

HOME ENTERTAINMENT AT A GLANCE

The entertainment center of your world.

How to Dress a Home Theater

Start with the HDTV set.
Add a great sound system.

The well-dressed home theater is comfortable to inhabit, gorgeous to look at, and a place to show off. Displays have never been as large, flat, and affordable as they are now. B&H offers all the components and accessories you'll need for a custom fit, with the payoff being countless hours of entertainment.

AQUOS®

THERE'S MORE TO SEE

SHARP | Aquos and Sharpie Series

The leader in Liquid Crystal Display

Seeing the matrix of Aquos TV's illuminated on a wall at the B&H store is like encountering your first waterfall along a backwoods trail: an unexpected pleasure of color and light. You can almost feel the mist. Though computer monitors and large screen TV's share the same technology of tiny crystals twisting to shut out light according to fleeting electrical charges, the displays are used in very different ways. One represents the chore of hunching over a screen, the other the joy of sitting back and being immersed.

Today's astoundingly large LCD TV screens are a far cry from a few years ago when manufacturers had a hard time exceeding the sizes of even 27-inch picture tubes. But for two decades Sharp has been building one generation of LCD fabrication plant after another.

Where once a four-inch screen on a Sharp Viewcam camcorder seemed impressive, today's 32-, 37-, 42-, 46-, and 52-inch screens have become mainstream for flat-screen TV's. When it comes to LCD technology, few companies match Sharp's long-term R&D capability and manufacturing capacity. Besides outgrowing their one-time size limitations, LCD panels have conquered other deficiencies such as the viewing angle. Today's panels maintain optimal brightness, whether viewed from the side or center seats of the sofa, or even sprawled on the living room rug. When it comes to sports events or action movies, LCD's used to be criticized for smearing. No more. With the 4-6 millisecond response time in many LCD sets, enhanced with a 120Hz Refresh Rate offered on the 72U and 82U series, keeping up with the action is not a problem.

So, take a look at these Sharp Aquos LCD TV sets and get ready to drool over their big-screen performance, gorgeous color rendition, and breathtaking definition from the authority in LCD technology.

SAMSUNG | LN-T Series LCD TV

Momentum seems to be on the side of the South Korean electronics giant as consumers find an ever greater selection of flat-screen TV's sporting the Samsung brand. The 18 models shown below range from 19-52-inches, satisfying size requirements for a TV in any room of the house.

Though these models are all HDTV sets, they differ in overall pixel count. Among other specs that differentiate them, are the response rate (given in milliseconds—lower is better) and contrast (a higher ratio is better).

Connectivity is an increasingly important spec to pay attention to, especially if you're thinking of plugging in multiple devices like a cable box, DVD player, games console, and a PC. The more inputs a TV offers, the less often you have to unplug a device in order to accommodate another one.

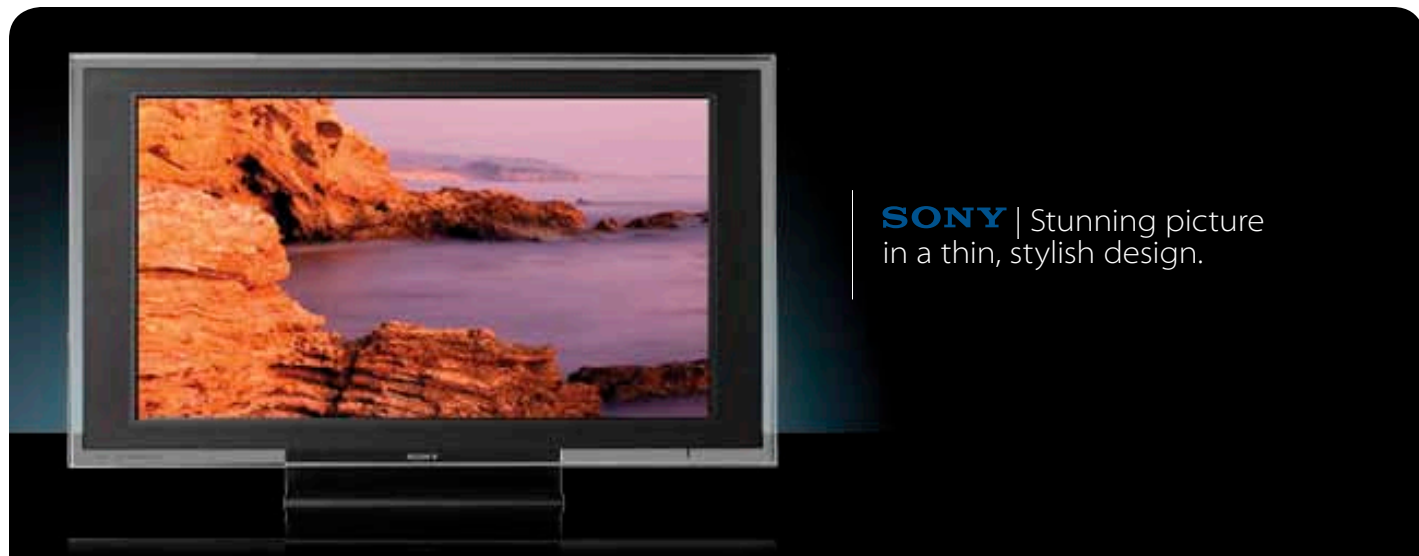

All of these TV's have at least one HDMI input, the defacto standard for digitally connecting A/V equipment moving forward. If you're attaching an upconverting DVD player or a Blu-ray or HD DVD player, you'll want to go in via HDMI. All the newest components including DVR's, cable boxes, media receivers, and audio receivers that pass through video signals include HDMI ports.

All of these models contain a PC (VGA) input, which makes it easy for you to attach a notebook computer and watch a DVD or, if the computer has a broadband connection, to enjoy Internet video like YouTube on the big screen. (Don't forget the VGA cable.)

Some of the sets include a USB 2.0 input, which you'd sooner expect on a computer. By plugging in a thumbdrive filled with certain types of content copied from a computer, you should be able to show JPEG photos and play MP3 music right on the TV—no home network necessary.

So, take a look at these Samsung models for an overview about where LCD TV's are headed.

SONY | Stunning picture
in a thin, stylish design.

SONY | KDL Series LCD TV

Sony, the brand leader, ramps up its flat-screens

So, you think it's finally time to replace that hefty 4:3 Trinitron tube you've had since before *Seinfeld*? Sony offers a sumptuous choice of LCD TV's ranging below from 26 to 52 inches. And once you move that tube out, you could gain an extra foot or two in room depth.

With widescreens now the acknowledged shape of TV, all of these models conform to a 16:9 aspect ratio. And if you choose a program made for 4:3, your picture even with side panels will probably be larger than what you've been accustomed to watching. All of these models contain sufficient resolution to display high-definition programs. The major difference is whether you opt for a model incorporating 1366 x 768 pixels or one with 1920 x 1080 pixels.

At the equivalent size, TV's with the higher pixel count will be somewhat more expensive, but you will be getting about twice as many pixels for the money. The consumer electronics industry refers to such 1080p displays as "Full HD."

Beyond resolution, the very best LCD TV's feature a high refresh rate, which is the number of times an image is displayed per second. So, a TV with a 120 hertz (Hz) rate is better than 60. They should also incorporate a fast response time, which is how fast a colored pixel on the screen turns white and then to a color. So, 6 milliseconds (ms) is better than 8.

The KDL series offers a small optional module that should appeal to anyone with a broadband connection. It's called the Bravia Internet Video Link, and it enables viewers using the TV remote to stream free Internet video content, including high-definition, from such providers as AOL, Yahoo!, Grouper, Sony Pictures Entertainment, and Sony BMG Music. Clearly, if there's one thing you can say about any of these KDL sets: it's not your father's Sony.

SONY LCD Rear Projection TV's

Experience the Brilliant Color and Clarity of Sony HDTV

Sony redefines entertainment with bigger, brighter, and better-than-ever rear-projection TV's, sporting stunning detail and clarity. 1080p has never looked so good. The A3000 series using SXRD technology is especially notable for its fast response time and 120 HZ High Frame Rate that make motion-oriented viewing like sports a real joy.

Pioneer KURO Plasma TV's

Intuitive, Sophisticated, Stylish

The increasingly sophisticated design features of Pioneer plasma TV's include redesigned Deep Encased Cell Structure to improve brightness, image accuracy and panel efficiency, First-Surface Pure Color Filter for enhanced contrast, color, and reduction in light reflection on screen and Crystal Emissive Layer for deeper blacks and increased brightness of images.

Multi-System TV Sets:

Almost everyone shopping for a TV set for use in the United States should skip this page, since you'll find equipment dedicated to the American NTSC (analog) and ATSC (digital) video systems elsewhere in the catalog. If, however, you're looking for a TV that is NTSC-compatible and can be also used with most types of the PAL or SECAM systems employed in other parts of the world, then you may want a multi-system set. (For PAL camcorders, see pages 280 – 281.)

Multi-System/Multi-Region DVD Players and Recorders

DVD players available in the U.S. are typically set to play Region 1 discs, which are movies distributed to viewers in North America. Multi-region DVD players can play Region 1 discs as well as movies meant for other regions of the world. Multi-system DVD players are compatible with both PAL and NTSC systems. Keep in mind that the recorders below (including DVD/VCR combos) will not be able to receive over-the-air channels in the U.S. without a DTV converter box once analog broadcasting shuts down in early 2009.

TOSHIBA SD-37VSR

DVD Player/VCR Recorder Combo
 • DVD Player, VHS Player/Recorder
 • Supports CD-R, CD-RW, SVCD, DVD-R, DVD-RW, CD, Video CD • MP3 Support, MPEG 2 digital output, Dolby Digital output, DTS digital output

#TOSD37VSR \$139.95

DVDO iScanVP20, VP30, VP50

High Definition Video Processors

- Motion and source adaptive video deinterlacing for NTSC (3:2 and 2:2 pulldown; video) and PAL/SECAM (2:2 pulldown; video) sources
- Flexible Input and Output Aspect Ratio Control • SD/HD Analog and Digital Transcoding and Processing • 1 connection can carry all of your video signals to your display
- Output aspect ratio presets for 4:3 & 16:9 displays • NTSC to PAL conversion and PAL to NTSC conversion (50Hz <-> 60Hz)
- Input aspect ratio presets for 4:3 and 16:9 content with user memories (10) with flexible horizontal and vertical zooming and panning controls • High performance, multi-standard video decoder (10-bit: 480i/576i; 12-bit: 480p/576p/720p/1080i)
- High-quality super-adaptive comb filter with 2D Y/C separation • Factory-Defined Resolutions - 480p, 576p, 720p-50, 720p-60, 1080i-50, 1080i-60, 1080p-50, 1080p-60, VGA, XGA, 852x480, 1024x576, 1024x1024, 1280x768, 1360x768, 1366x768
- Built in test patterns to assist in setup of your display and your individual sources which are connected to the iScan
- Optional VRS Precision Deinterlacing Card adds "Best in Class" standard definition (480i/576i) deinterlacing performance

#DVISVP20 \$995.00

iScan VP30

also adds:

- An additional HDMI input (total of 4)
- User definable content and display aspect ratio
- Framerate conversion that allows source-locked 48/72Hz output for film-based sources
- Input and Output Aspect Ratio support for non-standard content and displays
- Panamorphic/Anamorphic Lenses on front projectors (constant height configurations)
- Analog Component/RGBHV input using high quality BNCs • Analog Component/RGBHV output using high quality BNCs
- 10-bit, 300 MHz instrumentation-quality DACs with up to 10x oversampling (2x for 1080p)
- User-definable Output Resolutions between 480p and 1080p (27 Factory Defined Resolutions)
- Display Profiles - multiple display configurations (10) • Additional test patterns to assist in display calibration • Optional SD-SDI Input Module for the absolute best picture quality from a standard definition digital source that has an SD-SDI output

#DVISVP30 \$1,499.95

iScan VP50

also adds:

- World Class 1080i Deinterlacing - Motion, Edge and Source-Adaptive Processing
- Complete processing of 1080p for PC, HD-DVD & Blu-ray Disc formats as well as upcoming PS3
- Update all processing algorithms through software updates
- Progressive Source Input Cadence Detection (Source-Locked Output without Deinterlacing)

#DVISVP50 \$2,295.00

Key Digital KD-CSW2X1

Flash Max Series 2 x 1 Video Switcher

- Input up to two (2) sources, and Key Digital's IAS™ Auto-Sensing circuitry automatically switches the active source to your display • Crystal-clear switching of High Definition and Standard Definition component video, composite video, and S-Video (with adapter cables)
- Toslink optical audio out, Left and Right analog stereo, digital PCM audio • Cascadable, expandable
- Switches either automatically, via the IR Remote control, or use the convenient front-panel pushbutton
- Dimensions: 8.6 x 1.75 x 4" • Weight: 2 lbs

#KEKDSCW2X1 \$300.00
#KEKDREOTESM Remote Control \$100.00

Key Digital KD-CDA3

Xplosion Series 3 Ch HDTV Distribution Amp.

- 3-channel Analog signal distribution from any HDTV or SDTV Component Video (YPbPr) or RGBHV Video source including 1080p, as well as analog stereo or digital (PCM) Audio
- HDTV and SDTV images to component HDTV-ready monitors in all video formats, including 1080p.
- Future-proof, expandable, 300 MHz Video bandwidth, the KD-CDA3 drives cables up to 300 feet. It is compact and rugged, and comes equipped with its own convenient mounting bracket.

#KEKCDCA3 \$375.00

Key Digital KD-MSW8X4

Fat Boy Series 8 to 4 HDTV Matrix Switcher

- Seamlessly switches eight (8) sets of Component Video (YPbPr) video and/or RGBHV video sources, as well as analog or digital (PCM) audio.
- For DVD Players, Satellite, Cable Boxes, DVRs, and other sources, up to (4) separate displays.
- Outputs of the 8x4 can be incremented in steps of 4, providing an unheard-of matrix switching capability all the way up to 8x44.
- Convenient front-panel pushbuttons, IR Remote Control, RS-232, front and rear-panel IR sensor, and wired IR serial connector • Dim. 17 x 3.5 x 10" • Wt. 11 lbs

#KEKMSW8X4 \$1,795.00

Key Digital KD-HDB150 HD Spider Series

HDMI Blaster - HDMI Cable Extender (150')

- This smart adapter draws its own power from the HDMI signal, so there is no need to provide external power to the unit. The intelligent circuitry built into the HDMI Blaster™ can even support 1080p, so you can enjoy the benefits of true HDTV.
- Each unit effectively doubles the length of your HDMI cable run, up to a total of 150' (2 x 75 foot cables) for 1080i and 720p, and 60' (2 x 30 foot cables) for 1080p
- Dimensions: 3.25 x 1 x 1.6"
- Weight: 0.2 lbs

#KEKDHDB150 \$275.00

Radiient Technology HDMI Switchers

Select-4

Sleek Design and Well-Spaced Controls and Inputs make the Select 4 a pleasure to use

- Four inputs, one output HDMI source switcher and repeater
- Full 1080p signal compatibility (not tested)
- HDCP support • Input and output cable length capability: 50ft
- Doubles as a repeater for cable length up to 100ft
- I/R remote control • RS-232 port for advanced system control
- Dimensions: 8.5" x 5.5" x 1.7"

• Power Requirements: 100-240 VAC, 50/60Hz
#RAS4SRP \$299.95

Radiient Technology

Select-4ce Four-Input HDMI Switch/Repeater

- Experience the Select-4's 'best-in-class'
- HDMI performance, at a new lower price. The Select-4ce Four-Input HDMI Hub shares the same great design, just without the RS-232 serial port feature or the second Pro remote control (Pro remote available as an option).

#RAS4SRC \$199.95

Radiient Repeat-6 HDMI Distributor

- A high-performance HDMI signal distributor/repeater – ideal for multi-display applications • One HDMI input distributed to six HDMI outputs

#RARHDMIDR \$699.95

COLORVISION SpyderTV

Colorimeter for Home Entertainment System
 SpyderTV scientifically measures contrast, brightness, color, tint, and color temperature presets on your TV and helps you make the necessary adjustments to dramatically improve your picture quality. SpyderTV supports Plasma, RPTV, DLP, LCD and CRT TVs.

#CODST \$199.95

SIMA SS-WL6EX

Speaker Selector with Volume Control
 • Supports 4 or 6 pairs of speakers • Independent volume control for each channel • 100 watts per channel power handling

#SISSWL6EX \$176.95

SIMA SS-WL4EX

Speaker Selector
 • Supports 4 or 6 pairs of speakers
 • Up to 100 watts per channel
 • Accepts up to 14 gauge speaker wire
 • Built-in overload protection
 • Compatible with 415 ohm speakers • Individual speaker volume controls f/each output 20Hz20kHz

#SISSWL4EX \$144.95

SIMA VS-502

5x1 Audio Video Selector
 • Composite, Component, Y/C, Digital Audio (optical, coaxial), Unbalanced Stereo, RS-232

#SIVS502 \$159.95

#YANP30 \$299.99

Roland HD-1

Free shipping

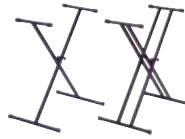

V-Drums Lite

Roland's V-Drums are the most popular electronic drums in the world, but not everyone has the room or budget for a full V-Drums kit. The new Roland HD-1 is forged from the same technology as its predecessors, but it's much simpler to use. It's also incredibly quiet, thanks to the newly designed kick beater, cushioned tom pads, and snare head. Most of the HD-1's components are mounted on one stand for easy setup and transport, and for a clean look. Just take it out of the box and play.

- Easy set-up and operation
- Compact and stylish design
- Great sounds with a variety of kits
- Perfect for home, school, or studio
