A Kolor-ful Ride

There is a cruise missile loose in the Midwest, the 2019 Indian catalog cover bike! A one-of-a-kind custom owned by a legend in the industry: House of Kolor founder Jon Kosmoski.

He purchased the bike – a holdover at the end of the 2016 season - off the show floor . Then he went right to work making it his own. With some help from the factory and the aftermarket industry, the bike got a host of upgrades including Stage II cams, Tour Pack, heated grips and heated seat, pegs, lights and more.

The real showstopper though is the paintwork. More than 40 hours of work resulted in a true eye-popping final design. The bike's seams are a zinc silver flake. The two primary colors used are titled purple haze and taco teal – two colors that are not available over the counter. Kosmoski developed the colors, but they were not chosen to be put into production.

The airbrush work on the tank and fairing lowers was handled by artist Jeff Urman. The tomahawk design on the lowers was specifically designed to angle back for a nonaggressive look.

Kosmoski is very pleased with the results, and reports the engine mods make the bike a real treat to ride. And it is not just a display piece; he rides it on a regular basis. “You have to use the bike, enjoy it,” Kosmoski says. “That is what motorcycles are for.”

IMPORTANT INFORMATION:

EMISSIONS AND NOISE REGULATIONS

NOTE: The California Air Resources Board (“CARB”) and/or the Environmental Protection Agency (“EPA”) do not permit the use of aftermarket emissions-related part(s) that alter the performance of OEM emissions-related devices unless CARB has issued an Executive Order, other than on racing vehicles on closed courses. Check your local laws and manufacturer’s information. More California exhaust information is available at www.arb.ca.gov/.

NOTE: Aftermarket products, including but not limited to exhausts, catalytic converters, oxygen sensors, fuel/air controller modules, air filter kits, camshafts, O₂ eliminators, and carburetors and jet kits which alter, modify, or replace emission control devices or systems of an originally compliant highway motorcycle, are not legal for sale or street use in California unless they have been issued a CARB Executive Order. Aftermarket emissions-related products which have not been issued an Executive Order or which are not aftermarket Replacement Parts, as defined in Title 13, California Code of Regulations, Section 1900(b)(2), are authorized for closed circuit race use only. Products shown may be designed, manufactured, intended and sold for closed circuit race use only, and use of the same on public roads or lands may be a violation of local, state and/or federal laws. See manufacturer’s information and state and local laws to determine what is authorized for your use on your vehicle.

The following emissions-related defined terms are used in this catalog (PARTS WITH THE FOLLOWING DESIGNATIONS IN THIS CATALOG ARE NOT ILLEGAL FOR SALE IN CALIFORNIA UNDER CARB REGULATIONS):

- **“CARB E.O.”** means the specified Executive Order issued by CARB. An Executive Order constitutes an exemption by CARB from CA Vehicle Code 27156 and 38391, for sale of the part number for the make/model/year fitment(s) specified in the Executive Order.
- **“Replacement Part”** means any aftermarket part intended to replace an original equipment emissions-related part and which is functionally identical to the original equipment part in all respects which in any way affect emissions (including durability), or a consolidated part.
- **“Qualified Manufacturer Declared Replacement Part”** means any aftermarket part intended to replace an original equipment emissions-related part and which is functionally identical to the original equipment part in all respects which in any way affect emissions (including durability), or a consolidated part that has been evaluated and declared by the manufacturer to meet this definition and carry this categorization and designation label. This manufacturer has declared in writing that it has documentation, based upon sound engineering judgment, indicating the replacement part does not reduce the effectiveness of any required emission control device and it does not cause the modified vehicle/engine/equipment to exceed applicable emissions standards for that make/model/year fitment(s) advertised.

NOTE: Products shown may not conform to federal, state or local emissions and/or noise regulations.

WARRANTY

There is no warranty on exhaust pipes and mufflers with regard to any discoloration. Discoloration (blueing) is caused by tuning characteristics, i.e., cam timing, carburetor, etc., and is not caused by defective manufacturing. See the Chemicals and Lubes section for products that will help prevent or remove blueing.

Check your applicable laws and manufacturer’s publication(s) and/or website(s) for manufacturer’s warranty, maintenance, safety, mounting and any regulatory compliance/non-compliance information.

SIDE WINGS

- Expand comfort pocket, channeling air outward while “cleaning” the flow
- Adjust to suit rider preference
- Can be installed/removed with windshield intact – Santoprene pads grip the windshield but do not mar the surface
- “Ghost” shade – a neutral tint with 85% light transmission; barely noticeable, with just enough tint to make the edges disappear
- Side Wings fit all Memphis Fats windshields or similar windshields that measure either 3mm or 4.5mm thick (includes inserts for both sizes); feature injection-molded glass-filled nylon clamps in place of the billet aluminum; can be mounted along with Hot Wing
- Made in the U.S.A.

2350-0200	Side Wings	\$99.95

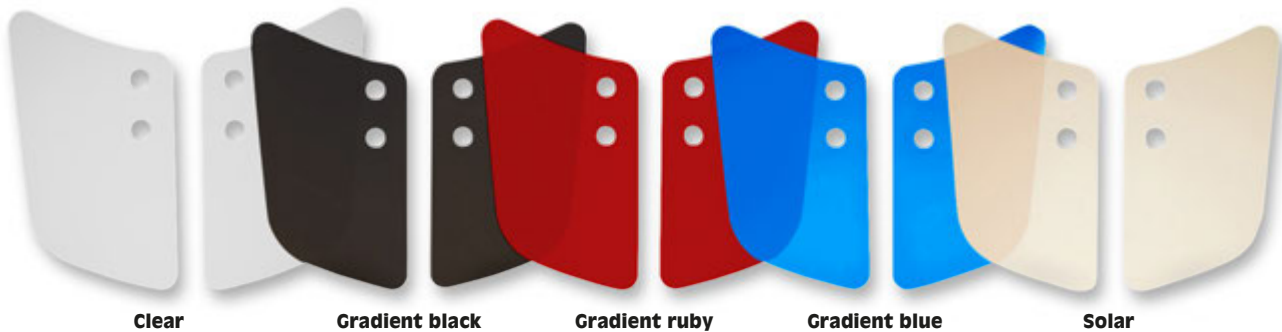

HOT WING

- Boost airstream upward – Venturi action speeds up the airstream while smoothing the flow – without buffeting
- Allows the use of a shorter shield; now you can easily look over your shield
- Made with “Ghost” shade – a neutral tint with 85% light transmission; barely noticeable, with just enough tint to make the edges disappear
- Uses lightweight, economical injection-molded glass-filled nylon clamps; fits Memphis Fats windshields or similar windshields that measure 3mm or 4.5mm thick (includes inserts for both sizes)
- Made in the U.S.A.

CUSTOM LOWERS PLASTIC

- Lowers work with Sportshields as well as Memphis Fats and Slim
- Extend coverage downward to shield rider from rain, wind and noise coming up from the road
- Made of the same high-quality materials as Memphis Shades windshields with matching tints
- Must purchase Lowers mounting hardware separately; see 2019 Drag Fatbook
- Sold in pairs

MEMPHIS SHADES BULLET FAIRINGS

- Strong, one-piece fairings constructed of high-impact aircraft-grade Lucite®
- Bold aerodynamic shape with a hint of outlaw styling designed to streamline today's low-slung cruisers
- Provide full torso coverage to virtually eliminate wind fatigue while allowing an unobstructed view of the countryside; your head is in clean air
- A machined groove outlines the smoke windshield section
- The lower section features an opaque glare-free matte coating on the inside that gives the outside a high-gloss black "factory" finish for a clean two-piece look; looks great as is, or can be easily painted to really achieve the next level of custom
- Custom fit, model-specific mounting kits feature Memphis Shades exclusive Trigger-Lock mounting system – on and off without tools, or wap out with Memphis Fats/Slim windshields, Sportshields or Batwing Fairing
- Made in the U.S.A.

TOUR RACK RISER KIT FOR 1/2" TUBES

- For Show Chrome accessory racks
- Provides more clearance under luggage racks, allowing for easy cleaning or getting to other accessories to fit below
- These Rack Risers universally fit 1/2" diameter tubes with a custom recessed bevel to securely fit and enhance the original rack legs
- They extend rack legs 5/8" and fit racks with 1/2" round leg
- Comes as a complete set of four Rack Risers with two sets of bolts; 4 x 6mm (M6) bolts and 4 x 1/4"-20 bolts, to replace the shorter bolts that come with most racks
- For best fit, place risers between the rack leg and the angled feet that come with Show Chrome Accessories racks

TOUR TRUNK RACKS

- Generous 20" x 12 1/2" luggage rack easily accommodates the largest luggage bags and comes with custom tapered mounting spacers which allows the rack to more easily conform to the curve of the trunk
- The tapered spacers are recessed to allow the rack to rest securely into the spacers which helps spread the load over the trunk lid to alleviate stress cracking
- Rubber washers under each spacer not only protect the bikes finish, but also assure a water light fit

- The manufactures trunk specs should be viewed for loading limits
- Designed specifically for the Indian trunk, its mounting legs align with the OEM mounting points making it easy to upgrade if you already have an OEM rack installed

KHROME WERKS

4" HP-PLUS® PERFORMANCE MUFFLERS

- Cat-back mufflers provide a deep, mellow exhaust tone
- Horsepower and torque gains over stock mufflers are achieved in part by an internal expansion chamber in the baffle core
- The steel baffle core is machine wrapped, first with a stainless steel wool, then with a high-temperature fiberglass blanket for acoustic longevity assurance
- Muffler shell is finished in highly polished, duplex nickel chrome
- Designed to enhance top-end power while retaining good low-end torque
- The one-piece, 16-gauge steel tubing muffler shell is finished in highly polished, duplex nickel chrome

- Mufflers feature black billet tips; mufflers for hard bag Chieftain models feature saddlebag protectors (shown)
- Install using factory mounting hardware, clamps and heat shields
- Sold in pairs
- Made in the U.S.A.

CRUSHER

CRUSHER MAVERICK SLIP-ONS

- Shed pounds and gain a 5% increase in horsepower without intake or header upgrades
- Slim 2.5" muffler diameter flaunts the Scout's smooth lines and matches the stock headers to preserve the lean profile of traditional staggered dual exhausts
- Aggressively-styled billet aluminum tips with high-temp black ceramic coating and brushed stainless steel banding
- Premium, chrome-plated steel
- High-flow baffles produce a throaty exhaust note when cracking the throttle
- 5% horsepower gain without intake, header or fuel mapping modifications
- Simple, bolt-on installation with included bracket and hardware
- Approximately 14 lb. lighter than stock mufflers
- Made in the U.S.A.

FLO STAINLESS STEEL, REUSABLE "SPIN-ON" OIL FILTER

- Made from laser-cut, medical-grade, 304 stainless steel micronic filter cloth, this filter provides 200% more filter area in many cases
- Stainless filter catches items down to 35 microns, which is about three times better than most good paper or brass filters
- Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 600° F
- Filter maintains consistent flow under all conditions including extreme heat, the presence of water, and cold start-ups where paper filters can flow so poorly that they often cause the bypass valve to open and allow unfiltered oil to enter your engine
- Should be the last filter an owner ever needs; this high tech filter technology is widely used in all types of auto racing including NASCAR, Indy type cars, Formula 1 and in the aerospace industry where filtration is of the utmost importance
- FLO reference # PCS1

HANDLEBAR CABLE KITS, CLUTCH CABLES, AND BRAKE LINES

- Take "cable calculation" headaches out of swapping handlebars
- Kits include the correct length brake/clutch lines to complete a handlebar swap; electrical wire extensions not included
- Stainless braided kits include clutch line, brake lines, chrome "T" brake line junction, banjo bolts, fittings and copper crush washers
- Black vinyl/stainless kits include black vinyl clutch line and black stainless brake lines with chrome fittings, banjo bolts and crush washers
- The midnight kits include stainless steel brake lines and clutch lines covered in a black smoke tinted coating with pure black fittings throughout; lines appear graphite or carbon fiber in appearance providing that ultra custom look and the black fittings seamlessly blend with blacked out controls and covers on the bike
- Individual components for all kits are available as listed
- Made in the U.S.A.

Sintered metal

BRAKE PADS

- Sintered metal brake pads are the OEM-type replacement pads for most bikes from the late 1970s to the present
- Sintered metal brake pads are proudly made in the U.S.A.; second-to-none in their stopping abilities and wear characteristics, while still providing excellent reduction in noise and dust
- Organic pads are OEM-type replacement brake pads for 1970s and earlier models

- Organic pads with aramid high-performance fibers are the perfect choice for polished or chromed rotors and billet steel rotors
- Both compounds of Drag Specialties brake pads are asbestos-, nickel- and lead-free

NOTE: If you are using aftermarket billet steel rotors, it is recommended you use our Organic pads with aramid high-performance fiber brake pads to avoid damage to them. Sintered pads are not recommended for billet steel rotors as the pad material is too aggressive for those rotors.

DP BRAKES

THE ORIGINAL SINTERED BRAKES

- DP Brakes brake pads are designed with sintered metal compounds to give your bike high-tech performance in all conditions
- Pads have a quick break-in period so you get maximum performance fast
- DP Brakes design and materials ensure consistent hard stops and fade-free performance
- Sintered metal compounds outlast more conventional organic or aramid fiber pads

STANDARD SINTERED METAL BRAKE PADS

- GG friction rated and made with DP Brakes' proven sintered metal material
- Gray-colored aluminum oxide-based ceramic material on rear of backing plate keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Pad compound gives equal performance in wet or dry conditions
- Ideal replacement for street and touring machines where durability is the prime requirement
- No brake fade

SPORT HH+ SUPERSPORT PADS

- Powerful, industry-high HH+ friction rating with no mileage penalty
- High-tech ceramic heat shield eliminates brake fade
- Dust-free compound design
- Quick break-in so you get maximum braking ability fast
- For front wheel use only

NOTE: For brake pad applications, see chart below.

BRAKE PADS

- SBS brake pads feature asbestos-free brake pad materials using patented Unified Composite Technology (UCT)
- UCT technology completely blends all brake pad materials into a balanced, unified pad
- This balance ensures no hot spots, glazing, premature fading or excessive rotor wear
- The result is powerful, fade-free braking performance, even in extreme conditions

STREET EXCEL SINTERED METAL PADS

- The best in sintered replacement pads for high-performance front (HS) and rear (LS) street applications
- Use advanced sintering process technology; perfect for sport riding
- The highest coefficient of friction in the lineup to provide maximum stopping power
- Formulation also offers high fade-resistance and quick cool-down under severe braking
- When you need to replace your worn sintered metal pads, choose STREET excel; the sinter compounds with the power to stop you

BRAKE PADS

ORGANIC BRAKE PADS

- The world's #1 selling organic disc brake pads
- EBC Organic brake pads contain Aramid fibers; these are man-made high-performance fibers used widely for their light weight, high strength, abrasion resistance and thermal stability
- Aramid fibers have high strength-to-weight, thermal stability and abrasion resistance to provide advantages over cheaper steel fiber-based products
- Provide excellent stopping power without noise and rotor galling, even on polished rotors
- Fingertip control and strong, predictable brake response

DOUBLE-H SINTERED METAL PADS

- Feature the HH friction rating – the highest in the industry
- Provide maximum brake effect and last twice as long as organic pads
- Sintered pads are made in the U.S.A.

SEMI-SINTERED "V" PADS

- All-new semi-sintered construction containing 30% copper by weight within an organic matrix
- This design has the long life of a sintered pad with the great feel and are more rotor friendly than the more aggressive sintered pads
- Can be used to replace organic or sintered metal compound pads

BRAKE PADS

- Galfer has more than 60 years of experience in brake pad friction material construction
- Multiple compounds available for all types of riding styles

SEMI-METALLIC CARBON

- Great feel and modulation; ideal choice when replacing OEM compound pads
- Long-lasting pad compound with minimal rotor wear
- Good performance in wet/dry conditions
- GG friction rated

HH SINTERED

- For aggressive street riding/sport use
- Excellent feel at the lever and power modulation
- Advanced ceramic composites are ready to withstand higher temperatures than regular semi-metallic carbon brake pads
- Great heat recovery and easy on brake rotor discs
- HH friction rated

HH SINTERED CERAMIC

- For aggressive street riding/sport use
- Excellent feel at the lever and power modulation
- Advanced ceramic composites are ready to withstand higher temperatures than regular semi-metallic carbon brake pads
- Ceramic-coated backing plate assists with brake temperature management and heat dissipation
- HH friction rated

EZ-ALIGN BRAIDED FRONT BRAKE LINES

- E-Z Align rotating caliper banjo feature for perfect no-kink fitments
- All fittings are polished and chrome or black chrome plated
- The industry's highest-quality braid available in two color choices to complement your bike; Sterling Chromite II® and Black Pearl braided with black wire
- Braid color and weave match on all Magnum control cables and brake lines
- Crystal-clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- Inner PTFE tubing braided with Aramid Fiber reinforcement provides the ultimate in high performance by greatly reducing line expansion
- Exceeds all DOT FMVSS-106 Specifications
- Made in the U.S.A.

FORK LOWERING KITS

- Give Cruiser bike front ends that custom lowered look by lowering the forks
- Your choice of 1" or 2" lowering height is available at time of installation
- To maintain proper balanced geometry, it is recommended lowering the rear of the bike the same amount as the front (Progressive Suspension Series shocks available for lowering the rear); see page 108
- Installing a lowering kit will decrease initial ground clearance; motorcycle will be lower to the ground, and care should be taken to avoid bottoming, especially over bumps or in turns

LEGEND REVO-A COIL SUSPENSION

- Provides improved plush ride quality, control, and resistance to bottoming out
 - Extended coil length has larger "sweet spot" without increasing overall shock length
 - Unique spring rate offers the ability to soften preload, reducing ride height and maintaining a smooth ride
 - Allows minimal preload adjustments when changing between riders' weights or loads
 - Adjusts by hand, no tools needed
 - Easy installation
 - Suspension alignment is provided by spherical bearings on both top and bottom
 - External knob has six adjustments allow fine-tuning of rebound
 - Provides optimum rebound performance for any given rider weight, personal ride quality preference, or personal riding style
 - Light to heavy riders can fine-tune ride preference
 - Black finish
 - Made in the U.S.A.
- NOTE: For solo rider only, with total weight of 250 lb. or less.

ADJUSTABLE HEIGHT PERFORMANCE SHOCK

- The proper way to lower your Indian while improving ride quality
- Shock is preset to 310mm length which lowers the bike 38mm (1 1/2") and spring rate is adjusted for a 200 lb. rider
- Both shock height and preload are adjustable
- Height is adjustable from factory height to 1 1/2" lower
- Preload adjustability allows the rider to set the spring preload to their individual weight
- Lowered position: Retains factory suspension geometry and provides improved ride quality even though bike is lowered. Unlike lowering links, which reduce ride quality by messing up the engineering of the rear suspension
