MHL MobileLink X2 mobile device integration enables complete control of your smartphones and tablets. Conveiently launch any application, post social media updates, or play your own videos and all other content on your mobile device. Your smart device display is mirrored to the head units larger LCD screen, and all commands are sent via Bluetooth 3.0 connection. MHL MobileLink X2 ensures safe, hands-free operation of your smart device without the distractions of locating & handling the device. MHL MobileLink X2 integration cables are available for select Android enabled devices.

Bluetooth V3.0 with Enhanced Data Rate increases traditional data transfer rates to 2.1 Mbit/s. This lightning quick information transfer increases clarity & virtually eliminates unwanted distortion during calls and wireless MP3 audio playback. Most Bluetooth enabled Smartphones will transfer phone book contacts, view recent call logs, and stream MP3 audio tracks.

MHL
Mobile High-Definition Link

MHL MobileLink X1 opens mirroring of smartphones and tablets to enabled in-car entertainment systems. Share with other passengers your own movies, social networking content, internet videos, or anything else your mobile device displays. Easily follow your smartphone's navigation commands on the larger head unit LCD instead of the smaller smart phone display. MHL MobileLink X1 replicates the image of your smart device onto the LCD screen of several in-car entertainment products, including select MobileLink X1 source units, headrests, and overhead displays. MHL MobileLink integration cables are available for select Android and iOS smart devces.

Bluetooth V3.0 with Enhanced Data Rate increases traditional data transfer rates to 2.1 Mbit/s. This lightning quick information transfer increases clarity & virtually eliminates unwanted distortion during calls and wireless MP3 audio playback. Most Bluetooth enabled Smartphones will transfer phone book contacts, view recent call logs, and stream MP3 audio tracks.

Digital Signal Processing features include a digital 7-band equalizer with 8dB boost or cut, custom presets & factory presets. Additional DSP functions include variable subwoofer level control with lowpass crossover, loudness adjustment, & sound staging controls.

MobileLink X1 models include variable color front panel illumination. Choose a specific color to match your interior lighting scheme or random color change for a full color spectrum effect.

Play audio, video, and picture files through MobileLink X1 from a 32GB SD card, USB flash drive, or any DVD/R and CD/R. Supports MP3, WAV, MP4, and more.

Farenheit INGENIX powered source units use a proprietary engine featuring 700 MHz CPU processor & WIN CE 5.0 operating system. Commonly found in compact netbooks. Such lightning fast function processing has not been possible in an aftermarket automotive multimedia system, until now. INGENIX programming brings unique feature applications to your fingertips.
Go ahead, take a second look....

The primary menu of the **INGENIX** source units has an appeal that you might expect only from a computer. The LED back light Full HD quality 800x480 screen resolution yields a crisp image. Drag any mode application icon from the slide menu at the bottom of the screen and drop it onto the desktop as a shortcut. Utilize the drop down widget menu for quick settings access. The main menu background and brightness settings can be set to change automatically at night. There's even a scrolling marquee banner displaying your short message.

Built-in GPS Navigation

All Ingenix powered source units come standard with GPS turn-by-turn navigation for USA & Canada (other countries available). Set your destination and enjoy text-to-speech directions with lane guidance. Additional features include favorites list, programmable home destination, destination fuel estimates, multi-lingual, multi-gender voices, speed limit warnings, and more. Maps and POI data by TomTom.

Picture-in-Picture

INGENIX is the first to bring the Picture-in-Picture function into the car. PIP allows uninterrupted video playback while simultaneously viewing the GPS navigation map in real time, as it happens. The picture can be re-sized and positioned to 3 different ratios.

Streaming Bluetooth Music (A2DP)

Pair your Bluetooth enabled cell phone, Smartphone, iPhone, or iPod Touch for wireless MP3 payback. Use the touch screen controls for basic operations.

Bluetooth V2.1 + EDR Connectivity

Bluetooth V2.1 with Enhanced Data Rate increases data transfer rates to 2.1 Mbit/s. This lightning quick information transfer increases clarity & virtually eliminates unwanted distortion during calls and wireless MP3 audio playback. Most Bluetooth enabled Smartphones will transfer phone book contacts, view recent call logs, and stream MP3 audio tracks.
