SCAN ANYTHING ANYWHERE IN JUST SECONDS

## A Breakthrough In Scanning Technology

The DocuPen has gained worldwide recognition from its patented ingenious technology for being the smallest Full Page battery operated scanner. We have now developed the ability to scan color in our newest addition to the DocuPen line, the RC800.

Weighing less than 2 oz, powered by a rechargeable battery and boasting 8MB on-board memory the tiny device is perfect for professionals and students alike. The dual-roller guiding system and optical tracking technology further enhance the user experience by providing a smooth and accurate scanning operation. The MicroSD-Transflash memory card slot adds endless capacity, making the DocuPen RC800 the ultimate companion for the road warrior, the small office and home office use.

Take the DocuPen with you wherever you go to capture information when you need it. Use the DocuPen in your office for the convenience of desktop scanner without the space, for sending email attachments.

The DocuPen RC800 Color comes with PaperPort SE software that offers many features and benefits. The software will manage your scanned documents and connect to your existing programs such as Outlook Express, Winfax, Notepad, Paint, Adobe Photoshop, word, Powerpoint and Excel.

After transferring your scanned documents you can easily print, ocr, fax and e-mail them as well as exporting them into different formats including BMP, JPG, PCX, DCX, TIFF.

Make changes to your scanned documents with the software editing tools such as: crop, rotate, adding annotations, high-lighting text and drawing with a freehand tool.
