

IMPORTANT

Please read carefully before use.

Easy and correct way of copying to a DVD

1. Get ready a recommended disc

Please use the recommended discs stated below.

Using discs other than those recommended may cause problem when copying to the DVD and when playing back the DVD.

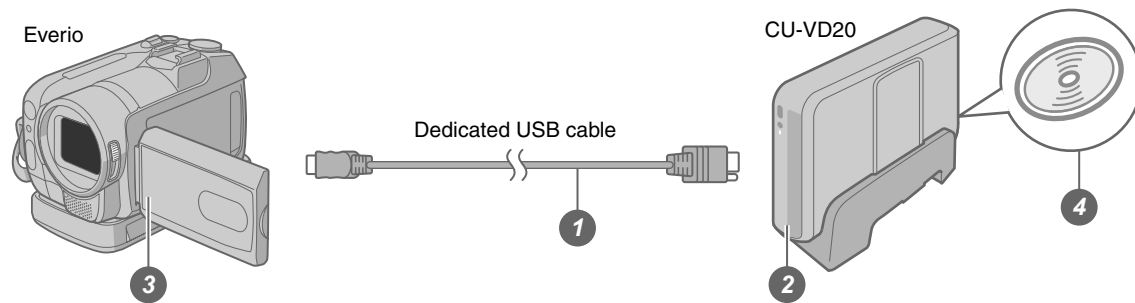

Recommended discs

| | DVD-R | DVD-RW | DVD-R DL (single-sided double layer) |
|-------|--------------------------------|--------|---|
| Brand | JVC TDK Verbatim SONY | JVC | JVC Verbatim |

Caution

- Only DVD-R and DVD-RW discs can be used.
- DVD-R DL (single-sided double layer) discs can only be used for High definition Everio.
- Recording and playback may not function properly if the recording side is scratched or dirty.

2. Set up each device before copying

1 Connect the USB cable

2 Turn on CU-VD20

After turning on the power, wait for approximately 20 seconds before proceeding to step 3. The burner may not function properly within this 20 seconds.

3 Turn on the Everio

4 Insert a new recommended disc into CU-VD20

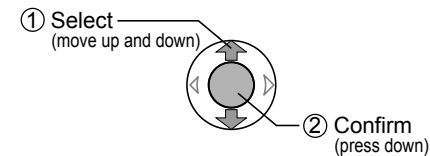

Next, operate the Everio. Proceed to step 3. ➔

3. Copy all images to the DVD

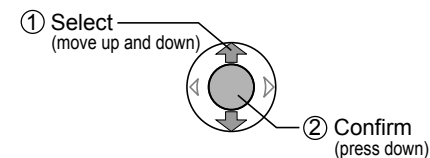

Perform operations on the Everio.

1 Confirm that the display on the right appears on the Everio LCD screen.

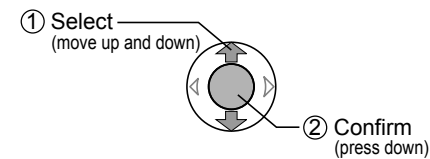

2 Select "ALL SCENES"

3 Select "ALL"

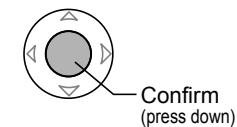

4 Select "EXECUTE"

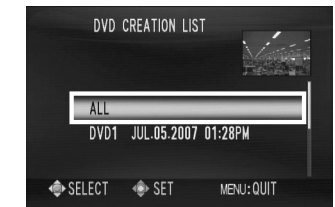

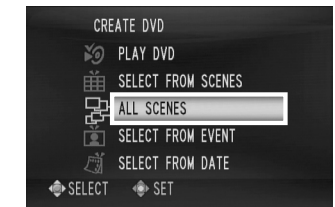

Wait for the "copy in progress" screen on the right to disappear, then turn off the power and disconnect the USB cable.

5 Exit

(Everio LCD screen display)

Copying completed!

Note

- There are other ways of copying which includes copying only the desired files. For details, refer to the instruction manual of Everio.
