatives are standing by to communicate with you in English, Russian, Japanese and Spanish. To get started on your next OEM/ODM project, call or e-mail us today.

Our product catalog includes:

- Inverters and chargers
- Automatic voltage regulators
- Transformers
- Uninterruptible power supplies

We keep costs low and quality high by producing most components ourselves

32" LED TV

At Jinpin Electrical we have something our competitors don't have – a complete supply chain platform. We have 14 subsidiary factories that supply most of the components we use in the assembly of our CRT and LED TVs. This means we have complete control over the entire manufacturing process, allowing us to keep quality high and costs low. It also means we achieve efficient production, and this enables us to turn out a total of 850,000 units monthly.

We were established in 1994, and throughout our company's history we have specialized in the production of CRT TVs and, more recently, LED and LCD TVs as well. Our head factory has a total area of 273,000m². This encompasses a total of 35 production lines manned by over 300 technicians. As well as this, we provide full OEM and ODM services. Lead times are 25 days and our minimum order requirement is just 25 units. Contact us today for more information.

21" color CRT TV, available in standard, slim and ultra slim models

Great 2.1 audio systems for Apple's iPod and iPhone

See why accessory brands such as Gear4, Elecom and Princeton source our wooden docking stations with 2.1 audio systems for Apple's devices. We choose the most appropriate speakers to frame in wood cabinets – instead of using ABS like our competitors – in order to provide high-end sound and a refined look. In addition, our products have defect rates of only 1 percent – compared to an industry standard of 2 percent. All our items are licensed by Apple and bear CE and FCC marks. E-mail us your OEM/ODM orders today.

From custom designing to testing in just 15 days

Our 10 engineers work on your custom remote control projects fast. In fact, they can complete all R&D steps – cosmetic and 3-D design, configuration, software programming and testing – in just 15 days. They develop at least five new models each month for your selection. To ensure quality, we carry out injection molding, bonding, screen-printing and assembly in-house as well. Our monthly capacity is 500,000 CE-, FCC- and RoHS-marked units. However, our minimum order requirement is only 1,000 pieces, and we can deliver 10,000 units within 10 days. Inquire today.

- 6-in-1 universal remote control
- For use with TVs, DVD players, VCRs, audio players and more
- Two built-in macro keys
- Learning function

We are a licensed Apple MFi accessories designer and manufacturer

Introduce our innovative Bluetooth audio adapters to your market

As a licensed Apple MFi accessories designer and manufacturer, we produce peripherals that complement Apple's iPods, iPhones and iPads. Our latest feature-packed Bluetooth® audio adapter, shown here, boasts a transmission range of up to 10 meters. It easily connects to any 30-pin USB dock for Apple devices, and can wirelessly transmit audio from any Bluetooth-enabled device. Plus, it's plug-and-play, offering users convenience. With such features, this adapter is sure to generate sales in your market.

Our 10 years of OEM/ODM experience have helped us attract major ODM clients, including some of the top-selling digital accessories brands in the world. We release up to three new products monthly and can have your custom samples ready in as fast as one week. Our delivery time for 100 pieces is as fast as three days. All of our products carry CE and FCC marks, and comply with RoHS Directive and REACH requirements. And everything we produce comes with a one-year warranty. For more information, contact us today.

Filling orders for wholesalers and retailers

Count on us to fulfill your sourcing needs, just as we've done for six chain stores in the US and the biggest supermarket chain in Australia. We also serve five wholesalers in Japan and six retailers in the UK. Most of these buyers place repeat orders and we haven't had a product returned – proof of our dependability. We can turn out 1 million head-cleaning kits, 10 million CD/DVD cases and 2 million blank A/V cassettes monthly. We welcome mixed orders and deliver in seven to 15 days. Get your orders started by contacting us today.

50 million blank discs monthly

Checked using Dr. Schenk optical testing machines

Blank discs in your preferred packaging

Count on us for your volume needs, just as buyers in the US and Japan have done for more than 20 years. Thanks to 1,500 workers and Pioneer production lines in our 100,000m² factory, we can turn out 40 million CD-Rs, 10 million DVD-Rs and 24 million CD/DVD cases every month.

In addition to volume production, you'll benefit from high quality when you source from us. We ensure top-notch disc performance by using silver film sputtering machines and CATS analyzers from Sweden. We also utilize Dr. Schenk optical testing machines, high-speed recorders from the US and PC resin and ECH/TBB solvents from Japan. And, as an added assurance, our 30 QC inspectors conduct tests at six production stages.

If you're looking to source customized models, our R&D team can have a free sample ready for you in as little as one day. Once you've made your decision, you'll receive your order within seven days, helping you to beat your competitors to the market. Contact us today for more information and receive a reply within 24 hours.

Enable users to project large images in small spaces

Source our latest short-throw projectors

Our latest ultra short-throw LCOS projector with SVGA screen, featured here, is a showstopper. We've equipped this unit with a specialized lens, 15W white LED light source and built-in twin speakers. By sourcing this compact device, you'll enable your customers to project images with sizes between 20 to 150 inches with up to 100 percent lens shift in cramped spaces. This product will provide users the ultimate audio-visual experience.

We can accept custom orders and develop ODM samples according to your requirements. At the end of this year, we will release our mobile 3-D projector. Visit our Global Sources website for more information and to view our other releases.

One of the first manufacturers of Blu-ray disc players in mainland China

Blu-ray disc player (DS-BD01)

Only a handful of mainland China suppliers produce Blu-ray disc players. We are one of them. In just a span of six months, we have already exported 100,000 of these in-demand devices. Our technical partnerships with leading chipset makers such as MTK and Broadcom, plus the efforts of our 150 engineers, allow us to develop two new models two months faster than our competitors. This speedy product development cuts crucial time-to-market and jump-starts your sales.

To further help you maintain your market edge, we manufacture in large volumes. In fact, we produce up to 500,000 Blu-ray disc players, HDMI DVD players, portable DVD players and DVB receivers each month. This huge capacity is possible thanks to a 30,000m² factory, equipped with 18 production lines and 12 SMT lines.

For quality assurance, we check our players using 400 testing machines and an AQL sampling scheme. Buyers in over 50 countries are already enjoying these benefits. Join them by sending us your requirements today.

Product range of over 4,000 models

We welcome your visit to our factory

We draw upon our over 16 years of industry experience when producing our music cables, HDMI® cables, SCART cables, connectors, adapters and indoor antennas. Currently, we have over 4,000 products available for your selection. Our experienced R&D engineers also help us launch three to 10 additional new items monthly. We welcome your OEM/ODM requests as well.

We have over 80 raw material suppliers, some of whom we've cooperated with for over 15 years. These suppliers provide us with high-quality raw materials, ensuring the stability of our finished products. We inspect 100 percent of our CE- and RoHS-approved goods before shipment. Major buyers such as EDC and CAE value this commitment to quality.

In 2003, we successfully obtained ISO 9001:2000 certification, and we started producing and selling GE-compliant products to the US market in 2004. We are also licensed to manufacture HDMI cables. To meet your volume demands, we produce up to 3,000 kilometers of cables and 2 million connectors every month. Several buyers visit our factory annually, and we welcome your visit as well. Contact us today.

Source from a Sony Green Partner

Up to 4 million remote controls monthly

RF remote control

In April 2009, we earned the privilege of becoming a Sony Green Partner. This is an achievement that many of our competitors cannot match. We have been making remote controls for 21 years, and our monthly capacity is 4 million units. Our satisfied clients include LG, Philips, Panasonic, Sony, Toshiba, Samsung, Hyundai, Flextronics, Foxconn, Skyworth, Huawei, Prima, Haier, AUX, ZTE, Konka, Malata and other buyers.

Whether you need IR or RF remote controls, you can rely on us to meet your requirements. We have 36 R&D specialists who can customize models according to your specifications. Find out more about the advantages of working with a Sony Green Partner like us by inquiring today.

The first manufacturer of glasses-free 3-D advertising players in mainland China

Glasses-free 3-D LCD advertising player, 22/32/42" models available (AD32-3DA)

3-D Blu-ray DVD player (DB-1)

When you partner with us, the first manufacturer of glasses-free 3-D advertising players in mainland China, you know you can expect world-class products. We source raw materials from Samsung and LG, use only A-grade LCD panels, and conduct firmware testing for up to 10 days. Our QC team also carries out 24-hour aging tests – that's up to 16 hours longer than the industry norm. With standards like this, it's no wonder 95 percent of our clients place repeat orders. To see for yourself the benefits of partnering with an industry leader, visit our Global Sources Online showroom today.

A01/B03-series LCD TVs,
available from 13.3" to 55"

Walmart and Carrefour source from us

For LCD TVs that have impressed both Walmart and Carrefour, source from us. Available in 13.3- to 55-inch models, our TVs integrate high-quality LCD screens from LG, Samsung, CMO and others. And because we are a Philips LSCD-licensed manufacturer, we can also provide a series of DVD players. Plus, we offer both market-ready and SKD orders to accommodate a variety of our clients' requirements.

Equipped with fully automated production lines, a centralized signal generation system and aging lines, we can manufacture up to 35,000 LCD TVs and 200,000 DVD players monthly. And each item comes with CE and RoHS marks for distribution into a range of international markets.

Established in 2005, we are a fast-growing company that provides comprehensive services from start to finish. We have experienced sales, marketing, production and technical support teams that are on-hand to cater to your every need. Find out more on why Walmart and Carrefour come to us for their LCD TVs and DVD players. Inquire now.

China Sourcing Fair

Mumbai

Face-to-Face November 23-25, 2011

Online Starts September 2011

See **MORE** online.. after the show!

Now there are 2 ways you can do business with the exhibitors at this event!

1 Face-to-face at the China Sourcing Fair

2 Online now until four months after the show

The **China Sourcing Fair: Electronics & Components** in Mumbai is now online! Find a wide variety of products and read in-depth supplier details online – two months before and four months after the show.

Experience the Fairs online now!

Step 1: Go to www.onlinesourcingfair.com

Step 2: Choose which show to visit

Step 3: Choose which pavilion to “walk through”

Step 4: Browse through all of the booths and decide which ones to enter

Step 5: Once you are in a booth, you can:

- ✓ See all of their featured products with complete specifications
- ✓ View the walls of the booth to see all the other products
- ✓ Read about the supplier and view their profile video
- ✓ Send inquiries

- Supports HD/SD TV, MPEG-2/4 and H.264 decoding
- Supports 480i/480p/576i/576p/720p/1080i resolutions
- Can store up to 2,000 transponders and 4,000 channels
- Supports DVB-S/S2 digital TV signals in QPSK/8PSK modulation
- Input frequency ranges: 950-2,150MHz
- Supports DiSEqC 1.0/1.2
- SCPC/MCPC, C/Ku-band reception
- Variable aspect ratios: 4:3, 16:9, 4:3 pan and scan or letter box modules
- Supports USB 2.0 and OTA software upgrades

400 engineers under your command

And worldwide sales offices for personalized service

We have three mainland China R&D centers with 400 engineers ready to handle your custom projects for digital satellite TV products. This team has the skills to quickly render OEM/ODM requests that will appeal to your customers, using the best components and equipment available.

We start with ICs from Japan and FETs and PCBs from the US. Our chipsets and flash memory come from top brands like NEC, Zoran and Hyundai. During production, surface mounting is carried out on Panasonic machines. Finally, we perform QC on our receivers, antennas and LNBS using a

high-temperature aging chamber, LNB digital testers and Agilent spectrum analyzers.

To ensure a stable supply, we operate four factories and maintain a monthly capacity of nearly 1.5 million units. This allows us to fill orders for up to 20,000 units in just 20 days. With sales offices in Europe, Asia, Africa and the Middle East, as well as North, South and Central America, we can provide you with timely technical support in your language. Contact us now for a customized experience.

Our full HD set-top box boasts Google's Android 2.2 OS and an ARM Cortex-A9 1GHz processor

We can easily accommodate your OEM/ODM orders

In-home one-bay private cloud

- 24/7 remote access from any network drive
- No setup required, easy to use
- 3.5" HDD (Up to 3TB)
- Built-in FTP/Samba/WebDAV/UPnP
- Gigabit Ethernet LAN
- USB 3.0 port

Full HD set-top box

- ARM Cortex-A9 1GHz processor
- Google's Android 2.2 OS
- Adobe Flash player 10.1/HTML 5.0
- 3-D GUI and games
- Digital TV and PVR
- Integrated web browser
- USB 3.0, gigabit LAN, Wi-Fi connectivity
- Supports 3.5" SATA HDD (up to 3TB)
- Supports Dolby Digital Plus, Dolby True HD and DTS HD Master Audio

Our new generation of full HDTV set-top boxes with Google's Android 2.2 operating systems are now ready to hit the market. Our HDTV boxes not only feature high-definition 1080p resolution, but they also feature crystal clear audio with Dolby Digital TrueHD, Dolby Digital Plus and DTS HD Master Audio sound technology. This means your customers will get an enhanced audio visual experience from watching videos and listening to music online.

We have an experienced in-house R&D team that includes over 80 engineers, responsible for hardware, industrial, material and software design, as well as engineering and quality control. These engineers utilize their expertise to develop as many as four new products monthly. And if you seek OEM or ODM services, our designers can easily accommodate your requirements. Our production capacity is 150,000 units per month, and our products bear CE, FCC, RoHS and CCC logos. For more details, call or email us today.

A top LED and LCD TVs supplier to Walmart, Target and Auchan

In the consumer electronics field, every buyer hopes for a long-term relationship with one excellent supplier. We – Makena – are that supplier, with OEM/ODM abilities, strict QC, efficient production and quick responses. This is why Walmart, Target, Auchan and other big retailers source from us.

R&D support from 56 engineers

Our 56-member R&D team includes PCB and ID designers as well as structural, tooling, hardware and software engineers. We develop five new models monthly, with private tooling services available. We can also customize our LED, LCD and IP TVs according to your specifications.

Stringent QC procedures

We assign more than 60 inspectors to each production line to make sure nothing is overlooked. For added quality assurance, we check each finished item five times. Our processes are ISO 9001:2000-certified by TÜV and our products carry CE, UL, FCC, FDA, PSE, EuP and RoHS marks.

500,000 units each month

At our 20,000m² factory, we have over 800 employees who ensure efficient production and help us maintain a monthly output of 500,000 units. We also provide extensive aftersales support. We've set up service centers in Europe, North America and in the Asia Pacific region to provide direct and efficient service to our clients. To work with a supplier trusted by major buyers, e-mail us your inquiries today.

CE- and RoHS-approved products with a 91% repeat order rate

PAR 38 LED spotlight

Stage light

Why do 91 percent of our clients place repeat orders with us? We use components from Cree and Edison, all products are CE- and RoHS-approved and we conduct thorough inspections on every order before it leaves our factory. Plus, all products come with three-year warranties. Clients also appreciate the service we provide. We respond to all inquiries within 12 hours, and reply to most in under two hours. If you're looking for stage lighting, as well as LED bulbs, tubes, spotlights and other lighting products, choose the manufacturer that buyers keep coming back to. Inquire now.

A professional supplier of OBM 3D active shutter glasses for cinemas, TVs, PCs and projectors

Benefit from our in-house brand

3D active glasses for home use

Hi-Shock Digital Technology is a leading manufacturer of 3D active glasses and related 3D equipment based in Taiwan. We currently specialize in the R&D, production and distribution of our featured Hi-Shock-branded 3D active glasses. Our glasses boast flicker-free technology, and are among the most lightweight models on the market. To help you import with ease, we've also obtained certification from DCI, the digital cinema initiative. These are just some of the reasons we're the only approved 3D glasses supplier to Disney.

To better serve you, GDC Technology – our global agent – handles all inquiries for digital cinema products, while Li-Tek acts as our agent for global home theater systems. Buyers such as Optoma also carry our products. Our professional R&D team can offer you extensive services from product planning to packaging design. Join buyers in over 30 countries by placing an order for our 3D glasses today.

E01-series LED TV, other series available

31 production lines to fill your volume orders

12 years of experience specializing in TVs

You can count on us – with our 60,000m² factory and 1,500 workers – to maintain a steady supply of TVs to your market. We have 31 automated production lines to fill your orders. Eight of these lines are for LED TVs, allowing us to manufacture up to 2 million units annually. We also have three lines for LCD/PDP models that can crank out 500,000 units per year. Plus, we can make 3 million SKD TVs on eight dedicated lines in the same time period.

Another 12 production lines are used to assemble our own mainboards. By performing this crucial step

in-house, we can maintain a high level of quality. Our close cooperation with Sanyo, Toshiba and Philips to create PCBs helps in this regard, as do 12 years of experience specializing in only TVs.

Thanks to our own molding department, our 86 R&D engineers can create at least five new products every month. This gives us the variety to meet the needs of 150 clients around the globe, including major A/V equipment companies such as Hyundai. To work with a professional TV manufacturer, schedule a factory visit now.

Recessed speakers built with over 50 years of experience

Taiwan's premier manufacturer

A selection of our in-wall
and ceiling speakers,
available with 70 or 100V
transformers

We were Taiwan's first manufacturer of recessed speakers. For over 50 years, we have been dedicated to outfitting our products with the latest audio technologies. From crystal-clear highs to resonating lows, our speakers deliver crisp, full sound and long-lasting performance. Speakers are our sole focus and we export 100 percent of our goods. International buyers can count on smooth importation of our high-quality items into their markets.

We use US-made LMS software and audio sweeper equipment to develop and fine-tune each model we create. And our expertise in plastic molding means that we're always ready for your next OEM/ODM project. To source from Taiwan's premier manufacturer of recessed speakers, contact us today.

LED TV, available in 18.5 to 42" models (S01 series)

- 1,080 x 1,920 resolution
- White LED backlights
- Touch-sensitive control panel
- 2 USB ports and 2 HD connectors
- Swivel TV stand

Benefit from our cost-effective integrated production

Cutting costs and lead times since 1991

Unlike other manufacturers who often rely on costly outsourcing, we – a manufacturer with 20 years of experience – save time and money by carrying out production in-house. As a result, our savings are then passed on to you. Design, molding, LCD manufacturing, plastic injection, silkscreening and assembly are all carried out at our three mainland China factories, which span a total of 80,000m².

A broad selection on offer

Choose from a catalog that features LCD/LED TVs and panels, LED lights and more. Our 300-member design team can customize any of these products to meet your specifications, or help you develop a new model from scratch.

Components from renowned suppliers

In order to meet your quality requirements, we use top-notch components from Sony, Hitachi, Sanyo and Samsung. During production, over 70 QC technicians are stationed throughout our facilities to implement our ISO 9001:2000-certified quality management system. To start benefiting from our cost-effective integrated production, contact us today.

We supplied barcode scanners for the 2010 Asian Games

Omnidirectional barcode scanners

Handheld barcode scanner

Organizers of the 2010 Asian Games came to us for quality barcode scanners. We provided the Sulux616 scanners used to scan tickets of all events in various venues. This, in addition to various other barcode scanning devices, was developed by our team of eight engineers with an average of six years' industry experience. Our ISO 9001:2008-certified factory has a monthly capacity of 15,000 pieces. But you can start with an order for just one piece. Our 12 QC officers ensure all pieces are fit to bear CE and RoHS marks for easy distribution. Contact us today to learn more.

Quality electronics, backed by a 99.2% qualification rate

With a qualification rate of 99.2 percent, you can rest assured that the products you are sourcing meet a high standard of quality. Founded in 2002, we manufacture consumer electronics such as portable and in-car MP3/MP4 players, speaker systems, tablet PCs and portable DVD players. And our collection keeps growing because our 19 R&D engineers release up to two new products monthly. If you have an OEM/ODM request, we can have a sample ready for you in just one month. Our delivery time for orders of less than 3,000 pieces is only five days. And our minimum trial order requirement is just one piece. Inquire now.

Over 18 years' experience

Custom samples in 3 to 7 days

- PA series
- Plastic speaker boxes
 - 200W max. power

1,000W car amplifier

Empty wood box

12" subwoofer with 600W RMS power and steel frame

Fast service, massive output, a constant stream of new products – these are only a few of the competitive advantages we've perfected in our more than 18 years' experience. Our OEM/ODM clients know our 12 engineers need only three to seven days to create their design, while our competitors take at least seven. We develop five new items every year, and we'll include custom packaging and logo printing to complete your orders.

Our testing equipment from Germany helps ensure your items carry the CE mark and perform as such. With eight production lines yielding up to 120,000 speakers, 90,000 speaker boxes and 3 million receivers monthly, we'll handle your volume orders with ease. We also take orders of as few as 100 units, and delivery is in 30 days.

Come visit our booths at the Canton Fair, the Hong Kong Electronics Fair, NAMM and CES, and contact us today to get started on your next custom project.

Your total solution for mounting brackets

Designed to be installed with ease

Starting as a manufacturer engaged in aluminum die casting, we have grown into an industry leader. Combining our die-casting experience with the production of TV accessories, we provide a total solution for mounting brackets by handling R&D, design, die casting and production ourselves. All of our mounts are also easily set up with their two-piece installation designs, and are suitable for 13- to 70-inch screens.

Creating safe and user-friendly designs is our priority, so we apply strict testing standards. They must be able to hold four times their rated loading capacity, as well as pass salt-spray, drop, and vibration examinations. Supported by a strong R&D team, we launch three to six new items every month. And your OEM/ODM requests are also welcome. Our monthly capacity is 100,000 units, and your orders can be delivered in 25 to 30 days. Inquire now.

Remote control duplicators

Compatible with major brands

The Remocon hopping/rolling-code duplicator, which Tung Shih has spent years developing, is a new milestone in the business of reproducing RF remote controls. This device provides users with an easy-to-use and intelligent interface. Periodic Remocon software updates are available to meet the changing needs of markets. This product is also compatible with the remote controls of major brands, and built with imitation-preventative technology to protect distributors. All these factors combine to make Remocon the best solution.

All of our items meet FCC, CE and R&TTE standards. Orders for our retail-ready Remocon and Liteall devices take 30 days to complete, and samples can be delivered in as fast as three days. For more information, contact one of our offices in Taiwan, the US, Italy or Spain today.

REMOCON HCD900

16 years behind our DIY wireless security systems

Wireless home security system

- 8 security zones
- 4 operating modes: alarm, alert, home and standby
- 10-second exit and 30-second entry delay functions
- LCD and key fob controls, with built-in panic button

ISO 9001:2008

For 16 years, we've been providing our clients with competitively priced devices that offer total security. We specialize in DIY wireless, RF and power supply products for both residential and commercial properties. Our featured Red Shield™ wireless home protection system can be used as a standard alarm or upgraded using a range of compatible accessories, to offer protection in external locations such as garages, sheds and outbuildings. This device has an operating frequency of 868MHz or 433MHz, meaning the sophisticated smart panel within the system can monitor sensors placed up to 250 or 150 meters away, respectively.

Our factory is equipped with 20 assembly lines, as well as plastic injection molding, tool-making and electronic circuit design and testing facilities. These resources allow us to produce up to 500,000 sensors and alarms, 200,000 power supplies, chargers and inverters, and 200,000 RF access controls monthly. All of our products bear CE, FCC, IC, C-Tick and other safety marks for hassle-free distribution. Contact us today to find out more.

- IR sensor and remote control
 - Supports playback from a CF card or USB drive
 - Anti-theft feature

Boost sales with our plug-and-play LCD ad players

Major clients such as Bosch and Nintendo use our LCD advertising players in their sales promotions. Why should you source our products too?

- They're plug-and-play – no setup needed. Equipped with a motion sensor, they automatically start playing when people approach and stop when people leave.
- They're reliable – each of the 8,000 units that we produce monthly undergoes a 72-hour high-temperature test. Plus, our players come with one-year warranties.

To see just how good our players are, call us today to request for a sample.

To source mini speakers with confidence, choose us

Our buyers in Europe and the Americas appreciate the fact that we make all components in-house – allowing us to control quality and pass cost savings on to you. Because we invest 10 percent of our annual turnover into R&D, our engineers can develop two new products monthly.

They can also create custom designs based on your requirements. You needn't worry about quality issues, as our products bear FCC, CE, RoHS and CCC marks. Add to that 10 QC staff members and one-year warranties, and you can be confident in sourcing from us. Inquire now.

- Stereo mini speaker
- SD card/MMC slot and USB port
 - Built-in FM radio
 - External rechargeable Li-ion battery
 - Compatible with PCs, laptops and mobile phones

We will meet the quality standards of your target market

LED moving sign

Dimmable LED ball bulb

If you have specific quality standards in your target market, we will be sure to accommodate them. However, our products already come with CE and RoHS logos, and two of our QC specialists oversee each production line for consistency you can rely on. And as an added assurance, all items come with two-year warranties. We specialize in the R&D and production of LED products, including the featured items. If you need customizations, we can create a sample within one week. Our monthly capacity is 20,000 units. Inquire today.

Source quality audio equipment from a 13-year manufacturer

Amplifier for DVD/MP3 players, FM radios and karaoke systems (AV-449)

Since 1998, we have been designing and manufacturing innovative home theater and audio equipment for markets worldwide. We manufacture amplifiers for karaoke and theater establishments, as well as MP4 players, portable audio speakers and much more. We own a 5,500m² factory with over eight production lines. Add to this our 300-member workforce, and it's easy to see why we have a monthly capacity of 30,000 pieces.

We currently export our products to Africa, South America, the Middle East, Asia and Europe. Our 20-member QC team ensures that all products are fit to bear CB, CE and CCC marks. Our minimum order requirement is 300 units. Inquire now.

Choose from our collection of 800 peripherals

Each product comes with CE, FCC, RoHS and SGS logos

Thanks to our annual investment of 20 percent of sales in R&D, our 50 engineers design three new models every month. That's in addition to our existing collection of 800 different products that you can choose from. Our team can also customize gaming accessories from scratch in just 30 days. And each unit comes with CE, FCC, RoHS and SGS logos.

To ensure the quality of the 150,000 units we produce monthly, we source materials from our suppliers in the US and other countries across Asia – whom we've worked with for over six years. We also employ 35 QC technicians to conduct inspections on incoming materials, semifinished units, finished products and packaged items. These steps guarantee that our return rate remains below 0.5 percent. To see just how reliable our products are, place an order for only 100 pieces and we'll deliver it in just one week. Contact our representatives today.

We make inverters and chargers with components from Japan, Germany and the US

Since 1985, reputable companies like Yamaha, APS and Hama have sourced our battery chargers, inverters and converters. We use durable materials from Toshiba of Japan, IR of the US and Infineon of Germany in our items. Our products are thoroughly tested, and maintain a defect rate of 2 percent, significantly lower than the industry standard of 5 percent. And for further assurance, our QC process is in accordance with Yamaha's SOP standards.

With CE, UL and e-Mark approvals, our products are ready to be shipped to your region. Choose from our Wenchi-branded product line or send us your custom specifications. And if you need samples, we can deliver in seven days. To work with a 26-year supplier, contact us now.

Introducing our latest GPS trackers

Featuring real-time monitoring and SOS buttons

- Portable GPS tracker (GPS206)
- Tracking and positioning
 - SOS button
 - Voice communication
 - Built-in memory to store location data

- Portable GPS tracker (GPS205)
- Real-time tracking
 - SOS button
 - Voice communication
 - Built-in memory to store location data

- Car GPS tracker (GPS107)
- Real-time tracking on Internet
 - Remotely cut power to car
 - Remotely lock and unlock doors
 - GSM/GPRS positioning
 - Built-in memory to store location data
 - Camera, alarm and fuel sensors

Our eight engineers, each with 10 years' experience, work together to create 12 innovative products annually. Take for example our GPS204 watch GPS tracker shown here. It features real-time tracking and an SOS button. And our GPS107 GPS tracker also featured here, can remotely cut the power to the car. Plus, it features a camera and fuel sensor. Our GPS207 pet GPS tracker which allows you track in real-time the location of your pet. And thanks to the expertise of our engineers, we also develop software and service platforms in-house.

Source from us and enjoy the services that come with our products. One being that your end-users will have the ability to track their devices for free using their mobile phones. In addition, the software in our provided CD will allow your customers to send GPRS data to their trackers at no extra expense. A more convenient website platform – capable of monitoring 10,000 objects – will also be available so your customers can fully utilize their products.

- Car GPS tracker (GPS103-B)
- Absolute location can be sent via SMS to a standard phone and a map to a smartphone
 - Supports Google Maps
 - Door sensor and ACC alarms
 - Stops fuel circulation and electricity via SMS in case of vehicle theft

- Car GPS tracker (GPS104)
- Absolute location can be sent via SMS to a standard mobile phone and a map can be sent to a smartphone
 - Supports Google Maps • Waterproof housing
 - Built-in 6,000mAh battery, 60-day standby time
 - Built-in magnet, can be attached to nearly any metal part of a vehicle
 - Built-in GPS/GSM antenna, can also connect to an external antenna
 - Built-in shock sensor

with hard-to-find features

GPS tracker watch (GPS204)

- Real-time tracking
- SOS button
- Voice communication
- Built-in memory to store location data
- Can be used to manage a sub-tracker
- 850/900/1,800/1,900MHz
- SiRFstar III chipset
- 58 x 41 x 16mm

Pet GPS tracker (GPS207)

- Real-time tracking
- SOS button
- Built-in memory to store location data
- GSM: 850/900/1,800/1,900MHz
- SiRFstar III chipset
- 46 x 40 x 23mm

All of our manufacturing processes are carried out at our 3,000m² ISO 9001:2000-certified factory equipped with five automated production lines. There, we turn out 100,000 units every month. And for hassle-free distribution, our devices are CE-, FCC- and UL-marked. Inquire now.

We conduct rigorous inspections 6 times prior to shipment

Our 15 QC specialists are at the top of their game. They ensure our in-car DVD players, monitors and TVs are fit to bear CE, FCC and RoHS marks by conducting an extensive series of inspections six times before shipping your order.

We gladly fill orders for just 100 units per model. And we can produce up to 20,000 units every month. Backed by an annual reinvestment of 20 percent of our sales revenue, our engineers create up to five new items monthly. We have models designed to fit the specifications of just about every car on the market. And we're familiar with the export requirements and standards of most countries and regions. Contact us today to learn more.

Enhanced compatibility emphasized

Upgrades broaden application base from mobile phones and car electronics to tablet PCs.

China makers of car chargers and mounts are directing product development toward greater compatibility and functionality to match dynamic trends in the mobile and automotive electronics applications.

Taking advantage of the robust sales of the iPad and iPhone, most companies are upgrading models to enable them to support more devices, including tablet PCs.

The latest releases have a higher current output than existing 1A versions, which suit MP3 players, GPS and mobile phones only. The former are similarly rated at 5V but provide 1.5, 2.1, and 3.1A. These types are expected to break into the mainstream in coming months.

Further, new variants boast dual USB ports. The BW-C044 model from Best Wisdom (Shenzhen) Industrial Ltd delivers 5V/2.1A output and can power up one iPad, or two iPhones or other handsets, GPS, or MP3, MP4 and MP5 players. Firenew Technology Co. Ltd's KF-CC-315D model is rated at 5V/3.1A and can accommodate the iPad through its 2A port and the iPhone via the 1A slot simultaneously. The unit also works with the iPod and other MP3 players, GPS, PDAs and digital cameras. The supplier offers 1, 2.1 and 3.1A versions of the KF-CC-315D with one or two USB ports.

Enterprises are likewise rolling out compact and user-friendly variants.

Zhongshan Jungang Electronic Co. Ltd's model EA-CC107 5V/2A dual-USB charger measures 32x32x60mm and Shenzhen Chaolitong Electronics Co. Ltd's CLT-PC-105 25.1x25.1x44.5mm. The HC-04 model from Gaoyi Tech Ltd

Suppliers interviewed for this report:

Best Wisdom (Shenzhen) Industrial Ltd • Digidock Development Inc. • Fan-Jet Enterprise Co. Ltd • Firenew Technology Co. Ltd • Gaoyi Tech Ltd • Haicom Electronics Corp. • Shenzhen Chaolitong Electronics Co. Ltd • Zhongshan Jungang Electronic Co. Ltd

Firenew's KF-CC-315D model is a dual-USB charger with a pull ring design.

is a charger doubling as a holder. It rotates 360 degrees and adjusts to various mobile phone sizes.

Stand-alone car mounts, meanwhile, integrate value enhancements such as FM transmitters and Bluetooth. These come in dashboard, windshield, headrest, roof and aircon-vent varieties. The units have a maximum loading capacity of 10kg, enabling them to work with GPS, smartphones, mobile Internet devices and portable DVD players.

To avoid product homogeneity, the majority of makers use private molds developed in-house or by third-party designers.

Buoying the category is steadily growing demand from the bullish handset and mobile electronics industries. Best

The EA-CC107 model from Zhongshan Jungang supports 2A output and has dual USB ports.

Wisdom projects a 20 to 30 percent increase in its revenue by year-end.

The supplier and most local enterprises expect the boost to come from the North America and the EU markets, where sales of smartphones and tablet PCs are high.

Car chargers & mounts

Mainstream models with an output current of 1 to 1.5A are compatible with portable media players, PDAs, GPS and the iPod.

New versions delivering 2.1 or 3.1A can charge the iPhone, **continued on page 316** ▶

Taiwan

New models target high-end devices

Makers of car chargers and mounts in Taiwan are riding on smartphones and tablet PCs, rolling out models for the iPhone, iPod and iPad, Galaxy Tab and HTC products. These complement selections for other mobile phones and navigation devices.

Chargers come with a connector and a Mini-USB port for the iPhone and other electronic gadgets, respectively. Several models are capable of simultaneous charging and playback.

Mounts are available in windshield, dashboard and vent options. Some are designed for a specific device type or brand, and the rest come in universal configurations.

Makers are launching hybrid versions with Mini-USB ports that double as chargers. Digidock Development Inc.'s CR-3400FMIP model is a holder, charger and FM transmitter in one unit. The supplier also offers single- and dual-joint variants, and universal designs with a suction cup base that attaches firmly to the windshield, dashboard, middle console or even a table. Some companies also offer retractable mounts or those with a swiveling joint or foot for angle and vertical and horizontal adjustment. Entry-level chargers and mounts with a plastic housing and no special coating are priced below \$5. Units with an FM transmitter in single- or double-joint configuration exceed \$10.

We provide GPS devices for before-market and aftermarket cars

Proven sellers in Europe and the US for 16-plus years

We offer GPS devices to both before-market and aftermarket cars. Clients in Europe and the US have trusted our in-car electronics for over 16 years, as well as buyers in the Middle East, Africa, Asia, Russia, Eastern Europe, and Central and South America. Our designers and engineers have more than 16 years of experience in car audio product development, and we are able to develop an average of 20 items every year to keep up with changing trends. All of our devices are for export and carry e-Mark logos.

Our products include in-car audio players that feature built-in Bluetooth® transceivers, flash memory and connectors for Apple's iPods. For an experienced partner who can help launch your products in major markets, contact us today.

Supplier Capability
Assessment Report Online

Shenzhen Chaolitong's CLT-PC-105 model is a Mini-USB charger for mobile phones with 1A output current.

the iPad and other tablet PCs through a single or dual USB ports.

Across the different types, units plug into cigarette lighter sockets and support 12/24VDC. All meet CE, RoHS, FCC and E-Mark requirements.

Prices vary depending on the power attributes and other features.

Single-port entry-level models providing 500mA list at about \$0.80, and 1 and 1.5A counterparts at \$1.40. Those capable of 2 or 3A and have two USB ports are from \$2 to \$3. An extra port adds \$0.10.

Releases with value-added functions such as FM

transmitter, MP3/MPEG-4 playback and Bluetooth go for \$5 to \$20.

IC controllers are sourced from local suppliers Shanghai Xinlong and Universe Micro.

Some enterprises turn to Taiwan providers. The typical inputs used in DC conversion include the 34063, 2576, XL4001, XL4002, XL4101 and XL4102, which have built-in short-circuit, and overvoltage and -current function. Most companies use ABS for the housing, and a few adopt PP or PC.

Rising production costs and the appreciating yuan continue to be challenges to mainland China makers. To address this, businesses will adjust quotes in the months ahead, but will limit the increase to 5 percent.

Manufacturers such as Zhongshan Jungang Electronic Co. Ltd are acquiring their own injection molding machines to produce molds in-house and lower outlay.

Our selection of 500-plus models is bound to have the electronics you need

Undecided about which type of car GPS tracker or black box you're looking to source? Or perhaps you're also seeking other electronics? Whatever device you're looking for, our collection will most likely have what you need. We have more than 500 models, including car GPS trackers, black boxes, PMPs and in-car DVD players, as well as action, WDR, dome, waterproof, IP and pinhole cameras.

You can be sure that our products meet international standards, as they carry CE, CB, RoHS, FCC and UL marks. For quality assurance, we conduct a comprehensive QC regimen that starts with raw material assessments and ends with finished product evaluations. And all of our processes are carried out according to ISO 9001:2000- and ISO 14001:2004-certified management systems. We welcome OEM requests and our minimum order requirement is 1,000 units. Talk to one of our 15 customer representatives today.

Innovations that will keep you on the cutting edge

We've hired a team of engineers with over 10 years of experience each to develop car MP3/MP4 players and FM transmitters with the features your customers seek. This has resulted in 20 patented models for your selection. Each month, we release four new items with remote controls, LCD screens, TF/SD/MMC slots and other in-demand features.

Although we turn out 200,000 CE-, FCC- and RoHS-marked units monthly, we gladly fill orders as few as 1,000 pieces to support small-scale businesses. Our delivery lead time is as fast as three days. To get a head start on your competitors, send us your requirements today.

Tune in to the latest in-car A/V devices

We are proud to offer in-dash multimedia devices built with the latest technology. Our 50 engineers work in cooperation with our design team to release 15 unique products each year. We have over 75 models of in-dash CD/DVD players, multimedia players and car GPS receivers. These devices can be customized to match your OEM/ODM requirements, have Bluetooth® connectivity, and are available with built-in or external GPS navigators.

For stable quality and performance, we use ICs sourced from Japan and South Korea. And all of our items pass a series of QC evaluations, including safety and reliability tests, prior to shipment. Plus, we provide licensing services as well. Contact us in Hong Kong today for a product catalog, or send us your OEM/ODM specifications to get started on your order.

Source some of the latest car electronics on the market

We produce 300,000 units monthly

We can help you become a supplier of the most up-to-date car FM transmitters and Bluetooth® handsfree kits. Our engineers, each with eight years of experience, closely monitor market trends to develop new accessories for the latest Apple devices. And if you need products tailored to your specific requirements, they can finish a customized item in one month. We also offer USB dongles, portable chargers and speakers.

The quality of our goods is ensured by our team of QC specialists. Nothing passes through to final production without first undergoing strict inspections. Even the raw materials we source from Japan and the US are tested to guarantee quality. For your peace of mind, we offer one-year warranties.

By producing 300,000 units monthly, we can promise you that orders for as many as 10,000 items can be delivered within 12 days. Find out what has our clients from Europe, the Middle East, Asia, Africa, the US and Australia coming back for more. Contact us today – we'll respond within 12 hours.

Our RF GPS trackers eliminate monthly service charges

We've provided services to top 500 global enterprises

Founded in the US in 1999, we focus on providing you with innovative GPS trackers, e-book readers, interactive white boards, digital signage and industrial touch-screen displays. Our featured GPS tracker utilizes RF signals and a host unit to locate up to 50 receivers – eliminating the expenses associated with standard models that require costly monthly service charges. And to ensure a stable supply of the highest quality components, we have direct purchasing agreements with 100 major suppliers.

We provide comprehensive services to top 500 global enterprises, including HP, Sony Ericsson, Motorola, Kodak, Brunswick, Flextronics, PCI, Sigmatron and others. To support our clientele, we are headquartered in Shenzhen and have branches in Taiwan, the US and Mexico. Contact us today with your specific requirements.

Work with a 7-year manufacturer of in-car electronics

For seven years, we have been focusing on the R&D, production and sale of in-car electronics. In this time, we've provided OEM/ODM services to buyers worldwide, including Media Markt, Saturn, Fnac, Carrefour, M.video and Eldorado. We mainly offer car DVRs, black boxes, GPS trackers, FM transmitters and Bluetooth® kits – all of which come with CE, FCC and RoHS marks. To keep up with market trends, we release up to four new models every two months. Our monthly capacity is 300,000 units. Contact us today.

Source our latest HD car black boxes

Developed by a leading supplier in South Korea

We – WithSolution – concentrate our efforts on offering total security solutions. By combining the design prowess of our R&D team with advanced machinery, we help lead the car security products industry in South Korea. Our latest high-definition black boxes are innovative and user-friendly. They boast automatic recorders that are triggered by shock sensors. As a result, our products generate event records by capturing images 30 seconds before and after incidents.

Let our team put their knowledge of wired and wireless communication, CCTV image processing and network control technologies to work on your project. To serve you better, we have agents in Canada, the US, Singapore, Japan and Germany. Place an order today, and we can deliver it in as fast as two weeks. One-year warranties are available. Contact our sales staff today.

Car HD DVB-T receivers with 99.5% qualification rates

Our car HD DVB-T receivers perform above par. And our 99.5 percent qualification rate shows this. To maintain such a high record, we complete all processes at our 6,000m² ISO 9001:2000-certified facilities.

Furthermore, we put all of our products through a myriad of performance evaluations, including aging, high- and low-temperature, vibration and drop tests. Our monthly capacity is 30,000 units, all of which carry CE and FCC marks. With nine years of industry experience, we are ready to handle any request you might have. Our team of more than 10 engineers develops four new models every month. And they are ready to meet your cosmetic, structure and software design requirements. Inquire today.

If we had to sum ourselves up in one word, it would be: fast. Not only do we ship your orders in one to 15 days, but we can also have samples ready within five days. With an average of 10 years' experience, our R&D engineers will communicate with you in English to work on your OEM projects. To ensure the quality of our car GPS, security and audio devices, we source components from the US, Japan and Taiwan. And for your convenience, we provide 24-hour online support. Start with an order for just 10 units by contacting us today.

Quality that has 90% of our clients coming back

Class D 4-channel high-power car amplifier (MT4100A)

More than 90 percent of our buyers across the Americas, Europe and the Asia Pacific region order again. That's because they know we never cut corners when it comes to quality. We carefully produce all molds in-house under an ISO 9001:2000-certified system, which has led to a defect rate of less than 0.5 percent. For your peace of mind, we provide a detailed QC report with every order.

Choose from our range of over 800 items, which we update with 10 new models monthly. Have a design in mind? Our 10 engineers can have a sample ready in less than 14 days, allowing you to quickly make a sourcing decision. We turn out 240,000 car speakers, 80,000 car amplifiers and 80,000 sound boxes each month. That's more than enough to meet your volume orders. For more information, contact us today.

In-house production with over a third of our annual sales reinvested in R&D

Source your personal and vehicle GPS/GSM tracking devices from us – Grandbeing – a professional manufacturer with strong design and production capabilities. All of our products are made in-house utilizing SMT machines. To keep up with the latest market trends, we reinvest 35 percent of our annual sales revenue in R&D projects. This investment enables our 20 hardware and software engineers, each with 10-plus years of experience, to provide comprehensive OEM and ODM services. To learn more about the advantages of working with us, or to view more of our Golistar-brand devices, inquire today.

Car DVD player for use in Ford, Toyota, Volkswagen, GMC, Honda and Hyundai vehicles, with USB port and SD card slot

Competitively priced car A/V devices with 1-year warranties

Compared to similar products from Europe, our in-car DVD players and monitors are 30 percent more affordable on average. We maintain this price advantage without compromising quality. In fact, we sell more than 30,000 car DVD players every year with a repair rate of only 2 percent. We do this by sourcing key components from the US and Japan, and manufacturing in mainland China. Our products are FCC-certified, come with one-year warranties, and are customizable to support your regional standards. Contact us today.

Car MID

- Detachable MID with DVD player and GPS functions
- Wi-Fi and 3G connectivity
- Google's Android 2.1/2.2 OS
- Supports 0.3 to 5.0 MP camera
- HD multimedia port

Introducing our multipurpose, detachable car MIDs

We have released a new in-car entertainment system with detachable MID for your on-the-go customers. When separated, the two parts can be used alone – the detachable panel can be used as an MID and digital video camera, while the in-car base functions as a CD/MP3 player and radio. Together, they also work as an HD media player and GPS navigator. Other features include Wi-Fi and 3G connectivity and Google's Android OS. These devices can be customized to meet your unique specifications, with samples ready in just one week. Plus, we have no minimum order requirement. Inquire now.

10 years' experience in car electronics

6.2" car multimedia player for Mercedes-Benz C200 (SK-6200)

Our 10 years of car electronics manufacturing experience are reflected in our products. To ensure quality, we source ICs from Foxconn and Sony, and enlist a team of 15 specialists to conduct IQC, QC and QA evaluations on each unit. Plus, each one of our car DVD players must pass stringent aging, voltage, vibration and moisture tests for durability you can depend on. We even offer one-year warranties – proof of our confidence in our products' performance. We operate five production lines, and turn out over 20,000 CE- and RoHS-marked units monthly. Contact us today.

Increase sales with our solar Bluetooth handsfree car kits

► Solar Bluetooth handsfree car kits

If you want to stay ahead of your competitors, start sourcing Bluetooth® handsfree car kits from us. These kits are packed with the latest features, including:

- Built-in polycrystalline silicon solar panels and rechargeable batteries
- LCD screens that display caller's phone number, as well as TTS and voice dial functions
- Built-in FM transmitters and speakers
- DSP technology
- Up to 8GB TF card support
- Easy installation on car windshields

Standard orders ship in five days. And all products come with CE and FCC marks. Our engineers design one new item each month and many of our devices hold patents in mainland China. We also welcome OEM/ODM orders, and have worked with over 180 clients from around the world on their OEM projects. Contact us today.

Quality assured by 10 inspectors at each production line

We vow to supply car DVD, CD and MP3 players that will meet your quality standards. Every one of our production lines is closely monitored by 10 QC inspectors who weed out any defective units. And equipped with 10 engineers who average eight years of experience, we release five new products a month. Not only do we sell items under our in-house STC brand, but we can also customize a sample for you in 35 days. Benefit from our 55,000-unit monthly capacity by contacting us today.

STC Car Audio (China) Co. Ltd

118 Yingbin East Rd., Jiangmen, Guangdong, China
Tel: (86-750) 307 7007 • Fax: (86-750) 390 4970
E-mail: guanxinelect@vip.163.com
Website: www.globalsources.com/stccaraudio.co

Mini GPS tracker (MT88)

▶ Car GPS tracker with LCD (MVT600)

Developing GPS trackers and tracking software in-house

Our R&D capabilities attract buyers from around the world. Unlike many of our competitors, we develop all software and hardware for our GPS devices in-house, so we can easily accommodate your specifications. If you have OEM or ODM products that you'd like us to render, give us 15 days, and our R&D engineers will have a sample ready for you. Each month, we can produce up to 100,000 tracking devices, made with parts that comply with the RoHS Directive. For more details, inquire today.

Shenzhen Meiligao Electronics Co. Ltd

6/F, Cafu Plaza (Sheraton Hotel), 5 Guihua Rd.,
Futian Free Trade Zone, Shenzhen, Guangdong 518038, China
Tel: (86-755) 8346 2225/6/7/9 Fax: (86-755) 8346 2061

global sources

- 720p HD car DVR with USB 2.0
- 120° lens angle
- Cycled recording
- Supports up to 64GB SD cards

With a 1,500-square-meter factory, we manufacture 200,000 units every month. These include our 15 types of car DVRs and 10 tablet PC models for your selection. We have 10 R&D staff members who enable us to release up to eight new designs monthly, as well as finish samples for you in less than a week. To ensure the quality of our CE-, FCC- and RoHS-marked devices, we have 12 QC technicians on the floor. We also have eight overseas sales operators, so contact them today to get started.

Global Sources Verified Supplier ★★★☆☆

NEW PRODUCTS

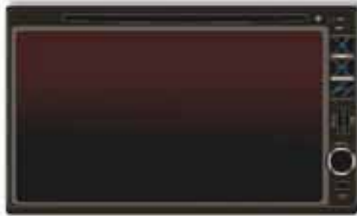

Car navigation system integrates GPS, rearview camera

Nobletech
(Hong Kong)

Model: NT3000
MOQ: 100 units
Delivery: 35 days

Description: Car navigation system; built-in GPS; Bluetooth; rearview camera; 6.2in HD touchscreen, 800x480 pixels; plug-and-play; Windows CE 6.0 OS; SiRFstarIII 800MHz chipset; OEM harness

Car multimedia player features detachable MID

Shenzhen Winmark Electronic Technology Co. Ltd
(mainland China)

Model: DV7022

Description: Car multimedia player; CD/MP3 player, radio; 300,000-pixel to 5MP camera; Wi-Fi, 3G; detachable MID with DVD playback; GPS; Android 2.1, 2.2 OS; HD multimedia port

GPS tracker boasts shock sensor

Shenzhen Carscop Electronics Co. Ltd
(mainland China)

Model: CCTR-801-y

Description: GPS tracker; shock sensor; 10 to 30s upload interval; embedded GSM, GPS antennas; 4-frequency Simcom GSM module, GPS module with SiRFstar or MediaTek chipset; built-in rechargeable BL-5B lithium battery; compact, easy to install

GPS car navigation system has 23-language voice guide

Shenzhen Roadrover Technology Co. Ltd
(mainland China)

Model: C8026HS
MOQ: 100 units

Description: GPS car navigation system; for Hyundai Sonata; 800x480-pixel display; GUI; day/night color mode route, automatic zoom, reroute, voice guide in 23 languages

Use third-party verified tools for more confidence and peace of mind when finding suppliers!

- When top buyers like you source online, you want to know whether suppliers:
 - Are trustworthy, reliable and financially stable*
 - Can meet your specific requirements for product manufacturing and delivery*
 - Have potential to be long-term trading partners*

Global Sources has partnered with independent third-parties to provide you with tools that verify suppliers and help you make better sourcing decisions.

Credit Check:

- Confirms a supplier's status as a legally registered business
- Covers up to 12 key financial and legal metrics — more than anyone in the industry
- All facts and figures are gathered from government agencies by Sinotrust and First Advantage — two of Asia's most trusted business credit reporting providers

Supplier Capability Assessment:

- Confirms details about a supplier's operations, production capabilities, QC processes and management through factory tours, management interviews and documentation reviews
- Offered through Bureau Veritas, the world's leading conformity assessment and certification services provider
- Plus, request your custom company and product inspections

We know you want to source from suppliers that have been verified by third-parties, and we have made it easier for you to find them. Visit www.globalsources.com to learn more today.

Advertiser Index by Product

Global Sources' unique Supplier Ranking system combines best-of-breed, third-party supplier verification with comprehensive business information, allowing you to narrow down the huge number of suppliers quickly and efficiently.

The higher a supplier's ranking, the more business information you'll have access to from that supplier.

For more details, please visit www.globalsources.com/SITE/QUALITY.HTM

Audio system for buses

Let your customers enjoy the entertainment provided by our audio and video systems – which are perfect for transport vehicles. Our high-fidelity sound systems come with eight-channel receivers and our video systems feature 16+1-channel LCD TVs. This makes them ideal for buses and tourist coaches – a simple solution for a more comfortable and entertaining ride.

With our headquarters in Hong Kong and production facility and R&D center in Shenzhen, we are able to bring you the best that South China has to offer – cost-effective manufacturing and access to the latest trends backed by 17 years' experience. We have also enlisted the support of first-tier mainland China universities to bring you the kind of R&D service you're looking for. All of our products carry CE and FCC marks and are carefully tested prior to delivery. To start enjoying these benefits, inquire today.
