Introduction

Congratulations on your purchase of the RF-51SDCD sound card. This sound card provides better quality surround audio for your games, movies, and music than basic motherboard audio.

Minimum system requirements

- Intel® Pentium® 4 1.6 GHz, AMD® Athlon™ XP 2000+ processor or faster (Pentium 4 2.2 GHz, AMD Athlon XP 2400+ processor or faster recommended)
- Intel, AMD, or 100% compatible motherboard chipset
- Microsoft® Windows® 7, 32-bit and 64-bit, Microsoft® Windows Vista® 32-bit and 64-bit with Service Pack 1 or higher, Windows XP Professional x64 Edition and Windows XP Service Pack 3
- 1 GB RAM (2 GB for Windows 7 64-bit recommended)

- 600 MB of free hard disk space
- Available PCI 2.1 or higher compliant slot
- Amplified speakers (available separately)
- CD/DVD-ROM drive required for software installation

Sound card components

Item	Description	Function
1	Optical S/PDIF Out jack	Connects to recording devices with optical connectors (for example, digital audio tape recorders, minidisc recorders, or external hard disk recorders).
2	Line In/Mic In jack	Connects to an external microphone for voice input. Also connects to analog devices like music synthesizers and other line-level sources.
3	Line Out 1 jack	Connects to front left and front right inputs on powered analog speakers or a multichannel home theater receiver for audio output.
4	Line Out 2 jack	Connects to rear left and rear right inputs on powered analog speakers or a multichannel home theater receiver for audio output.
5	Line Out 3 jack	Connects to center and subwoofer inputs on powered analog speakers or a multichannel home theater receiver for audio output.

Setting up the sound card

Installing the sound card

To make sure you install your sound card correctly, check your motherboard manual.

To install your sound card:

- 1 Turn off your computer, then unplug the power cord from your power supply.
- 2 Open your computer case following the directions provided in your case manual.
- 3 Find an open PCI slot and remove the slot cover for that slot from the back of your computer.
- 4 Insert the sound card in the PCI slot and secure with the screw you removed from the slot cover.
- 5 Close your computer case and connect the AC power cord to the power supply.

Installing the drivers

Note: Install the drivers and applications before using the sound card.

To install the Windows drivers:

- 1 After you have installed your audio card, Windows automatically detects your audio card and searches for device drivers.
- 2 Insert the Installation CD into your CD/DVD drive. If it does not run automatically, do the following:
Click **Start**, then **My Computer** (XP).
- OR -
Click **Start**, then **Computer** (Vista).
- OR -
Click the **Windows Explorer** icon on the task bar, then click **Computer** (Windows 7).
- THEN -
Right-click the CD/DVD drive icon, and then click **Open AutoPlay** or **Autoplay**.
- 3 Follow the instructions on the screen to complete the installation.
- 4 When prompted, restart your computer.

Reinstalling drivers and applications

You may need to reinstall some or all of the audio applications and device drivers to correct problems, change configurations, or upgrade outdated drivers or applications.

To reinstall drivers and applications in Windows 7 or Windows Vista:

- 1 Click **Start, Control Panel**, then **Uninstall a program**.
- 2 Select your audio card's entry.
- 3 Click **Uninstall/Change**.
- 4 In the *InstallShield Wizard* dialog box, select the **Repair** option.
- 5 If prompted, insert the installation CD into your CD/DVD drive, then click **OK**.
- 6 To repair an application or driver, select the respective check box, then click **Next**.
- 7 Restart your computer when prompted.

To reinstall drivers in Windows XP:

- 1 Click **Start, Settings, Control Panel** or **Start, Control Panel**.
- 2 Double-click the **Add/Remove Programs** icon, then click the **Change or Remove Programs** tab.
- 3 Select your audio card's entry.
- 4 Click **Change/Remove**.
- 5 In the *InstallShield Wizard* dialog box, select the **Repair** option.
- 6 If prompted, insert the Installation CD into your CD/DVD drive, then click **OK**.
- 7 To repair an application or driver, select the respective check box, then click **Next**.
- 8 Restart your computer when prompted.

You can now check if the reinstalled software works properly.

Uninstalling Drivers and Applications

You may need to uninstall some or all of the audio applications and device drivers to correct problems, change configurations, or upgrade outdated drivers or applications.

Before you begin, close all the audio applications. Applications that are still running during the uninstallation will not be removed.

Uninstalling drivers and applications in Windows 7 or Windows Vista:

- 1 Click **Start, Control Panel**, then **Uninstall a program**.
- 2 Select your audio card's entry.
- 3 Click **Uninstall/Change**.
- 4 To remove all drivers and applications;
In the *InstallShield Wizard* dialog box, select the **Remove All** option, then click **Yes**.
- OR -
To remove selected drivers or applications;
In the *InstallShield Wizard* dialog box, click **Remove**, then select the check box of the application or driver you want to uninstall, then click **Next**.
- 5 Restart your computer when prompted.

Uninstalling drivers and applications in Windows XP:

- 1 Click **Start, Settings, Control Panel** or **Start, Control Panel**.
- 2 Double-click the **Add/Remove Programs** icon, then click the **Change or Remove Programs** tab.
- 3 Select your audio card's entry.
- 4 Click **Change/Remove**.
- 5 To remove all drivers and applications;
In the *InstallShield Wizard* dialog box, select the **Remove All** option, then click **Yes**.
- OR -
To remove selected drivers or applications;
In the *InstallShield Wizard* dialog box, click **Remove**, then select the check box of the application or driver you want to uninstall, then click **Next**.
- 6 Restart your computer when prompted.

You can now install the original or updated device drivers or applications. For more information, see "Installing selected drivers or applications" on page 7.

Installing selected drivers or applications

Installing selected drivers or applications in Windows 7 or Windows Vista:

- 1 Click **Start, Control Panel**, then **Uninstall a program**.
- 2 Select your audio card's entry.
- 3 Click **Uninstall/Change**.
- 4 In the *InstallShield Wizard* dialog box, select the **Add** option to add new software components to your existing installation.
If prompted, insert the Installation CD into your CD/DVD drive, then click **OK**.
- 5 Select the application or driver check box, then click **Next**.
- 6 Restart your computer when prompted.

Installing selected drivers or applications in Windows XP:

- 1 Click **Start, Settings, Control Panel** or **Start, Control Panel**.
- 2 Double-click the **Add/Remove Programs** icon, then click the **Change or Remove Programs** tab.
- 3 Select your audio card's entry.
- 4 Click **Change/Remove**.
- 5 In the *InstallShield Wizard* dialog box, select the **Add** option to add new software components to your existing installation.
If prompted, insert the Installation CD into your CD/DVD drive, then click **OK**.
- 6 Select the application or driver check box, then click **Next**.
- 7 Restart your computer when prompted.

Connecting the speakers

The connectors and associated components shown here may be different from that of your speaker system. Consult the User's Guide of your speaker system to identify similar input connectors. The cables shown here are available separately.

Connecting analog speakers

You can connect analog speaker systems for up to 5.1 channels. For more information on the appropriate jacks and cables to use for your speaker system, refer to the following speaker configurations.

2.1 channel analog speakers

#	Jack, connector, or cable
1	Line Out 1 jack
2	2-channel audio cable
3	Speaker system audio input jack

Note: You can use the speaker cables that were bundled with your speakers.

4.1 channel analog speakers

#	Jack, connector, or cable
1	Line Out 1 jack
2	Line Out 2 jack
3	4-channel audio cable
4	Speaker system audio input jacks (front and rear)

Note: You can use the speaker cables that were bundled with your speakers.

5.1 channel analog speakers

#	Jack, connector, or cable
1	Line Out 1 jack
2	Line Out 2 jack
3	Line Out 3 jack
4	5.1-channel audio cable
5	Speaker system audio input jacks (front, rear, and center/subwoofer)

Note: You can use the speaker cables that were bundled with your speakers.

Connecting digital speakers

#	Jack, connector, or cable
1	Optical S/PDIF out jack
2	Optical audio cable
3	Speaker system optical audio input jack

Note: You can use the speaker cables that were bundled with your speakers. The optical cable is available separately.

Positioning your speakers

Good speaker placement can enhance your listening experience, while careless placement can make good audio systems sound bad. For detailed speaker placement tips, refer to your speaker system's User's Guide.

#	Speaker component
1	Subwoofer
2	Left front speaker
3	Center speaker
4	Right front speaker
5	Right rear speaker
6	Left rear speaker

Connecting peripherals

Your audio card works seamlessly with many external devices. To connect these peripherals, refer to their relevant sections below.

Watching DVDs

Connecting a multichannel home theater receiver

If you have a multichannel home theater or A/V receiver, connect it directly to the audio card's Line Out 1, Line Out 2, and Line Out 3 jacks as shown below. For more information on multichannel home theater receiver speaker connections, consult the User's Guide of your multichannel home theater receiver.

Front

#	Jack, connector, or cable
1	Line out 1 jack
2	3.50 mm (1/8 inch) stereo-to-RCA cable (not provided)
3	Left front input jack (A/V receiver)
4	Right front input jack (A/V receiver)

Rear

#	Jack, connector, or cable
1	Line out 2 jack
2	3.50 mm (1/8 inch) stereo-to-RCA cable (not provided)
3	Left rear input jack (A/V receiver)
4	Right rear input jack (A/V receiver)

Center/subwoofer

#	Jack, connector, or cable
1	Line out 3 jack
2	3.50 mm (1/8 inch) stereo-to-RCA cable (not provided)
3	Center input jack (A/V receiver)
4	Subwoofer input jack (A/V receiver)

Creating music

Put together your own compositions consisting of audio inputs from an electric guitar, a synthesizer or a microphone. You can also connect a pre-amp FX box for your electric guitar to the Line In/Mic In jack.

#	Jack, connector, or cable
1	Line in/Mic in jack
2	Microphone
3	Pre-amp FX box
4	Electric guitar

Software suite

The following software lets you access the rich features of your audio card.

To learn more about each application, refer to its online Help. Depending on the application, you can do this by clicking the question mark on the toolbar of the application, or selecting **Help Topics** from the Help menu.

For Windows 7 or Windows Vista only

- Audio Control Panel
- Audio Center
- Volume Panel

For Windows XP only

- Device Control
- Surround Mixer
- Speaker Settings
- EAX Settings

Notes

- The applications included with your audio device may differ from those described here. Your audio card may also come with third party applications.

- Some applications are available for certain operating systems only.

Specifications

Rocketfish 5.1 Audio Card

- PCI Specification Version 2.1 compliant
- Professional quality digital mixing and equalization

Flexible Mixer Control

- Selectable input source or mixing of various audio sources for recording
- Adjustable master volume control

- Front and rear balance control
- Separate bass and treble control

EAX Audio Technology

- Creative EAX® Audio Technology redefines your gaming and music experience with true-to-life 5.1 audio and different environment settings for realistic and immersive 3D positional audio experience.

CMSS

- CMSS® upmixes ordinary stereo sources (CDs, VCDs, WAVs, or MP3s) to virtual 5.1 channels

Connectivity

Audio Inputs

- One 3.5 mm (1/8") stereo jack for analog Line In or Microphone In

Audio Outputs

- One Optical S/PDIF connector for digital output
- Three 3.5mm (1/8") stereo Line Out jacks for analog output:
 - Front left/Front right
 - Rear left/Rear right
 - Center/Subwoofer channel

Troubleshooting

This section provides solutions to problems you may encounter during installation or normal use.

Problem	Suggestion
No sound from the speakers	<ul style="list-style-type: none"> • Make sure that the speakers are connected to your sound card's output. • Make sure that you have selected the correct speaker configuration in the application.
No audio output when playing digital files (WAV, MIDI, or AVI clips)	<ul style="list-style-type: none"> • Make sure that the speakers' volume control is set to mid-range. • Make sure that your powered speakers or home theater receiver are connected to the Line Out jacks. • Make sure that you have selected the correct speaker configuration in the application.
There is no audio output when playing audio CDs or games that require a CD	<p>By default, digital CD playback is already enabled in Windows 7 and Windows Vista. To solve this problem in Windows XP, enable digital CD playback:</p> <ul style="list-style-type: none"> • Click Start, Settings, Control Panel. The <i>Control Panel</i> window opens. • Double-click the System icon. The <i>System Properties</i> dialog box opens. • Click the Hardware tab, then click Device Manager. • Double-click the DVD/CD drives icon. Your computer drives appear. • Right-click the disk drive icon. A menu appears. • Click Properties. • In the Digital CD Playback box of the next dialog box, click the Enable digital CD audio for this CD-ROM device check box to select it.
Problems with multiple audio devices	
The other installed audio card is not working well	<ul style="list-style-type: none"> • You may have an existing audio device installed in your computer. The audio device may be an audio card or an onboard audio chipset. Before you install your Rocketfish 5.1 audio card, we recommend that you completely uninstall and remove your existing audio device. Operating multiple audio devices in your computer may introduce usability issues. <p>- OR -</p> <ul style="list-style-type: none"> • If your computer detects an installed audio card during the installation of your Rocketfish 5.1 audio card, a message box recommending that you completely uninstall and remove the older audio device will appear. Click Yes to continue with the installation of the Rocketfish 5.1 audio card. After the installation is complete, uninstall the existing card and remove the audio card from your computer.
The onboard audio chipset is not working well	Disable your computer's onboard audio chipset. See your computer's motherboard documentation for details.

One-Year Limited Warranty

Rocketfish Products ("Rocketfish") warrants to you, the original purchaser of this new **RF-51SDCD** ("Product"), that the Product shall be free of defects in the original manufacture of the material or workmanship for one (1) year from the purchase of the Product ("Warranty Period"). This Product must be purchased from an authorized dealer of Rocketfish brand products and packaged with this warranty statement. This warranty does not cover refurbished Product. If you notify Rocketfish during the Warranty Period of a defect covered by this warranty that requires service, terms of this warranty apply.

How long does the coverage last?

The Warranty Period lasts for one year (365 days), beginning on the date you purchased the Product. The purchase date is printed on the receipt you received with the product.

What does this warranty cover?

During the Warranty Period, if the original manufacture of the material or workmanship of the Product is determined to be defective by an authorized Rocketfish repair center or store personnel, Rocketfish will (at its sole option): (1) repair the Product with new or rebuilt parts; or (2) replace the Product at no charge with new or rebuilt comparable products or parts. Products and parts replaced under this warranty become the property of Rocketfish and are not returned to you. If service of Products and parts are required after the Warranty Period expires, you must pay all labor and parts charges. This warranty lasts as long as you own your Rocketfish Product during the Warranty Period. Warranty coverage terminates if you sell or otherwise transfer the Product.

How to obtain warranty service?

If you purchased the Product at a retail store location, take your original receipt and the Product to the store you purchased it from. Make sure that you place the Product in its original packaging or packaging that provides the same amount of protection as the original packaging. If you purchased the Product from an online web site, mail your original receipt and the Product to the address listed on the web site. Make sure that you put the Product in its original packaging or packaging that provides the same amount of protection as the original packaging.

Where is the warranty valid?

This warranty is valid only to the original purchaser of the Product in the United States, Canada, and Mexico.

What does the warranty not cover?

This warranty does not cover:

- Customer instruction
- Installation
- Set up adjustments
- Cosmetic damage

- Damage due to acts of God, such as lightning strikes
- Accident
- Misuse
- Abuse
- Negligence
- Commercial use
- Modification of any part of the Product, including the antenna

This warranty also does not cover:

- Damage due to incorrect operation or maintenance
- Connection to an incorrect voltage supply
- Attempted repair by anyone other than a facility authorized by Rocketfish to service the Product
- Products sold as is or with all faults
- Consumables, such as fuses or batteries
- Products where the factory applied serial number has been altered or removed

REPAIR REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS YOUR EXCLUSIVE REMEDY. ROCKETFISH SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR THE BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON THIS PRODUCT, INCLUDING, BUT NOT LIMITED TO, LOST DATA, LOSS OF USE OF YOUR PRODUCT, LOST BUSINESS OR LOST PROFITS. ROCKETFISH PRODUCTS MAKES NO OTHER EXPRESS WARRANTIES WITH RESPECT TO THE PRODUCT, ALL EXPRESS AND IMPLIED WARRANTIES FOR THE PRODUCT, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTIES OF AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO THE WARRANTY PERIOD SET FORTH ABOVE AND NO WARRANTIES, WHETHER EXPRESS OR IMPLIED, WILL APPLY AFTER THE WARRANTY PERIOD. SOME STATES, PROVINCES AND JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE OR PROVINCE TO PROVINCE.
