

High light output, a very even field and low weight are the main advantages of the new ARRI COMPACT 12,000 W single ended daylight luminaire. The complete COMPACT series now comprises eight lampheads from 125 W up to 12,000 W.

ARRI COMPACT 12,000 W

New design principles and consistent use of newest materials technology make it possible to reduce weight without compromising performance and reliability. The ARRI COMPACT 12,000 W Fresnel satisfies location requirements for an easily managed lamphead without sacrificing ARRI's traditional performance and durability.

The 500 mm lens gives an enormous punch of light, delivering over 80,000 lux/6° halfbeam angle at 10 meters in full spot. Flood is a full 5,500 lux/50° halfbeam angle.

A single stirrup lock is easy and safe to operate and the moveable stirrup points perfectly balance any accessory combination. The lamp holder is spring-loaded and an additional secondary bulb-shaft lock prevents bulb breakage in operation.

The new COMPACT 12,000 W replaces the double ended ARRI AD 12 kW Daylight lamphead. Existing Electronic Ballasts 12/18 kW EB or 6/12 kW EB can be used.

Technical Data

Dimensions:	27.9" (L) x 27.2" (W) x 30.2" (H)
Weight:	approx. 108lbs. (49kg)
Lens Diameter:	19.7"
Barndoor Insert Size:	20.9
Filter Insert Size:	20.9"
Lamp Holder:	ARRI G 38 Fast Lock
Lamp:	12 kW Single Ended
