Camera Setup (Canon A1000IS)
1. Use "P" Program mode. Pre-flash is present in this mode.
2. Set ISO to 80

NOTE: In "macro" mode, the aperture stops down to f8.0.If over-exposure occurs, enable Macro Mode setting. If over-exposure continues, back away from the subject and then zoom in as necessary. Camera will focus far away even if Macro Mode is on.

Ikelite W-20 Wide-Angle Conversion Lens #6420
An external wide angle conversion lens increases angle of coverage so you can get much closer to your subject while still fitting everything in the frame. Add an Ikelite W-20 or other wide-angle lens with an Ikelite accessory port adapter. Use for increased color and clarity in any conditions.

NOTE: Slight vignetting may occur at widest angle camera lens setting. Zoom in slightly to eliminate, or crop the image in post-processing.

#9306.81   67mm Threaded Adaptor
Allows attaching Ikelite W-20, Epoque, and Type II Inon screw-on lenses with 67mm threads. Includes larger size removable flash deflector.
#9306.80   Bayonet Mount Adaptor
Allows attaching of the Inon UWL-105AD bayonet style lenses. Includes larger size removable flash deflector. Vignetting will occur at wide angle settings with these lenses. Zoom in or crop the image to eliminate vignetting.
