RP250
Modeling Guitar Processor

RP WITH AudioDNA²

RP250

- **AudioDNA² DSP super-chip**
- **30-preset Quick Start Tone Library**
- **30-preset Quick Start Effects Chain Library**
- **89 total models**
- **54 Effect models – up to 11 at a time**
- **Up to 5-second delay**
- **21 Amp/Preamp/Acoustic models with A/B switching**
- **14 Cabinet Models**
- **Lexicon Reverbs**
- **60 Factory / 60 User presets**
- **2 x 2 streaming USB I/O**
- **5 seconds of delay**
- **6-character display**
- **¼" Stereo Outputs • ⅛" Stereo Headphone Output • ⅛" Aux Input • ¼" Instru-ment Input**
- **24 bit – 44.1kHz sampling rate**
- **High quality drum machine with 60 patterns**
- **Power supply included**

Take your new RP to a weekend jam and drop some jaws. The RP250 is dripping with tone that has to heard to be believed. Tone that deserves to be heard on stage and in the studio. But even if your new RP guitar modeling processor never leaves your practice room, you'll never run out of creative ways to use it.

USB connectivity for recording, preset editing/archiving/downloading and more.

The RP250 is ready to talk to your PC or Mac® computer: it has a built-in 24-bit 2-in/2-out USB interface. Lay down tracks with your favorite multitrack DAW software. Play back a mix or MP3 cut directly through your RP250 and jam along with it. Download a free copy of X-Edit™ Editor/Librarian from www.digitech.com and customize presets, upload and download new tones, including those from magazine web sites and our own thriving online player community.

AudioDNA². The power inside the pedal.

400% more horse-power. No wonder the RP250 sounds so good. You're looking at the world's most advanced audio processor, the "engine" that gives our new RP models so much more raw impact and subtle detail.

Other manufacturers use general-purpose, off-the-shelf chips. But creating the best guitar tone requires a 100% specialized, optimized processor.

Being total audio processing fanatics, our "Chip Wizard" engineers set out to create a super-processor specifically designed to power a whole new generation of effects and models.
The design team worked for over two years, literally re-defining audio signal processing at the chip level. Then our "Tone Guru" engineers — fresh from Production Modeling™ triumphs like the Jimi Hendrix Experience™ Artist Series pedal — set to work taking adavantage of all this new raw processing power.

When you hear what AudioDNA² does for the tone of the RP250 you'll agree it was all worth it.
DigiTech
The Power to Create

RP250

Up to 89 total models...and a unique new way to blend them together fast.

Accessing superbly detailed new models has never been easier!

Three steps to dial in the perfect sound with our new **Tone** and **Effects Library** knobs. You may never go any deeper into the infinitely-tweakable RP interface. New RP **Tone** and **Effects Libraries** let you access pre-designed combinations of models as fast as you can turn the knob. From mellow and bluesy to scorch-the-face-of-the-earth-raw, you're gonna find combinations that fit your playing style.

TONE LIBRARY

EFFECTS LIBRARY

1 Pick one of 30 TONE presets.

2 Pick one of 30 EFFECTS chains.

3 Dial in your effects level and rock on.
