com to find out how much it costs to send a SMS text message depends upon your call package. Press and scroll DOWN you want and press USE. The template is added to your text at the cursor. 4. When sending a message the display shows. Your BT Diverse 6450 can store up to 5 messages. Edit SMS templates You can overwrite the existing templates with your own messages, up to 32 characters long. The first sent message registers you with the text service. Or press previous menu level. SMS alert Your handset will beep when you receive an SMS text message. You can set up to 4 PIN protected user areas for your BT Diverse 6450 so that text messages can be kept private. The default setting for the answering machine is Off. The default setting is 20 seconds. You can select an answer delay of 0, 5, 10, 15, 20, 25, 30 seconds or Time Saver. Delete all messages 1. On your handset, press MENU, scroll MACHINE and press OK. This lets you identify the caller and decide whether to take the call yourself. The machine will also automatically set to Answer Only. The day and time of each message is announced and then the message is played. You can change this to help prevent unauthorised callers from listening to your messages. To change your remote access Security PIN see Answering Machine Settings, page 58. Switch answering machine on remotely If you forget to switch on your answering machine, you can do it from another phone. You can also select pictures from your own files or other ringtones that you have stored on your PC. Edit a picture Once you have opened a picture on your PC and before downloading it to your phone, you can. The

image will now zoom out centered on the Preview Box. Click the button as many times as required. When your handset picture file is full, you must delete pictures from it before you can download new ones. The picture is saved as your wallpaper. 4. Press BACK to return to standby. You can choose from any of the ringtones stored on your handset. <http://learnsmart.com.ng/fckeditor/editor/filemanager/connectors/php/userfiles/command-conquer-3-kane-wrath-manual.xml>

To store new ringtones, see page 70. Display shows RINGER 2. The default setting is On. Display shows CONFIRM NEW PIN new PIN again. 4. Press SAVE. The display shows 5. Press to return to standby or back in the menu. This allows you to hold internal calls even while another handset is making an external call. Display shows REGISTER HANDSET 2. Press OK. The next available base is highlighted automatically, e.g. Scroll DOWN 2. Press OK. Display shows BASE 2 the base you want and press OK. Enter your system PIN here For more information on your system PIN, see page 79. Safety information Only use the power supply suitable for the BT Diverse 6450 range. Cleaning Simply clean the handset and base with a damp not wet cloth, or an antistatic wipe. Guarantee Your BT Diverse 6450 is guaranteed for a period of 12 months from the date of purchase. Alternative arrangements should be made for access to emergency services. You can then choose to take the call or not. Also operates the answer machine functions. You can expect your Freestyle 1050 to provide many years of quality service. Please read the instructions carefully before use and keep this user guide for future reference. When you unpack you should have If no battery is installed, the BATT LOW light comes on when the mains power is switched on. However, leaving the handset on the base unit all the time can deteriorate rechargeable batteries. To get the longest possible life from your batteries, take the handset off the base for a few hours each day. An upstairs room is ideal. The following points should be considered. A newstyle telephone socket is needed for this product. If you do not have one, call us on Free fone 0800 800 150. If you start to go out of range while using the phone, you will hear warning beeps. If you do not come back in range, your call will be cut off. The handset IN USE light comes on. The base unit light flashes. Listen for dial tone. You hear the dialling tone. The last number you called is redialled. However, if you hear noise or interference during your call You can then dial each number by pressing just two buttons. Allows you to wonder freely and the handset will pick up which ever signal has the biggest strength.

Compatible with; BT Diverse 7000 Plus Range BT Diverse 6210 BT Diverse 6250 BT Diverse 6350 BT Diverse 6410 BT Diverse 6450 BT Freestyle 7250 BT Freestyle 7310 All models of Gigaset phones In The Box BT Diverse Repeater Mains Adaptor User Guide We now offer our expert Setup and Programming service for all our DECT Repeaters. This fantastic service is carried out by our expert engineers who PreRegister your repeater with a compatible Cordless Telephone This must also be purchased from PMC. Please contact us for advice on compatible phones. We do not recommend setting up a repeater unless you have a clear technical knowledge as it can be very time consuming. You can buy a repeater without the setup service but we cannot guarantee compatability or offer extensive Technical Support. General General Colour Black EAN 5016351615102 Warranty 12 months Please Note Please note All information is provided for reference only. If you are unsure about any of the features listed, please check the manufacturers official information. BT DECT Repeater User Guide No videos found for this product. 18 May Sean Andrews Collected by PMC Telecom The reviews displayed originate from different sources Reviews marked "Collected by Trustpilot" originate from. Trustpilot verified orders. Reviews marked "Collected by PMC Telecom" originate from. Bef or e fir s t using your B T Diverse R epeater you will need to set it up and register it with your base station. Mobile and International call costs may vary. A typical arrangement is shown below IMPORT ANT It is possible to roam between the Repeater and the base, however, call handover during conversation is not always guaranteed. IMPORT ANT It is not possible to further extend the range in one direction by r egistering a second Repeater to the first R epeater. All Repeaters must be within range of the base station as the Repeater can only be registered to a base station and not another R epeater.

A Y ou can operate two handsets in the reception range of the r epeater. B If you wish to operate mor e than two handsets you must increase the number of Repeaters f or the reception range. A B Use a power sock et close to your base station. This is because during the registration pr ocess the base station needs to be near the R epeat er. Y ou can relocate your R epeater after registration is complet e. Getting star ted Mains power adaptor cable Register the R epeater t o the base station 1. T urn on the R epeater mode in the product that you will be regist ering the R epeater to. This varies dependant on the product, the instruction can be found in the r elevant userguide, pr ovided with the product. 2. Put the product into registr ation mode, this is normally done by pressing and holding the Find butt on, or by pr essing the Registr ation butt on, as appr opriat e. 3. Switch on the power

to the Repeater at the wall socket. If the LED continues to flash, switch the power off and on again. Operating a handset for the first time within the extended Repeater area. Make sure that handsets you want have been registered to the same base station as the Repeater. 1. Switch off the handset within the new reception range of the Repeater but outside the reception range of the base, and then switch it back on again. 2. To confirm the handset is working with the Repeater, press the TALK button on the handset whilst next to the Repeater. 10 Please note If using more than one Repeater on a base station you should ensure the Repeaters are placed at least 10 metres apart. If extending the range to outdoors it may be better to locate the Repeater near a window and higher on the wall, as radio signals do not work as well through thick walls. Please note Blind spots where signal is weak can cause loss of signal. Avoiding blind spots will reduce the risk of losing a call. Look at the Repeater, the green righthand LED should be flashing.

Your Repeater is now ready for use. A Repeater can support up to two handsets simultaneously to make or receive calls. It is suggested that the confidence tone is switched ON to aid installation and to get an idea of the base and Repeater reception areas. Before starting this procedure the Repeater's power adaptor must be connected to the Repeater and the mains socket, but switched OFF at the mains socket. Switch it on again. The confidence tone is now activated. To reset the Repeater Before reinstalling the Repeater, it needs to be reset. Before starting, make sure the Repeater's power adaptor is connected to the Repeater and the mains socket, but switched off at the mains. 1. At the Repeater, switch the power on for 1 to 5 seconds and switch it off again. 2. Switch on for 25 to 35 seconds and switch it off again. The Repeater should now be reset. Using your BT Diverse Repeater The screw heads should protrude about 5mm from the wall. Using your BT Diverse Repeater **W ALL W ALL PLUG W ALL PLUG SCRE W SCRE W 69 mm W ALL WARNING** The screws supplied to wall mount your BT Diverse Repeater will not be suitable for all wall types. BT recommends that you seek advice from a building professional before attempting to wall mount your Repeater. If this is the case it will have to be registered to the base again. Check that the power adaptor lead is plugged into the Repeater, the power adaptor is plugged into the mains socket and the mains power is switched on. To switch the confidence tone off, see page 11. It is recommended that you place your product at least one metre away from such appliances to minimise any risk of interference. Cleaning Simply clean the product with a damp not wet cloth, or an antistatic wipe. Do not use a dry cloth as it could cause a static discharge resulting in damage to the product. Equally, additional handsets and the chargers can become warm during charging.

Product disposal instructions The symbol shown here and on the product means that the product is classed as Electrical or Electronic Equipment and should not be disposed with other household or commercial waste at the end of its working life. For more information please contact your local authority or the retailer where the product was purchased. **Product disposal instructions for business users** Business users should contact their suppliers and check the terms and conditions of the purchase contract and ensure that this product is not mixed with other commercial waste for disposal. **Technical information** This product is intended for registration to BT Diverse 6210, BT Diverse 6250, BT Diverse 6350, BT Diverse 6410, BT Diverse 6450, BT Freestyle 7250, BT Freestyle 7310, BT Diverse 5000, BT Diverse 5210, BT Diverse 5250, BT Diverse 5310, BT Diverse 5350, BT Diverse 5410, BT Diverse 5450, BT Diverse 4010, BT Diverse 4016, BT Diverse 3010, BT Diverse 3010 Micro, BT Diverse 3016, BT Diverse 2010, BT Diverse 2011, BT Diverse 2015, BT Diverse 2016, BT Diverse 2020, BT Diverse 2Line, BT Diverse ISDN that are connected to the public switched telephone network PSTN and private switchboards within the United Kingdom. approval requirements for connection to the telephone network. Returning your product If the Helpline is unable to remedy your problem they will ask you to return the product. Where possible, pack the product in its original packaging.

Please remember to include all parts. Please note that we cannot take responsibility for goods damaged in transit. Please obtain and keep proof of posting from the Post Office or carrier. For your records Date of purchase Place of purchase Serial number For guarantee purposes proof of purchase is required so please keep your receipt. General information Services and equipment are provided subject to British Telecommunications plc's respective standard conditions of contract. Registered Office 81 Newgate Street, London EC1A 7AJ. I am looking for advice on how to disconnect the answering machine facility from inside the base station to allow me to use the base on its own as a charger. Cheers I have isolated that the problem is in fact the handset itself, not the base unit. I eliminated a problem with the base unit by registering a different DECT phone to it. The base still works fine. So, if you already have an A110 extension handset, make sure its also registered to base 1 and maybe try to get just the handset repaired via VTECH. or just buy a new handset if they are available. The handsets retain their clocks under battery power so this is a little misleading. Enter the correct Then press and hold the delete key while reconnecting the power. When power comes back on press play one time. If that does not work, your unit needs to be replaced. Login to post I have a pair of gigaset 300 phones and three newer models, and a BT Diverse 2000 phone, all talking to the same DECT base station a VOIP N300IP. The extension units do not have a message facility. If bought from Amazon you should be guaranteed for a year, not a month! You didn't specify what brand is your phone, so I'm assuming it is about BT Diverse 7150 Phone. You need to follow this link in order for you to read and download for free in a PDF format the User Guide for your device. Have a nice day! Unplug main cradle and reconnect after 30 Seconds.

Replace all handset batteries and place handsets back on cradles. Problem has been ongoing for over a couple of months. I have replaced batteries in both handsets in last week, with no change to problem!!! But I cannot make any outgoing calls or set the menus as the keypad is locked. I have tried pressing the locked keypad icon on the phone, even holding it down but nothing happens. Any info appreciated Answer questions, earn points and help others.
