

TALKING AUTO-INFLATION Blood Pressure Monitor UA-767T

Fast. Easy. Accurate.

One button, fully automatic blood pressure monitor ideal for the visually impaired.

A&D Medical adds the convenience of an audio announcement of measurement results to the popular One Step Auto-Inflation monitor. The cuff is automatically inflated at the touch of a button. When the measurement is complete, blood pressure and pulse are clearly heard as they are displayed, offering independent monitoring to those who prefer audio results in addition to digitally displayed results. The unit shuts off automatically after four announcements of the measurement or may be stopped at any time by pressing the start button. A stereo jack for headphones enhances privacy and convenience (headphones not included).

UA-767T Talking Auto-Inflation

To obtain an accurate reading, it is important to use the correct cuff size. A cuff that is too small will result in a higher than expected reading and a cuff that is too large will result in a lower than expected reading. The UA-767T Talking Auto-Inflation unit comes in three different cuff sizes to accommodate your customers' needs.
