

Congratulations on your purchase of the BOB Warm Fuzzy. It is designed to provide your child with added comfort. Proper installation and care will provide years of reliable service.

Before attempting to install your new Warm Fuzzy, read and understand these instructions completely to insure proper installation.

If you are unclear on any point, contact your dealer or BOB before use.

Warnings

- Installation of the Warm Fuzzy requires removal and reinstallation of the safety harness straps. It is imperative the safety harness straps are reinstalled correctly. Failure to correctly install the safety harness can result in your child not being properly secured in the stroller and possible injury.
- These instructions are written specifically for the installation of the Warm Fuzzy in a BOB Stroller. If you are installing the Warm Fuzzy in another brand of stroller, you need to insure that it is installed correctly and does not interfere with the proper function of the child restraint system. Failure to do so can result in injury to your child.

1. Figure 1 illustrates the components of the safety harness system. To correctly install the Warm Fuzzy, you will need to first remove the safety harness as follows:

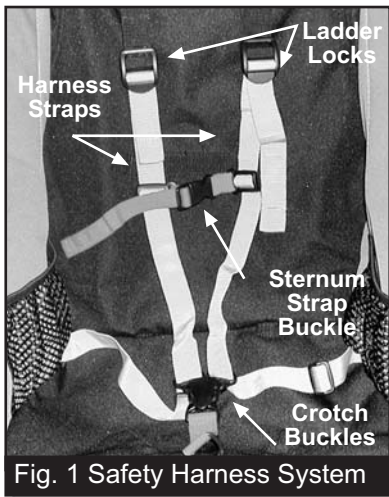

Fig. 1 Safety Harness System

- Unfasten the crotch and sternum strap buckles (note older model strollers do not have sternum straps).
- Remove the harness straps from the ladderlocks by threading backwards through ladderlocks.
- Position the straps so they are not in the seat area where the Warm Fuzzy will be placed.

2. You are now ready to place the Warm Fuzzy in the stroller seat. There are three slots in the Warm Fuzzy. Place the Warm Fuzzy in the seat so the two parallel slots are located on the seat back as shown in figure 2. Next, locate the crotch strap in figure 2 and route it through the single slot as shown. Make sure harness straps are placed above the Warm Fuzzy.

3. With the harness straps above the Warm Fuzzy, connect the crotch buckles to the crotch strap, as shown in figure 3. Make sure the straps are not twisted.

4) Locate the ladderlocks behind the upper slots in the Warm Fuzzy, figure 2, and expose them so you can attach the harness strap. Attach the harness strap by threading it through the back of the ladder lock upper slot as shown in figure 4. Next thread it through the lower slot from the front side. Repeat this sequence for

both ladderlocks. When installed correctly it will look like figure 5.
5) Figure 6 shows the Warm Fuzzy and Safety Harness correctly installed. To properly secure your child in the stroller, refer to the

Owner's Manual supplied with your stroller.

CARE INSTRUCTIONS

Hand wash warm, dry flat, do not dry clean or iron.

LIMITED WARRANTY

BOB Trailers Inc. takes pride in its workmanship and strives to manufacture the best products possible. Therefore, we warranty the Warm Fuzzy against defects in material and workmanship subject to the conditions listed below. Since no product is indestructible, it does not cover defects attributable to or resulting from normal wear, abuse or alteration.

- The Warm Fuzzy is warranted for one year from the date of original purchase.
- Warranty is only valid for the original purchaser.
- Proof of purchase is required to exercise this warranty.
- Labor and freight charges are not included.
- Normal wear, neglect, abuse, accidents, and improper use are not covered by this warranty.
- Warranty claims must be made through an authorized dealer.
- This warranty is limited to the repair or replacement of the defective part. BOB shall in no event be responsible for consequential or special damages.
- This Limited Warranty is the only express or implied warranty applicable to BOB. Any implied warranties, including warranties of merchantability and fitness shall be limited in scope and duration in accordance with this limited warranty.
