iSimple

Get Connected®

Founded in 2007, iSimple is a leading name in car integration kits and accessories for personal electronics. Built on a commitment to innovation, our branding, products and distinctive logo all embody a simple phrase that started as a tagline and grew into a mantra for everything we do: "Get Connected." Sure, you could take "Get Connected" to simply mean plugging your phone into your car. But we do so much more than that…

We connect people to a world of music and entertainment through their car radio. We help people stay connected to each other with hands-free calling. We connect people with products that let them enjoy all this while maximizing driver safety. And, we help dealers connect with their customers by offering dynamic packaging, POS displays and merchandising options.

Additionally, we stay connected to the latest advances in technology so we can deliver solutions that meet the needs of everyday drivers, both today and tomorrow.

Get Connected®

Three Categories – Hundreds of Ways to Get Connected

Professional Installation Recommended
Professional/DIY Installation
Plug-n-play Solutions

Table of Contents

| Professional Installation Recommended

The whole idea of "OEM integration" is that the end user gets new functionality from their car radio without changing the overall look and feel of their system. iSimple's professionally installed recommended products require a fairly high degree of knowledge about car audio data systems and/or steering wheel controls. Once installed, the end user will enjoy outstanding sound quality, battery charging for their mobile device and intuitive control over their music through the car's radio buttons. Additionally, some of these iSimple kits offer (or can be upgraded to offer) hands-free Bluetooth calling and audio streaming, HD Radio, SIRIUS/XM satellite radio and more.

Premium Factory Radio Interface for iPod, iPhone or iPad, Android and Other Smartphones for Select 2003 - 2014 Vehicles

| Professional / DIY Installation
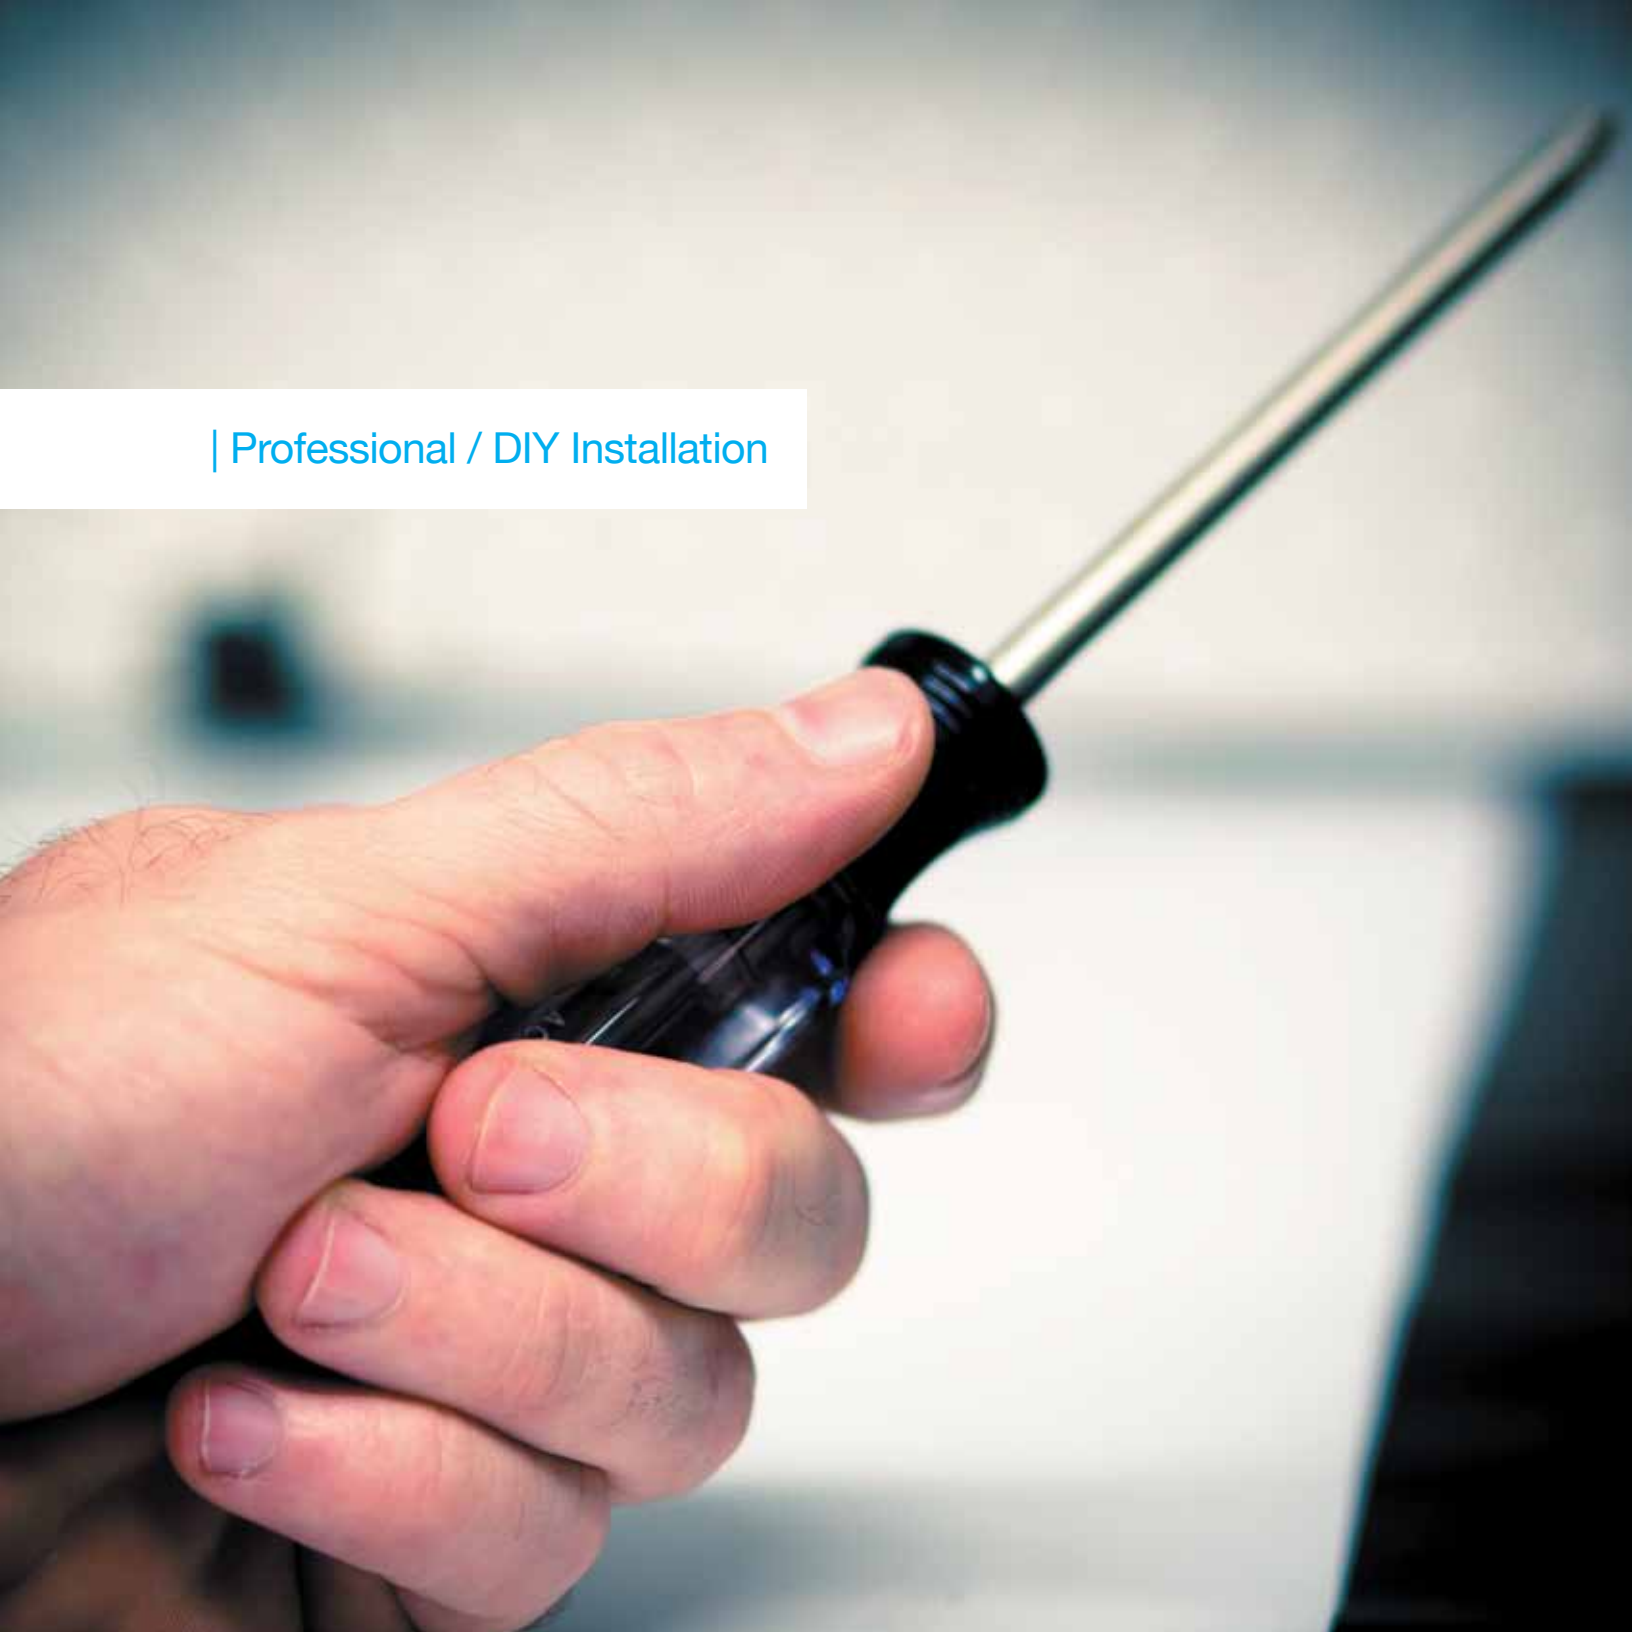

Not every iSimple integration kit requires the services of a trained installer (although, we would always recommend it). Some – like the ones in this section – can be installed by a do-it-yourselfer who has a basic knowledge of car audio systems and a free afternoon to spend in the garage. Most of these kits are universal – meaning they will work with virtually any factory or aftermarket radio – and deliver clear, vibrant sound through your car speakers. Even better, some of these products will provide extra features like battery charging for your mobile device and/or hands-free calling.

Hands-free Calling and Music Streaming Kit with
Control Button for Smartphones
TranzIt BLU HF (ISFM2351)

• Hands-free calling
• Wireless audio streaming
• Wireless control of music playback with control button
• Launch your Phone's VR function to: Text, E-mail, Get directions
