DIGITAL PRIDE

(COWON

- Do not use this product for other purposes than those described in this guide.
- Do not view videos, pictures and texts stored in your player while driving a vehicle for your safety. Operating other features of the player is also dangerous and may cause fatal accidents while driving.
- Do not use detergent or other chemicals on the product surface due to decolorization. In this case, wipe the polluted area carefully with a soft cloth.
- Do not expose the player in either cold weather of under 0℃ or hot temperature places over 40℃ such as inside automobiles. This may cause fatal damage to your player.
- Do not expose your player to water or keep it in a damp or humid place for long periods. If the player is damaged from moisture as described above, product failure is then classified as failure by submersion, and no longer covered by warranty. Moreover, your player may not be possible be repaired with charged for services, and you may no longer be able to use your player.
- Do not attempt to disassemble or reconstruct the player. Any defects resulting from this will void any warranty, and the unit may be permanently disqualified from any after service.
- Do not mix directions when connecting cables to your player or PC. Connecting cables incorrectly may damage your player or PC. Do not bend or press connection cables with heavy objects.
- If you smell the player burning or find it overheating while in use, remove the battery and contact our A/S Center as soon as possible.
- Touching the player with wet hands may cause damage and malfunctions. Handle the power plug only with dry hands (otherwise an electric shock may occur).
- Listening at high volumes for extended periods may harm your hearing.
- Using the player in places with high occurrences of static electricity may cause malfunctions.
- Stored data may get lost by physical impact, damage or error, therefore always backup important files. All data stored in the player may become deleted when being serviced. Our A/S center does not backup files while repairing players. Please note that COWON SYSTEMS, Inc. is not responsible for any data loss from products entrusted to us for service.
- Only use the AC power adapter and USB cable provided by COWON SYSTEMS, Inc.
- When connecting to a PC, use only USB ports on the mother board or a USB Host card. Using an external USB hub may not guarantee proper operation. (e.g. USB ports on a keyboard or an external USB hub)
- When formatting the built-in hard disk, select FAT32 as the file system. Firmware must be reinstalled according to 'Upgrading Firmware' procedures after format.
- Be sure to disconnect the power supply to the PC and AC adapter during lightning or thunderstorms, to prevent danger to the user or the risk of fire hazards.
- Keep the player away from magnets and direct magnetic fields, as they can cause malfunctions.
- Do not connect the line-in/out jacks of the cradle (or sub-pack) and the USB port simultaneously. The power of the player may be turned off or cause malfunctions. Only connect the required jacks or ports.
- Do not drop or subject the product to any hard impact This may result in malfunctions and/or unit failure and void the warranty.
- Price of the player may fluctuate due to unexpectedly commercial conditions. In this case, COWON SYSTEMS, Inc. has no responsibility to compensate for the price fluctuation.

What is COWON A2?
COWON A2 is a portable multimedia player developed and manufactured by COWON SYSTEMS, Inc. Equip with a clear, wide LCD screen, users are able to enjoy realistic movies and also record or watch TV programs through an AV in/output jack.
Moreover, BBE technology used in high-tech digital devices are adopted to restore sound sources to its original clear sound during the digital processing.
The player also supports photo view, text reading, FM radio listening/recording, as well as voice recording and direct encoding through a built-in microphone and line-in input jack.

Wide and vivid color LCD
480 x 272 pixels, 26 M color 4 inch Wide TFT-LCD presents operation status for easy confirmation and to high-quality images anywhere and anytime.

Continuous playback with embedded battery
The ultra power-saving circuit of COWON A2 enables up to 10 hours of video and 18 hours of audio continuous playback with its built-in, fully charged, 4300 mAh battery.

Movie playback
DivX, XviD, WMV Codec is pre-installed into the player to play almost all movie file formats without additional conversion procedures. Movie file formats that are not supported at first try are easily viewable after a simple conversion step using JetAudio VX.

Movie recording
Directly record with external AV devices (TV, VCR, camcorder), and then store to enjoy. Immediately record by connecting to external AV OUT jack and your A2 with the AV cable included in your package.

Powerful audio format support
Supports MP3, OGG, WMA (ASF) and WAV file formats and restores damaged harmonics of digital music to its original clear sound with the BBE technology applied to enjoy music at its best condition.(JetEffect is not supported during OGG playback.)

Voice recording and direct encoding
COWON A2 allows professional level voice recordings through its built-in high-fidelity microphone and direct encoding through a line-in cable. You can record important lectures or directly transmit sounds from CD players or other audio devices with the line-in cable and save them in your A2.

Text and image viewer
4 in. wide screen allows comfortable view of text files and image files (JPG, PNG, BMP). Images can be viewed in slide show mode or be magnified for easy view. Now your precious memories can always be viewed and carried along in a digital photo frame.

Listening/Recording of FM broadcasts
FM listening comes with useful features such as auto frequency scanning, country settings, 25 preset frequencies, immediate and scheduled recording, and more.

Most Powerful Sound Fields Recognized Worldwide
COWON's delicate but yet powerful sound is already approved by many professionals.
EQ: 5 Band,7 Set
BBE: Sound field effects that provide the clearest music.
Mach3Bass: A bass booster that enhances super low-end bass.
MP Enhance: Sound field effects that compensate for missing sound segments.
3D Surround: Three-dimensional surround sound effect.

Portable disk and USB HOST features
USB 2.0 support allows fast file storage to the built-in hard disk, and the "USB HOST" port allows photos to be directly transmitted and stored from a digital camera (with UMS support) to your A2.

Logo and wallpaper screen
Images files of logos and wallpapers can be created by the user to present a unique style like no other.

Comfortable clock feature
Basic clock feature is included, also with easy clock view, alarm and scheduled recording notices and more.

Easy Upgrade with Firmware Download
Easily upgrade your player with the firmware download feature. We provide new firmware versions incorporating improvements from the actual requirements and suggestions of users.

JetAudio VX included
Build a powerful multimedia desktop environment with the world famous integrated multimedia playback software, JetAudio Basic VX. Movie file formats that are not supported by A2 can easily be converted for view with simple conversion features of JetAudio VX.

⑯

❶ **Earphone jack**	: Connect the bundled earphone or any earphone with a standard 3.5 mm plug
❷ **AV OUT**	: Connect the AV cable to send A2 still/video images to external AV devices (TV etc.).
❸ **AV IN**	: Connect the AV cable and line-in cable to record contents playing on external AV devices with your A2 player.
❹ **USB DEVICE**	: Connect your A2 and computer with the USB 2.0 cable to transfer files.
❺ **USB HOST**	: Connect your A2 and other USB compatible devices with the USB Host cable.
❻ **DC Adapter Jack**	: Connect the adapter to either turn on or charge A2.
❼ **Microphone**	: Voice recording with the built-in microphone.
❽ **Speaker**	: Listen to audio without earphones with the built-in stereo speaker.
❾ **Strap holder**	: Holder to connect various straps and accessories.
❿ **TFT LCD**	: Displays information and playback screens.
⑪ **Joggle Lever**	: Moves up, down, left and right and either selects or runs files when pressed.
⑫ **LED**	: Indicates basic player status.
⑬ **BACK button**	: Clear selections or exit from current mode.
⑭ **A, B, C buttons**	: Runs A, B and C features below the screen.
⑮ **RESET hole**	: Cuts off power when the player is malfunctioning. Does not influence player operations.
⑯ **LCD, AV OUT, HOLD switch**	: Selects items on the screen and also selects Button Hold and USB Charge conditions.
⑰ **Power switch**	: Short press to temporarily turn off the LCD screen. Long press to turn on and off the player.

Power Connection and Charging
1. Connect the AC adapter to the outlet and the DC adapter jack on the side of the player.

2. LED turns on red while the player is charged.

3. LED turns off after the player is fully charged.

- Fully charge the player before first use or after the player was not used for a long period of time.
- If the player was discharged for a extended period of time, the player will not immediately operate when the adapter is connected. The LED may not light up red, but the player will charge normally. A sufficient amount of time is needed to fully charge the player.
- For your safety, only use the adapter included with your player at purchase. The adapter is 110/220V.
Connecting to your PC
1. Connect the device's "USB DEVICE" and the USB port of the computer with the provided USB cable.
2. If properly connected, the following appears on the LCD.

3. Check the recently added drive from My Computer and Windows Browser.

Charging with your PC

Connect your computer when the HOLD switch is beneath the player is at LCD or AV OUT. The player can be charged through "USB DEVICE" depending on the HOLD switch position.
If the HOLD switch is at LCD
The player is recognized as a portable storage device. Battery will be used and not be charged.
If the HOLD switch is at AV OUT
The player is recognized as a portable storage device and will be charged. Battery will be slightly consumed but the recognition delay will be slow.

If the HOLD switch is at HOLD
The computer will not be able to recognize the player and will only charge it through the USB port. Fully charging the player will take about 15 hours.

- When using your player as a portable storage device, connect the adapter for stable power supply.
- If the player is connected to an USB hub, the player may not charge properly or malfunction. Be sure that to connect your player to the USB port on the back side of your computer.

Windows 98 Driver Setup

If you are using Windows 98 or 98 SE, you will need to install a separate driver when the player is connected to the computer for the first time.

1. Insert the installation CD, included in your package, in the CD-ROM drive of the computer. If you don't have the CD, download it from www.iAUDIO.com.
2. Connect the device's "USB DEVICE" and the USB port of the computer with the provided USB cable.
3. The following Add New Hardware Wizard window will appear. Click Next.

4. Click Search for the best driver for your device. (Recommended). then click Next.

5. Click Specify a location and click the Browse button.

6. Select the "Win98" folder in the installation CD and then click the OK button.

7. After the search location is specified, click Next.

8. Click the 'Finish' button to complete the driver installation.

9. Check the recently added drive from Windows Browser.

Saving Files and Disconnecting A2

1. Open Windows Browser or run JetShell while COWON A2 is connected to your computer.

2. Save video, music and other files in your COWON A2.

3. After all files are saved, click the icon from the PC tray.

4. Click the following popup message when it appears.

Removing USB Mas s storage device – Drive (E:)
5. When the Safe To Remove Hardware window appears, separate the USB cable.

Safely Remove Hardware
Now you may safely remove "USB mass storage device" from the system,

- The player must be disconnected from the computer after checking the Safe To Remove Hardware message because of the player contains a hard disk.
- If the following message appears, run Safe To Remove Hardware after a few minutes. This is not a malfunction.

An error occurred when removing USB mass storage device,

Cannot stop "Generic Volume" device now, Please try to stop the device again later,

OK

- If your operating system does not display the 'Safe To Remove Hardware' window, disconnect the player after all transfer operations are completed.
- Only simple file transfer operation is available for Linux and Mac OS.

Upgrading Firmware

Firmware is a program embedded in the hardware. Firmware update may provide the player with feature enhancements and/or bug fixes. Frmware versions may have bugs that will be fixed in the next version.
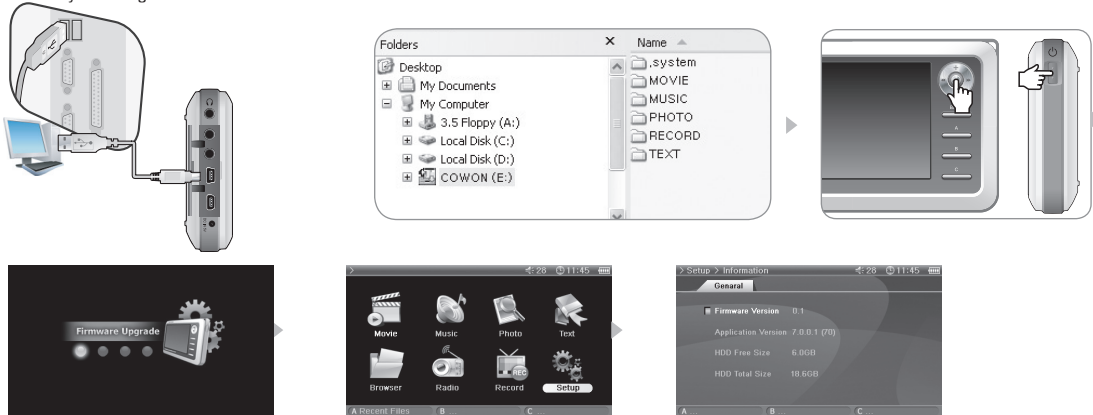

Upgrading Firmware

1. Visit our home page at www.iAUDIO.com, and download the latest firmware version.
2. Connect A2 and your computer with the provided USB cable.
3. Extract the downloaded file and copy it to the top level folder (Root folder) of the A2.
4. After disconnecting A2 from your computer, remove the USB cable.
5. When A2 is powered off, press the Joggle lever to the middle with your left hand and the Power button with your right hand at the same time to display the firmware upgrade image.
6. Remove your hand and wait for the upgrade to complete.
7. When the initial Menu screen automatically appears, go to 'Setting' -> 'Info' and check to see if the firmware version and application version matches.
8. Upgrade is complete.

- **If you are unable to operate the player because the System folder is deleted, upgrade the firmware to solve this problem.**
- **Also upgrade the firmware when the hard disk in A2 is formatted.**
- Fully charge the player battery before upgrading the firmware.
- Do not turn off the player before firmware upgrade is complete.
- Data saved in the hard disk of A2 may be deleted while upgrading firmware. Therefore, backup any important files to your computer before upgrade. The manufacturer shall not be liable for any data loss of files that were not backed up.

Running Files

1. Connect the earphones to A2. (No need to connect the earphones if you want to listen through the speakers.)
2. Press and hold the power switch to turn on the player.
3. To play a file, press the lever in either Movie, Music, Photo or Text mode.
4. Use the lever to move the cursor to + or – and press the lever to open a folder that contains the file to be played.
5. Press the lever on a desired file and the file will start to play.
6. Adjust the volume, toggle through the file playlist or scan through files by joggling the lever during playback.
7. When the lever is pressed during playback, the file will pause. To restart playback, press the lever again.
8. Shortly press the "BACK" button during playback and the File Browser will appear. Press the "BACK" button again to go to the Mode Selection screen.
9. Press and hold the power switch to turn off the player.

Ex.) Play a music file.

- Only the list of files that are playable per mode is displayed for each Movie, Music, Photo, Text mode. Files are played in the same method for each mode.
- Press and hold "BACK" button anytime during playback to pause.
- Speaker is turned on only when the Speaker setting in Setup – Sound – General is set to Auto-Off or On.
- To view subtitles while playing video, Subtitle setting must be set to On. FYR, file names (excluding extension) of subtitle and the video file must be the same , and both files must be located in the same folder.
- Video file formats that are not supported can be viewed using the conversion feature of JetAudio VX.

Button Controls

Button	Description

File Browser

A2 provides 8 modes. Movie, Music, Photo, Text and Browser modes can be navigated by the File Browser.
■ Opening File Browser

Press the lever in Movie, Music, Photo, Text or Browser mode and the File Browser will appear.

By default, only playable files in each mode can be viewed and selected. All files appear in Browser mode.

■ Moving a File Browser Item

Move the lever towards + or – to move through items up and down.

Press move the lever towards >> to open a folder.

Move the lever towards << to exit the folder. Returns to the Mode Selection screen in the root folder.
■ Selecting a File Browser Item

Press or move the lever towards >> on a folder to open it.

Pressing the lever on a file will start playback and moving the lever towards >> will open a popup menu.

■ File Browser Popup Menu
Move the lever towards >> on a file to open a popup menu for the appropriate mode.
Move the lever towards + or – to select a desired item, then press or move the lever towards >> again to select.
Press the "BACK" button to cancel the popup window.
Play File, Add to Playlist and Delete popup menu is the same for Movie, Music and Text modes. For Photo mode, Slideshow and Set Wallpaper are added.
Only Play File and Delete popup menus appear in Browser mode.

■ Closing File Browser
Press the "BACK" button to close the File Browser screen and return to the Mode Selection screen.

Playlist Usage

The Playlist is a feature that contains only files you want to play.
■ Opening, Closing and Switching Playlist
Press the "C" button in the File Browser of Movie, Music, Photo or Text mode to open a playlist. Press the "C" button again to close the playlist.
Press the "B" button to switch between playlist and file list.

■ Add/Delete a File in Playlist
To add a file to a playlist, move the lever towards >> to the desired file in File Browser and select Add to Playlist from the popup menu.
To delete a file in a playlist, move the lever towards >> to the desired file in the playlist and select Delete from the popup menu.
To delete all files in a playlist, move the lever towards >> in a playlist and select Clear Playlist.
When playing files from a playlist, after a file is played the next file on the list will start to play.
Playlists in Movie and Text mode can contain up to 50 files, and in Music and Photo mode up to 100 files.

USB Host Connection and Usage

USB Host can copy and delete files and folders in USB compatible devices (digital camera, iAUDIO, etc.).
■ Connecting USB Host
Connect the USB Host cable to the "USB HOST" on your A2 and the USB port of the USB compatible device.

■ Starting USB Host
To start USB Host, press the "C" button in Browser mode after connecting the USB compatible device.
If the device is compatible, list of folders and files in the device will appear on the right of the screen.
Select a folder or file to copy and press the "A" button, then a popup menu will appear and select "Copy".
Press the "B" button to move between A2 and the USB compatible device list.
Press the "C" button again to end USB Host mode.

■ USB Host Compatible Device
Digital cameras, MP3 players and other UMS supported devices are compatible. For more information on compatible devices, see our product introduction at www.iAUDIO.com.

Radio Mode Usage

Listen or record FM radio broadcasts in Radio mode.

<NON Preset Mode>

<Preset Mode>
■ Radio Listening
Select Radio mode to listen to FM radio.
Shortly move the lever towards << or >> to move through channels. Long pushes will scan channels.
Press and hold the "BACK" button to stop the radio.

■ Preset Setting and Usage
Press the "A" button on a desired frequency and the frequency will be saved.
Press the lever to enter to Preset mode and move the lever towards << or >> to move through saved frequencies.
Press the "A" button in preset mode to delete a saved frequency.

Record Mode Usage

Record using the AV or Line-in cable and the built-in microphone.

■ Connecting a Cable

COWON A2

Connect the AV cable to the "AV IN" of your A2 and the "AV OUT (Video OUT, Audio OUT)" of the external AV device.
Connect the line-in cable to the "AV IN" of your A2 and the Line Out (or earphone) jack of the external audio device.

■ Recording

There are four modes, Video, Audio, Radio and Built-in Mic when Record mode is selected.
Select the desired mode for recording and press the "C" button to start recording.
The recording file can be played in Movie and Music mode.
Recorded Video screen does not appear on the LCD.
When recording, battery consumption is higher than during normal operation, therefore fully charge the player before recording.

■ Scheduled Recording
Moe to Setup – System – Alarm mode.
There are three alarm modes (Movie Player, Music Player, FM Radio) and four scheduled recording modes.
When setting a scheduled recording, the power of the play automatically turns on at the specified time and recording starts by the specified setting.
For details, see 4. Setup feature description– 4. See the System section also.

AV OUT Usage

Connect external AV devices (TV, VTR, etc.) using the AV cable.

AV Out (View)
■ Connecting a Cable
Connect the AV cable to the "AV IN" of your A2 and the "AV IN (Video IN, Audio IN)" of the external AV device.
Change the AV device mode to an external input channel. For more information see the AV device manual.
Move the switch at the bottom of A2 to "AV OUT" and the screen from A2 will be displayed on the external AV device.

- If the screen does not display properly check the following.
- Check to see of the switch on the bottom of A2 is set to "AV OUT".
- Settings in Setup – Display – TV Standard are valid. (Select either NTSC or PAL)
- Make sure the connection cable is connected properly.
- Ensure the input jack and input channel are the same. (If connected to external input 1, must be set to external channel 1 for properly operation.)

Wallpaper Usage

Set a desired image as the wallpaper.

■ Wallpaper Image Type
jpg, png and bmp of 480 x 272 size can be set as the wallpaper. Larger images will be resized and smaller images will be positioned in the center of the screen.
Maximum image capacity supported is 1 million pixels.

■ Setting Wallpaper
Select the desired file to use as the wallpaper in Photo mode and move the lever towards >> and select Set Wallpaper from the popup menu.
If wallpaper is not set, enable wallpaper in Setup – Display – Wallpaper.
Wallpaper is unable to be set during movie or music playback.

Setup Mode Usage

Press the lever in Setup mode and 8 modes will be displayed again.
Move to the desired mode, press the lever and the Detailed Setting screen will appear.
Move the lever towards + or – to move up and down in the Detailed Setting screen. Move the lever towards << or >> to set values.
Some items are categorized depend on the mode in the Detailed Setting screen. To move between categories, move the lever towards << or >> when the cursor is placed on a category.
After setting an item, press the lever to apply and return to the Setup mode setting screen.
Press the "BACK" button to cancel the value set and return to the Setup mode setting screen.
For details on Setup items, see 4. See Setup feature descriptions.

• Selects the aspect ratio of movie files.
• If set to Auto, the aspect ratio is set to original percent. If set to either 16:9 or 4:3, original percent is ignored and the selected ratio will be indicated.
• If 4:3 ratio is selected, please use during AV OUT.
Subtitle (enabled)
• If there is a subtitle file (.smi), subtitle will be displayed on the screen with the image.
• In this case, the both names of the subtitle file and the video file to play must be the same and in the same folder location.

7. Music Player

General

Boundary
• Set the playback area of files or folders.
• If set to ALL, all music files are played and if set to Folder, only files within the selected folder are played.
• If set to Sub-folder, files within the selected folder and its subdirectories are played and if set to Playlist, only files listed in the Playlist are played.
• When files in the Playlist are played, the Boundary feature will automatically change to Playlist, and when files in a common folder are played again, feature automatically returns to the previous Boundary.
Repeat
• Within the range specified in Boundary, repeat playback can be set.
• If set to On, playback is repeated after all files within the range are played. If set to Current, only one file is played.
Shuffle
• Within the range specified in Boundary, random playback can be set.
• If set to On, files within the range are randomly played.

Display

Lyrics (LDB)
• Set to display lyrics of music files that contain lyric information.
• Music files without lyric information will not display lyrics even if this feature is set to On.
• For more information on lyrics, see our beginner's guide at www.iAUDIO.com.
Time Display
• Sets the time display of playing music files.
• If set to Elapsed, the elapsed playback time will appear and if set to Remain, the remaining playback time will be displayed.
8. Radio
General

Stereo
• Select from Stereo and Mono when listening to FM Radio.
• Radio broadcasts that only support mono, will not support the Stereo feature.
• If set to Stereo, unwanted static noise may be heard. In this case, select and use Mono.
Region
• Choose the appropriate country where you are listening FM radio.

9. Recorder
General

Line-in Volume
• Adjust the volume level coming into the AV IN.
Mic. Volume (Built-in Volumes)
• Adjust the volume level coming into the built-in microphone.
• Sound increases as much as the number goes higher.
Mic. AGC
• Automatically adjust the high and low sounds of the recordings.
• Responses sensitively as the number increases.

Video

Video Quality
• When recording Video, set the quality of the video file recording through the AV IN.
• Higher the bps and resolution is better the quality of video, but the size of the file becomes larger and more battery power is used.
Audio Quality
• When recording Video, set the quality of the audio file recording through the AV IN.
• Higher the bps is better the quality, but the size of the file becomes larger and more battery power is used.
Audio Channel
• When recording Video, set the channel of the audio file recording through the AV IN.

Audio

Line-in Quality
• When recording Audio, set the quality of the audio file recording through the AV IN.
• Higher the bps is better the quality of recordings, but the size of the file becomes larger and more battery power is used.
Line-in Channel
• When recording Audio, set the channel of the audio file recording through the AV IN.
Radio Quality
• When recording Radio, set the quality of the recording file.
• Higher the bps is better the sound quality, but the size of the file becomes larger and more battery power is used.
Radio Channel
• When recording Radio, set the channel of the recording file.
Mic Quality
• Set the quality of the file recorded with the built-in microphone.
• Higher the bps is better the quality of recordings, but the size of the file becomes larger and more battery power is used.

Hardware		
General features	Size	133.4(W) x 78.5(H) x 22(T) mm
	Weight	298g (common for 20 G/30 G)
	Operation temperature range	0℃ ~ 40℃
Video	Display	4 in., 480x272 resolution, 0.183 mm pixel pitch, 16 mega color Digital TFT LCD
	Video format	NTSC / PAL
Audio	Channel	Stereo
	Frequency range	20Hz ~ 20KHz
	Headphone output	Stereo, left 32mW + right 32mW (16W earphones)
	Signal to noise ratio	95dB
	Built-in speaker	Stereo
	Built-in microphone	Mono
FM radio	Frequency range	76~108 MHz (Country-specific frequency settings, 25 preset stations supported)
	Antenna	Earphone cord antenna
Power supply	Built-in battery	Lithium polymer 4300mAh
	Battery charge time	About 5 hours after AC adapter connection
	AC adapter	DC 5.0V, 2A
Storage device	Hard disk	1.8 in. 20G / 30G, FAT32 File System
USB Interface	USB Device	USB 2.0 High Speed (max. 480Mbps)
	USB Host	USB 2.0 Full Speed (max. 12Mbps)
PC environment	CPU : Pentium III 200Mhz or higher OS : Windows XP / 2000 / ME / 98SE RAM : 128MB or more CD-ROM Drive USB Port DirectX 9 or higher Windows Media Player 9 or higher QuickTime 6 or higher	

Applications	-Application specifications may change according to performance improvements.	
Movie Player	File format	AVI,ASF,WMV
	Video codec	DivX 3.11/4/5, XviD, MPEG4, WMV9 MP@LL **Note1**
	Video resolution	Max. 720x576, 30 fps
	Audio codec	MP3, AC3 6.1 channel down-mix, WMA
	Audio resolution	Max. 48KHz, 448 Kbps
	Subtitles	SMI format
	Continuous playback time	Max. 10 hr. **Note2**
Music Player	File format	MP3, WMA(ASF), OGG, WAV
	Audio codec	MPEG 1/2/2.5 Layer 3, WMA(ASF), Ogg Vorbis, Wave
	Audio resolution	8Kbps ~ 1.4Kbps (OGG supports up to Q10)
	ID3 Tag	ID3 V1, ID3 V2.2/V2.3/V2.4
	Lyrics	LDB
	EQ	5 bands, 7 sets (Normal, Rock, Jazz, Classic, Pop, Vocal, User)
	Sound field	JetEffect (BBE, Mach3Bass, MP3 Enhance, 3D Surround)**Note3**
	Visual effect	Sound spectrum**Note3**
	Music playback time	Max. 18 hr. **Note4**
Photo Viewe	File format	JPG, BMP, PNG
	Resolution	JPG – Max. 4 million pixels PNG – Max. 3 million pixels BMP – Max. 4 million (24 bit), 6 million (16 bit), 12 million (8 bit) pixels
Text Viewer	File format	TXT (EUC-KR (Korean), EUC-JP (Japanese), GB2312 (Simplified Chinese), Big5 (Traditional Chinese), ISO-8859-1 (Latin)), UTF-8 (Auto-detection for Unicode Documents with BOM Header), Unlimited file size

Note1 Videos created with MPEG4 QPEL (Quarter-pixel Motion Estimation) or GMC (Global Motion Compensation) options cannot be played in this player. WMV9 video supports 352 x 288 resolutions in Main Profile-Low Level format.
Note2 Video: MPEG4 SP, 480x272 / 24fps, Volume 20, Earphone output
Note3 Doesn't apply to OGG playback.
Note4 Audio: MP3 / 44KHz / 128kbps, Volume 20, Earphone usage, LCD Off

Record		- specifications may change according to performance improvements.
AV Recording	File format	ASF
	Video codec	MPEG4
	Audio codec	MPEG-1 Layer 3
Line-in, Mic., Radio Recording	File format	MP3
	Audio codec	MPEG-1 Layer 3
	Audio resolution	Max. 44.1kHz, 192 Kbps

Installation CD

The installation CD contains the world famous integrated multimedia program JetAudio VX and a file management program JetShell. A2 software, multimedia sample files and driver file for Windows 98 SE are also included in the CD.
Converting Files with JetAudio VX
1. Install and then run JetAudio VX.

2. Click "Convert Video" on the top to convert the video file.

3. From the Convert Video window, click "Add File" to select the files to convert.

4. Check the selected video files in the list.

5.After checking the folder location to save the converted files and presetting, press "Start" on the upper right corner to start conversion.

- Clicking "Preview" to check the converted screen without saving the file.
- To convert the file with subtitles or to change settings, click "Convert Options".

- Not all files are convertible. Files initially damaged before conversion may not be viewed on A2 even though conversion was successful.

Symptom	Explanation
Power does not turn on or is not working properly.	• If the built-in battery is or has been discharged, use the adapter to fully recharge it before use. • If the player does not turn on after it is charged, press the "RESET" button on the bottom side of the player and then turn on. • If the System folder is deleted, upgrade the firmware before use. • Check to see if the switch on the bottom side of the player is placed to "HOLD". If it is on "HOLD", the power button will not function.
Screen does not turn on even after the player is powered on.	Check to see if the switch on the bottom side of the player is placed to "AV OUT". If it is on "AV OUT", move the switch to "LCD".
Buttons do not function properly.	Check to see if the switch on the bottom side of the player is placed to "HOLD". If it is on "HOLD", the buttonx will not function.
Speaker does not work properly.	• Go to Setup – Sound – Speaker and check to see if it is set to Auto-Off or On. If it is set to Off, no sound is heard from the speaker. • Check to see if the volume is set to "0", then adjust the volume.
Button operation does not respond quickly during movie or music playback.	This is because the player was set to Power Save mode to save battery power. Buttons will operate normally after 3 to 4 seconds.
Nothing is heard from FM radio.	• FM radio reception may be poor or static may be heard depending where the player is used, such as inside buildings, subways or moving vehicles. Listening to FM radio may be impossible in areas shaded from radio transmissions. • Check to see if the earphone is connected to the player. This player does not have a separate antenna, therefore uses earphones as antennas to receive radio reception.
Noise is heard from recordings.	A small-sized hard disk is installed in the body of the player which may make noise that can be picked up during recording. Recording sound may not be even due to the characteristics of the digital device.
Video files do not play properly.	Play the video file on your computer. If the file plays on the computer without any problems convert it with JetAudio VX and then try playing it on your player again.
Cannot find files stored in the player.	Each mode only displays files that can be played in the corresponding mode. To view all files stored on the player, select Browser mode.
ŸComputer cannot recognize the player when connected.	• A separate driver must be installed on operating systems other than Windows 2000 and XP for the computer to recognize your player. • If the USB cable is connected to an USB port at the front of your computer or a separate USB hub, connect it to the USB port at the back of your computer.
There is a difference between the actual hard disk space and the indicated space. (e.g. 20 GB is indicated as 18.6 GB)	If the player disk space is 20 GB, then the player will normally have about 18.6 GB space. This is because the space recognized by both the hard disk manufacturer and your computer is different, and the space used for system files for normal player operation has influence in the actual disk space.
After saving hundreds of files in the Root folder, A2 does not work or malfunctions.	A2's hard disk uses FAT32 format. Due to the limitations of FAT, avoid saving too many files in the Root directory.
