

## 50GHz Interleaver

### Features:

- Wide passband and low dispersion
- Passively athermalized
- High isolation and low insertion loss
- Fully qualified to Telcordia 1209/1221
- Compact size
- RoHS compliance

The Finisar 50G Interleaver efficiently demultiplexes (or multiplexes) 50G spaced channels into two sets of 100G spaced channels, which is the best solution to upgrade the existing 100G spacing system and cost saving to the equipment manufacturer. This passively athermalized interleaver offers exceptional performance in an ultra-compact form factor.
