

HD 570 Dynamic Headphone

The HD 570 Symphony are audiophile-quality, open dynamic stereo headphones with an advanced diaphragm design that eliminates standing waves for warm, natural sound. They are suitable for use with hi-fi and recording systems of the highest quality, in particular CD and DVD players or DAT and MD recorders.

Features—Benefits

- High-definition hi-fi stereo headphones
- BioNetic design for unparalleled comfort
- Superbly spatial, transparent sound reproduction
- Extremely lightweight voice coils for fast transient response
- Innovative damping element for controlling the diaphragm oscillation, optimally matches the headphones to all sound sources
- Detachable, robust, single-sided connection cable made from Kevlar-reinforce OFC copper
- Velour earpads

Technical Data

Frequency response	18–22,000 Hz
Transducer principle	dynamic, open
Frequency characteristic	diffuse field equalized
Nominal impedance	64 Ω
Characteristic SPL at 1 kHz	102 dB
Load rating	200 mW
THD	< 0.2 %
Ear coupling	circumaural
Contact pressure	approx. 2.5 N
Weight (without cable)	approx. 7.4 oz
Connector	1/8" stereo mini jack plug with adapter to 1/4" stereo jack plug
Connection cable	3 m, detachable single-sided OFC copper cable

Optional Accessories

Stereo volume control	HZR 6
