

Channel 69 equipment rate card – Version 4.0

Disclaimer

Rate card Version 4.0 has been updated with additional manufacturers, together with some changes to descriptions, prices and final funding available. This will affect a small number of claims already made. Due to these amendments /additions, you should review your claim. A small number of queries remain outstanding as discussions with manufacturers were not concluded in time to meet the deadline for the publication of this rate card. **There is no funding for equipment racks, waterproof pouches and other ancillary items such as separate battery packs as they are not equipment that tunes to Channel 69**

While every reasonable effort is made to ensure that the information provided on this rate card is accurate, no guarantees for the currency or accuracy of information are made and the rate card is provided for indicative purposes only. Nothing in this rate card constitutes an offer of funding to any individual or company and applications for funding will be assessed individually and on the basis of Ofcom and Government decisions.

How to use the rate card

Use of the rate card: By using the Ctrl F (find function) you will be able to navigate directly to a specific product line e.g. Press and hold down the Ctrl key on your keyboard (this key can be found at the bottom right-hand corner of the keyboard) press the F key and the find box will appear see image.

~~Enter the number of the product you wish to search for and press the return key, this will guide you directly to the item you are searching for.~~
You are also able to search in the same manner by entering the product name.

Explanation of rate card headings

- | | |
|---------------------------------------|---|
| a) Item number: | The reference number we have used in the rate card for each item of channel 69 equipment. |
| b) Brand: | The manufacturer of the equipment. |
| c) Model description: | The manufacturer's description of the equipment. |
| d) Series number: | The manufacturer's identification name or number for the equipment. |
| e) Funding available: | The amount of funding provided for each item of channel 69 equipment that is surrendered in working order. This will be approximately 55% of the 'replacement cost'. This amount also serves as the maximum amount of funding that will be provided for equipment that is modified. Note: a small additional amount (approximately 0.1%) will be provided for each week before 1 October 2012 equipment is surrendered. An additional 20% will be added to all claims made by persons or companies that are not VAT registered. |
| f) Comparable model: | Each item of channel 69 equipment has been allocated a current replacement model with equivalent functionality, in order to provide an estimate of the replacement cost. Where available, we have used current channel 38 equipment. Where there is currently no channel 38 equivalent, we have used the current equivalent channel 69 model. |
| g) Estimated replacement cost: | This is the estimated cost of replacing each item of channel 69 equipment in 2012. The estimate is based on prices for equipment offering equivalent functionality in 2010, inflated by 2.5% pa over two years. |
