Operation Manual

TruLink™ VGA Matrix Switch w/Audio

Model: 39973 (2x2 Port)
39974 (4x4 Port)

Thank you for purchasing the VGA Matrix Switch w/Audio. **We recommend that you read this manual thoroughly and retain for future reference.**

Function:

The TruLink™ VGA Matrix Switch with Audio allows you to route multiple PCs, and display the image on multiple monitors at a time. You can also have the image from one PC on multiple monitors. With the built-in video signal enhancement, you can place the monitor up to 210 feet away while maintaining your video quality. No software is required and PC selection is easy. Switch between computers via push buttons or use the remote control for PC selection from up to 6 feet away.

Package Contents

- VGA Matrix Switch (1)

- Supports video resolutions up to 2048x1536
- Suitable for VGA, SVGA, XGA, SXGA, UXGA, and Multi-sync monitors

Connecting the VGA Matrix Switch

Examples in this manual will be with reference to product 39973 (2x2 Switch). Connections and operation will work in the same method for 39974.

Before making the connections to the matrix switch, make sure that you have the necessary cables to connect. No cables are supplied with the unit.

1. Using VGA and 3.5mm audio cables connect the Monitor1 and Audio1 outputs on the VGA Matrix Switch to a monitor and set of PC type speakers.
2. Repeat step 1 for the Monitor2 and Audio2 outputs on the VGA Matrix Switch for a second monitor and set of PC type speakers.
3. Use VGA and 3.5mm audio cables and connect the PC1 and Audio1 inputs on the VGA Matrix Switch to your PC VGA and 3.5mm PC sound card output.
4. Repeat step 3 for the PC2 and Audio2 inputs on the VGA Matrix Switch for a second PC and PC sound card output.
5. Connect the power supply to the DC 5V jack on the VGA Matrix Switch.

Diagram of connections:

Operating the VGA Matrix Switch

Operating the VGA Matrix Switch with the remote control

On the remote control, there are two groupings of controls. Your set of Monitor buttons initialize control for the VGA Matrix Switch. You cannot switch between your PCs until you hit one of the Monitor buttons. The PC buttons allow you to switch between your PCs.

Steps

1. If you would like to control Monitor 1, press the Monitor 1 button, and when you press it, you will hear a beep sound.
2. Press either the PC 1 button if you would like your first PC to show up on Monitor 1 or PC 2 if you want your second PC to show up on Monitor 1. After you press either PC 1 or PC 2, you will hear another beep.
3. Repeat steps 1 and 2 to control the Monitor 2 display.

Operating the VGA Matrix Switch from the front panel

Steps

1. If you would like to switch PCs for your Monitor 1, hit the "1" button until your desired PC is shown on the display.
2. Repeat this step to control your Monitor 2 display.

Troubleshooting:

Problem	Possible Solution
No Picture	<ol style="list-style-type: none"> 1. Press firmly on the connections to make sure they are snug. 2. Power down equipment and power back on. 3. Make sure the correct input is being used by looking at the green indicator lights on the switch.
No Sound	<ol style="list-style-type: none"> 1. Make sure the connections are snug. 2. Check the volume level on your PC and your PC speakers.

FCC Statement

This device generates and uses radio frequency and may cause interference to radio and television reception if not installed and used properly. This has been tested and found to comply with the limits of a Class B computing device in accordance with the specifications in Part 15 of the FCC Rules. These specifications are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by plugging the device in and out, the user can try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the computer into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
