

HD5® PATCH PANEL

The HD5 series patch panels offer the most robust patching solution in the industry. HD5 panels with universal T568A/B wiring significantly exceed category 5e requirements with component and channel performance to 160 MHz (Performance from 100 - 160 MHz based upon extrapolated TIA/TIA limits). The front surface of these panels is uninterrupted by screw heads or other hardware for a clean aesthetic appearance that allows sufficient space for circuit designation.

Panels available in 16-, 24-, 48-, and 96-port configurations

Black anodized panels can be mounted directly to an EIA standard 19 inch rack or cabinet
