Model #: N480-024-LC

MTP 50/125 Fiber Breakout 1U Patch Panel - 24 Port LC

Highlights

- High Density Fiber patch cabling
- 12-strand MTP fiber trunk cables
- 50/125 fiber for high bandwidth applications

Description

Tripp Lites MTP Fiber Optic Patch Panels are the ideal solution for consolidating dozens of fiber cable runs into an easy and manageable high-density patching system. MTP fiber cables contain 12-strands of fiber, replacing six individual duplex cables. A single MTP cable breaks out at the N480-024-LC patch panel into 12-pair of LC fiber connectors. The panel has four MTP connections, or "Cassettes" , resulting in a total of 24-pair of LC connectors on the front of the panel. Short, duplex patch cables can then be used to connect from the front of the panel to fiber optic transceivers. Panels, and Tripp Lite MTP Patch Cables, utilize 50/125 multimode fiber for high bandwidth applications like Gigabit Ethernet or Fibre Channel Storage. Panels are pre-wired internally...ready for plug-n-play use.

Applications

- Fiber Gigabit Ethernet
- Fibre Channel Storage

Package Includes

MTP 50/125 Fiber Breakout 1U Patch Panel - 24 Port LC

Features

- 24 port LC- MTP fiber panel
- 4 rear MTP 12-fiber connections
- Plug-n-Play 1U High panel
- 19" Rackmountable
- 50/125 fiber for high bandwidth applications

Specifications

PHYSICAL	
Color	Black

CONNECTIONS

Connector A	LC (FEMALE)
Connector B	MTP (FEMALE)
Number of Connectors	24
Ports	24
