

# TDP-B1 Quick Start

1

2

The fans start and the Lamp LED on the keypad lights up.

3

Use the startup screen to adjust the image position.

4

Focus

Zoom

Elevator

## Present!

If necessary, press the activation keys on your computer to see the image on the screen.\*

6

5

## Connector panel

Power cord

Signal from computer

To mouse connector on computer

Sound from computer or video player

Composite video from video player

S-video from video player

\* Your computer may use a different key combination. Check your computer's user's guide for more information.

## Still need help?

Remember, your *TDP-B1 User's Guide* includes comprehensive instructions on setting up and operating your TDP-B1.

### 1 Nothing appears on the screen.

Make sure you have plugged in the power cable, removed the lens cap, and pressed the lamp on/off button on the keypad.

### 2 All I see is the startup screen.

Make sure the computer cable is connected between the computer and the projector. Try pressing the computer activation keys once more. Sometimes you need to press them twice to make the image appear on the screen. If you also have a video player plugged into the projector, try pressing the Source button on the keypad or the Computer button on the remote.

### 3 There's no computer image on the screen, just the message, *Perfecting the Image, in the lower right corner.*

The projector may be having a hard time synchronizing with the computer signal. Try pressing the Menu button on the projector keypad or remote. On the Image menu, turn Auto Image to Off. See the User's Guide for help with the menus.

### 4 The computer image fills the screen, but the text is fuzzy and hard to read.

Try setting your computer resolution to 1,024 x 768 (Start/Settings/Control Panel/Display/Settings tab). If your computer only goes up to 800 x 600 or 640 x 480, turn off Auto Resize on the Image menu in the TDP-B1. The image will be smaller, but it should be sharp. See the User's Guide for help with the menus.

### 5 I can only see part of the computer image on the screen.

Try setting your computer resolution to 1,024 x 768. With some portable computers, it's necessary to disable the computer display to do this. You use the activation keys to show the image only on the screen.

### 6 How do I play a video through the TDP-B1?

## Need to talk to someone?

Contact Toshiba Technical Support.

- ⇒ In North America, call Toshiba's toll-free customer service & technical support at **800-457-7777** (available 24 hours a day, 7 days a week).

### SAFETY INSTRUCTIONS

Please read and follow all safety instructions provided in this quick start and your User's Guide **BEFORE** using your projector. Failure to comply with safety instructions may result in fire, electrical shock, or personal injury and may damage or impair protection provided by equipment. *Please save all safety instructions.*

#### Safety Definitions

- **Warning:** Statements identify conditions or practices that could result in permanent personal injury.
- **Caution:** Statements identify conditions or practices that could result in damage to your equipment.

#### Safety Symbols

**Attention:** For information about usage of a feature, please refer to the User's Guide.

**Warning:** Hot surface. Do not touch.

An arrow pointing to lamp door of the projector.

#### Safety Terms:

- **Warning:** Don't look directly into the lens when the projector is turned on.
  - **Warning:** To replace the lamp, unplug the power cord. To avoid burns, wait 30 minutes before opening the lamp door. Follow all instructions provided in the User's Guide.
  - **Warning:** Please use the power cord provided. Connect the power cord to a receptacle with a protective safety (earth) ground terminal.
- **Warning:** Refer all service to qualified service personnel. Servicing your own projector will void the warranty.
- **Caution:** Don't block ventilation openings.
- **Caution:** Don't set liquids on the projector. Spilled liquids may damage your projector.
- **Caution:** Don't place the projector on a hot surface or in direct sunlight.
- **Caution:** Do not drop the projector. Transport the projector in an Toshiba-approved case; see the User's Guide for a list of cases.
