• Specifications and design subject to modification without notice.

• Unfinalized discs cannot be played.

• This unit may not be able to play back discs that have been recorded on other units due to the recording conditions, mode, surface dirt or scratches.

• DVD players and DVD discs have Regional Code classifications that determine their market area and compatibility. Discs and players must have matching codes in order to be played. This DVD player is classed as Regional Code 1. • Can play CD-R and CD-RW music discs in music CD and Video CD format. However, the pickup may not be able to play some CD-R or CD-RW discs, depending on the condition of discs. • Compatible with MPEG1 Audio Layer3 32,44.1 or 48kHz formats • Recording format should be in accordance with ISO9660 CD-ROM file system • MP3 filename requires MP3 or mp3 as an extension • Chinese characters cannot be displayed, although files featuring them can be played • 299 tracks/folders can be played per disc • Can play with VBR (Variable Bit Rate), but playing time may not be shown correctly • Cannot play some CD-R/RW discs recorded via PC, depending on disc and pickup conditions or PC system setup parameters.

• Microsoft, Windows Media and the Windows logo are trademarks, or registered trademarks, of Microsoft Corporation in the United States and/or other countries.

• WMA content can be encoded by using Windows Media® Player version 7, 7.1, Windows Media® Player for Windows® XP, or Windows Media® Player 9 Series. Compatible with sampling rate of 32,44.1 or 48kHz.

• Not compatible with loss-less-encoding or variable bit-rate (VBR) WMA files. WMA files encoded with DRM (Digital Rights Management) copy protection\* will not play. Up to 299 folders and 648 files (MP3 and WMA) in total can be played. [\*DRM copy protection: (Digital Rights Management) copy protection is a technology designed to prevent unauthorized copying by restricting playback, etc. of material or devices other than the PC (or other WMA recording equipment) used to record it. For detailed information, please see the instruction manuals or help files that came with your PC (or other WMA recording equipment) and/or software.]

• JPEG PhotoViewer • This player is compatible with FUJICOLOR CD and Kodak Picture CD formats, as well as CD-R/RW/ROMs containing JPEG files (up to 648 files) • Displays up to 6 megapixel JPEG and EXIF 2.2 files (the file formats used by digital cameras) • The CD-R/RW/ROM discs containing JPEG files must be ISO 9660 Level 1 or 2 compliant • CD physical format: Mode 1, Mode 2 XA Form 1. • CPRM copy protection technology with scramble system allows recording of copy-once broadcast programs, but not the copying of such recordings. CPRM recordings can only be made on DVD-RW discs in VR mode, and can only be played on CPRM-compatible players.

• \*RW compatible\* indicates playback compatibility with DVD-RW discs recorded in VR mode (Video Recording format). Discs recorded with a record-only-once encrypted program, however, can only be played back on a CPRM compatible device.
