2010-2011 PRODUCT BROCHURE

SLIK

SLIK has established a rock solid reputation in the minds of professionals and everyone who looks through the lens. But while we're firm in our commitment to excellence, we're not standing still. SLIK is accelerating the evolution of performance and value across our full line of tripods, mono-pods, heads and accessories. A tall order? Judge for yourself. SLIK products feature exceptional strength-to-weight ratio, flexibility, durability and they're easy to use and enjoy. Just the kind of features you'll appreciate when the perfect shot crosses your path.

Elevating the Art of Photography

VERSATILITY

Why compromise? A world class SLIK tripod begs for a SLIK head. Build your complete system with a SLIK Ball Head 800, AF2100 Ball Head or Standard Ball Head II. These heads are smart. Really. They give you stability, easy operation and long lasting performance. Guaranteed.

BACKGROUND

SLIK was founded in 1952 as Slick Elevator Tripod Co., Ltd. From the inception, the Company was focused on creating better solutions that give photographers the freedom to expand their boundaries. SLIK's commitment to innovation attracted a loyal following while earning recognition well beyond the industry. Milestone: In 1967, SLIK won the first of many "Good Design Awards" from the Ministry of Trade and Industry of Japan. (Not easy to do.) If you take for granted such features as low to high movement, lever leg lock and quick-release, well surprise. SLIK pioneered these features and continues to refine the art of tripods with award winning designs and innovations. We invite you to experience the best that money can buy. Now, go out and make some history of your own.

BEYOND

What's over the next bluff on the horizon of evolution? Look for SLIK to be there ahead of the pack. Our research, design and engineering team is shattering conventions, on a quest to elevate the art of photography.

LIGHTER

Let's start at the top. With its professional raw carbon appearance, SLIK's expanded line of PRO CF Carbon Fiber Tripods sets a new standard for portability and durability. The multi-layered carbon fiber construction creates a tripod that is more rigid and 30-40% lighter than comparable aluminum tripods. So you can pack light, shoot large and tell the chiropractor to take a hike. (see page 2 & 5)

STRONGER

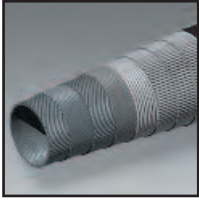

A.M.T. is the big news with SLIK's PRO DX Series. SLIK's Super Alloy A.M.T. construction features the exact combination of aluminum, magnesium and titanium to create tripods that are lighter and up to 40% stronger than comparable aluminum tripods. Heavy stuff? Guess again. (see pages 8-13)

VALUE

Think you can't afford SLIK quality and performance? The ABLE 300 series offers professional strength and versatility with the bonus of exceptional value. Offering many of the same features as the top of the line Pro series, the ABLE 300 is ready, willing—and you know the rest.

SLIK

carbon fiber

Carbon Fiber materials are also used in rockets, the Space Shuttle, and jets. Yes, it truly is rocket science.

Reversible Head screw on SLIK CF 8 and 9 series.

Lock control for the multi-angle leg locks.

A.R.S. (Anti-rotational System) designed into the legs and leg locks of all SLIK PRO Carbon Fiber tripods.

In photography, a lot of time is spent getting to the location where you want to shoot. Sometimes in airplanes, trucks, buses, and often on foot. SLIK carbon fiber tripods greatly reduce the weight you have to pack, and can make the experience of "getting there" as enjoyable as getting the shots when you arrive. Designed for medium format cameras, digital and 35mm SLRs using long zoom or telephoto lenses.

MULTI-LAYERED CARBON FIBER

This rigid material is 30-40% lighter than aluminum. SLIK PRO CF tripods are finished in the natural black carbon fiber color.

REVERSIBLE HEAD ATTACHMENT SCREW

The Pro 8 and 9 series include a reversible head mounting stud - 3/8" and 1/4-20.

MULTI-ANGLE LEG LOCKS WITH BUILT-IN SHORT COLUMN

Each leg has an independent lock that sets in one of 3 angles to vary the height of the tripod for maximum height, waist level or very low angle photography. This also allows the tripod to be set up easily on uneven ground or steps. SLIK's built-in short column feature allows the center column to unscrew into two pieces for low angle photography.

LEG-LOCK TYPE

Twist lock system with double nut ring (crown-cap) type. (PAT).

A.R.S. (ANTI-ROTATIONAL SYSTEM)

All new SLIK PRO carbon fiber tripods feature a new A.R.S. (Anti-Rotational System) designed into the legs and leg locks. The A.R.S. systems prevents the leg tubes from rotating inside each other making it much easier to lock and release all the twist-release locks securely. The rubber grips have also been increased in diameter slightly making them easier to operate.

This combined with the A.R.S. system will speed setting up and putting away the tripod making it more convenient to take with you and use on the go.

GRAND PRO 4 CF

616-165

*Max. Operating Height: 100.00 in.
Min. Operating Height: 17.70 in.
Folded Length: 32.48 in.

PRO 624 CF 611-615

Max. Operating Height: 47.40 in.
Min. Operating Height: 3.94 in.
Folded Length: 16.34 in.
Max. Operating Load: 8.80 lbs.
Weight: 1.81 lbs.

- The smallest, most compact SLIK carbon fiber tripod

Designed for the professional photographer. Ultra heavy construction for use with large format cameras (4"x 5", 8"x10"), medium format cameras and 35mm SLR cameras with long telephoto/zoom lenses.

MULTI-ANGLE LEG LOCKS

Each leg has an independent lock that sets in one of 3 angles to vary the height of the tripod for maximum height, waist level or very low angle photography. This also allows the tripod to be set up easily on uneven ground or steps.

GROOVED TUBULAR LEGS

The groove prevents the leg from turning during extension or retraction, and it allows simple and secure locking. It adds rigidity to an already dynamically strong circular tubing.

INDEXED REFERENCE MARKS

The 2nd leg section has reference groove marks at 10cm intervals, to allow easy and even height adjustments.

The center column elevation moves only by turning the elevation crank preventing any accidental fall of a mounted camera.

THE PROFESSIONAL 616-850

*Max. Operating Height: 78.75 in.
Min. Operating Height: 23.22 in.
Folded Length: 40.95 in.
Max. Operating Load: 26.45 lbs.
Weight: 13.90 lbs.*

- Complete, with head
- Also available as head only and legs only

HEAD ONLY (SH-909) 618-909

LEGS ONLY 619-950

LARGE/SMALL THREAD CAMERA MOUNTING SCREW

The professional series has both large 3/8" and small 1/4-20 thread. When not in use, the screw fits into the side of the head where it's out of the way yet always handy.

REVERSIBLE HEAD ATTACHMENT SCREW

The reversible head attachment screw on the center elevation post lets heads with either 1/4-20 or 3/8 screw holes be used.

DUAL AXIS BUBBLE LEVELS

The head has 2 bubble levels for easy and accurate camera leveling. They are recessed under the camera mount plate to avoid damage.

SHORT CENTER COLUMN

By exchanging the center elevation column to a short center column (optional accessory), you can obtain a very low height of 15".

THE PROFESSIONAL 4 616-875

*Max. Operating Height: 99.50 in.
Min. Operating Height: 23.22 in.
Folded Length: 42.30 in.
Max. Operating Load: 26.45 lbs.
Weight: 15.20 lbs.*

- Complete, with head
- Also available as head only and legs only

HEAD ONLY (SH-909) 618-909

LEGS ONLY 619-975

MASTER CLASSIC HEAD 619-710

- 2-way pan head for telephoto lens

LEGS ONLY 619-910

SLIK

professional

PRO 780 DX

PROFESSIONAL, RELIABLE, AFFORDABLE

Depending on the model, the PRO Series is designed for everything from professional digital SLR and film cameras, medium format, or field 4x5 view cameras all the way to point-and-shoot digital cameras.

SPEED RELEASE LEG LOCKS

The secure lever locking mechanism makes for fast and easy set up and fold down of the PRO Series.

GEARLESS CENTER COLUMN

Easy release center column. Locking collar frees movement of the center column in both vertical and horizontal directions, which means you can work faster. The center column has two ways of locking in place. The first is a twist release collar around the center column. The other, a thumb-screw on the side of the tripod.

MULTI-ANGLE LEG LOCKS

Each leg has an independent lock that sets in one of 3 angles to vary the height of the tripod for maximum height, waist level or very low angle photography. This also allows the tripod to be set up easily on uneven ground or steps.

THE AMT DIFFERENCE

Constructed from SLIK super A.M.T. alloy (Aluminum Magnesium Titanium) offers an exceptional strength-to-weight ratio that is more than 40% greater than similar aluminum tripods. SLIK AMT is used in the PRO 700 DX, PRO 500 DX, PRO 340 DX, and PRO 330DX.

PRO 780 DX

615-780

*Max. Operating Height: 76.80 in.
Min. Operating Height: 16.25 in.

- Separate legs from PRO 500 DX tripod

NEW

PRO 500 HD 615-501

Max. Operating Height: 64.90 in.
Min. Operating Height: 13.93 in.
Folded Length: 27.93 in.
Max. Operating Load: 11.02 lbs.
Weight: 5.91 lbs.

- NEW all-metal 3-way "Fluid-Effect" pan head for HD video with Digital SLR cameras
- Separate pan and tilt drag controls smoothly adjust resistance to movement like a professional video head
- Lightweight AMT alloy legs make for a lighter tripod that is easier to carry

The PRO 500 HD was created for DSLR's that have HD video recording capability. The SH-736HD is a smooth-moving fluid effect 2-way pan head with quick release for easy mounting and removal of a DSLR, video camera or camera. This all-metal head is specifically designed for photo and video use. The 2-way pan head moves in two directions like a professional video head.

The SH-736HD has pan and tilt drag controls that are separate from the pan/tilt handle locks. This allows the photographer to fine-tune the tightness of the movement based on the weight of the camera and lens. The head can hold up to 11.0 lbs of equipment.

PRO 340 BH 613-344

Max. Operating Height: 57.75 in.
 Min. Operating Height: 10.00 in.
 Folded Length: 20.28 in.
 Max. Operating Load: 8.80 lbs
 Weight: 3.26 lbs.

- New SHB-200DQ ball head with quick release system
- Dual bubble levels on the head
- Strong & Light PRO 340 AMT alloy legs
- 4 leg sections to fold down smaller for easier packing and travel

Created to yield professional results with today's 'Pro-Sumer' Mini DV and other video cameras. The DST-3 and DST-73 have durable all-metal fluid heads, professional bowl mounts and all metal camera mount plates.

NEW

DST-43 DST43

*Max. Operating Height: 59.29 in.
Min. Operating Height: 28.10 in.
Folded Length: 29.84 in.
Max. Operating Load: 8.80 lbs.
Weight: 7.50 lbs.*

- All-metal Fluid head
- 60mm professional bowl level mount for fast and easy leveling of the camera
- Long slide camera mount plate for proper balancing of a camera with accessories attached.

NEW

DST-73 DST73

*Max. Operating Height: 62.60 in.
Min. Operating Height: 30.71 in.
Folded Length: 32.68 in.
Max. Operating Load: 15.43 lbs.
Weight: 9.90 lbs.*

- Professional, all-metal fluid head
- Industry standard 75mm bowl mount for fast and easy leveling of the camera
- Heavy duty, dual rail 3 stage tripod legs provide greater stability with heavier camera loads
- Long slide camera mount plate for proper balancing of a camera with accessories attached.

DST-3 DW-DST3

*Max. Operating Height: 59.45 in.
Min. Operating Height: 13.70 in.
Folded Length: 29.72 in.
Max. Operating Load: 8.00 lbs.
Weight: 6.28 lbs.*

- All-metal 2-way fluid pan head
- 60mm professional bowl level mount for fast and easy leveling of the camera
- Camera mount post can be positioned forward or back for better camera balance

DV TRAVEL PRO 617-903

*Max. Operating Height: 51.80 in.
Min. Operating Height: 12.80 in.
Folded Length: 26.60 in.
Max. Operating Load: 8.00 lbs.
Weight: 4.30 lbs.*

- Light weight for easy traveling
- Fluid head for smooth pan and tilt movements
- 60mm bowl mount for quick and easy leveling of the head

515 QF 617-515

*Max. Operating Height: 65.15 in.
Min. Operating Height: 29.55 in.
Folded Length: 29.90 in.
Max. Operating Load: 11.00 lbs.
Weight: 8.20 lbs.*

- Sturdy, heavy-duty 505 QF legs with new all-metal smooth moving pan-tilt "Fluid-Effect" head
- New Digital Balance head with long-slide Quick Release plate for better balance of video camera with accessories attached
- All-metal mid-level spreader

505 QF 615-505

*Max. Operating Height: 64.55 in.
Min. Operating Height: 29.55 in.
Folded Length: 29.55 in.
Max. Operating Load: 11.00 lbs.
Weight: 7.95 lbs.*

- All-metal 2-way "Fluid Effect" pan head
- Adjustable pan handle angle
- Geared center column for easy height adjustments

DIGITAL BALANCE PRO
618-665

New all-metal video head with long-slide quick release plate for better balancing of a video camera with accessories attached.

*Height: 4.65 in.
Weight: 2.80 lbs.
Max. Operating Load: 11.00 lbs.*

504 QF-II 615-504

*Max. Operating Height: 61.40 in.
Min. Operating Height: 18.50 in.
Folded Length: 27.10 in.
Max. Operating Load: 8.00 lbs.
Weight: 5.65 lbs.*

- 2-way "Fluid Effect" pan head
- Adjustable pan handle angle

504 QF-II HEAD 618-504

*Max. Operating Load: 8.00 lbs.
Weight: 1.50 lbs.*

NEW

PRO 340 QF 613-345

*Max. Operating Height: 57.30 in.
Min. Operating Height: 10.80 in.
Folded Length: 20.90 in.
Max. Operating Load: 6.61 lbs.
Weight: 3.92 lbs.*

- Compact light-weight AMT alloy tripod.
- 4 leg sections allow this tripod to close down to a much smaller size for easier carrying, great for back-packing
- 504 QF-II Fluid-Effect video head is great for smooth movement with light-weight HD Digital SLRs or video cameras

**THE PRO POD**

618-720

Max. Operating Height: 71.60 in.
 Min. Operating Height: 23.85 in.
 Max. Operating Load: 20.00 lbs.
 Weight: 2.3 lbs.

- Heavy Duty Professional Monopod
- Twist Release legs locks to hold more weight

NEW

PRO POD 382 CF

618-382

Max. Operating Height: 59.05 in.
 Min. Operating Height: 19.70 in.
 Max. Operating Load: 11.00 lbs.
 Weight: 0.85 lbs.

- 30% lighter weight, surprisingly strong carbon fiber make this perfect for traveling
- Telescoping leg sections do not rotate inside each other making it faster and easier to extend and close
- 4 leg sections keep this monopod very short for easy carrying

**PRO POD 600**

615-600

Max. Operating Height: 63.00 in.
 Min. Operating Height: 21.05 in.
 Max. Operating Load: 12.00 lbs.
 Weight: 1.30 lbs.

- A sturdy light weight monopod for the working professional
- Made from SLIK's A.M.T. (Aluminum Magnesium Titanium) alloy, this monopod is lighter and stronger than standard aluminum
- Firm-grip surface provides a rock solid hold in any weather
- Speed release snap locks make extending and retracting the legs fast and easy
- 4 leg sections

S-POLE II

618-727

Max. Operating Height: 63.38 in.
 Min. Operating Height: 21.65 in.
 Max. Operating Load: 8.00 lbs.
 Weight: 1.28 lbs.

- S-POLE II can be reversed and attached to the legs of a MINI PRO III or MINI PRO V for greater stability
- Secure Twist lock legs
- Though the S-POLE II can free-stand, it will be very top-heavy with camera attached, do not leave unattended.

SLIK monopods give you an easy, go-anywhere support system for your camera. Though they cannot stand by themselves, they support the camera's weight and eliminate undesirable vertical movement or "shake" that occurs with hand-held use. Your pictures will be sharper and more clear.

MONOPOD 350

618-350

Max. Operating Height: 63.00 in.
 Min. Operating Height: 20.05 in.
 Max. Operating Load: 8.00 lbs.
 Weight: 0.65 lbs.

- A superb light-weight general use monopod
- Soft padded grip for a rock steady hold
- Grooved tubular leg for added rigidity
- Speed release leg locks make extending and retracting the monopod fast and easy

**EZ POD**

617-400

Max. Operating Height: 61.80 in.
 Min. Operating Height: 18.50 in.
 Max. Operating Load: 8.50 lbs.
 Weight: 1.45 lbs.

- Speed release leg locks and a one-button control for fine height adjustment make this a truly easy monopod to use
- Includes Tilt-head with quick-release plate with post for video cameras. Excellent for video recording with compact digital and film cameras
- 5 leg sections

**EZ POD JR.**

617-200

Max. Operating Height: 63.00 in.
 Min. Operating Height: 20.25 in.
 Max. Operating Load: 8.50 lbs.
 Weight: 1.10 lbs.

- Same speed release leg locks but without the one-button fine height adjustment
- Includes Tilt-head with quick-release plate with post for video cameras
- 5 leg sections

**SLIM POD II**

628-450

Max. Operating Height: 60.20 in.
 Min. Operating Height: 19.69 in.
 Max. Operating Load: 2.75 lbs.
 Weight: 0.62 lbs.

- Thin, ultra light weight, economical monopod with lever lock leg system
- 4 leg sections

**LIGHTY POD-III**

618-719

Max. Operating Height: 63.00 in.
 Min. Operating Height: 20.50 in.
 Max. Operating Load: 6.60 lbs.
 Weight: 1.00 lbs.

- Light-weight and compact for easy traveling
- Inexpensive and high-quality
- SLIK ball head included

SH-909 618-909
Heavy Duty 3-Way Pan Head with smooth precise movements
Height: 5.71 in.

AF 2100 TRIGGER-RELEASE BALL HEAD

618-210

The world's most popular trigger-style ball head

Height: 5.50 in.

Weight: 30.70 oz.

Max. Operating Load: 10.00 lbs.

Recommended tripods:

PRO 713/813/814 CF Carbon Fiber tripods, PRO 700 DX, PRO 400 DX

Recommended MONOPODS:

PRO POD 381, PRO POD 600

- The original trigger style ball head
- Simply squeeze the trigger handle to move the head, and let go to lock in any position
- The handle grip makes the ball head feel like more of an extension of your hand than other ball heads available
- Winner, Japan Ministry of Trade and Industry "Good Design" (G-Mark) award

AF 1100E TRIGGER-RELEASE BALL HEAD

618-111

New with all-metal Quick-Release plate

Height: 4.85 in.

Weight: 18.80 oz.

Max. Operating Load: 6.50 lbs.

Recommended tripods: PRO 814 CF-II, PRO 813 CF-II, PRO 713 CF-II, PRO 614 CF, PRO 613 CF, PRO 330 DX, PRO 340 DX

Recommended MONOPODS:

PRO POD 381 CF, PRO POD 600, MONOPOD 350, PRO 500 DX

- More compact for today's high-end point-and-shoot digital cameras
- Simply squeeze the trigger handle to move the head, and let go to lock in any position
- The hand grip makes the ball head feel more like an extension of your hand than other ball heads
- Bubble-level for easy and accurate leveling of the camera

Just as important as the tripod legs is the head. For decades our ball heads have been made to exacting standards to perform smoothly and reliably under a wide range of conditions. From the studio to the Outback, they work beautifully with a wide variety of tripods from SLIK and other high quality tripod manufacturers.

BALL HEAD 800

618-708

Large quick shoe for a sure and easy camera mounting, plus a rotating feature which adds to more creative freedom

Height: 5.10 in.

Weight: 26.50 oz.

Max. Operating Load: 11.00 lbs.
