

WAGAN Corp. Limited Warranty Registration Form

All WAGAN Corporation products are warranted to the original purchaser of this product.
Warranty Duration: This product is warranted to the original purchaser for a period of one (1) Year from the original purchase date, to be free of defects in material and workmanship. WAGAN Corporation disclaims any liability for consequential damages. In no event will WAGAN Corporation be responsible for any amount of damages beyond the amount paid for the product at retail. In the even of a defective item, please ship the item, prepaid, with a complete explanation of the problem, your name, address and daytime phone number. WAGAN Corporation will, at its option, replaces or repair the defective part. This warranty is void if the product has been damaged by accident, in shipment, unreasonable use, misuse, neglect, improper service, commercial use, repairs by unauthorized personnel or other causes not arising out of defects in materials or workmanship. This warranty is effective only if the product is purchased and operated in the USA and does not extend to any units which have been used in violation of written instructions furnished.
Warranty Disclaimers: This warranty is in-lieu of all warranties expressed or implied and no representative or person is authorized to assume any other liability in connection with the sale of our products. There shall be no claims for defects or failure of performance or product failure under any theory of tort, contract or commercial law including, but not limited to negligence, gross negligence, strict liability, breach of warranty and breach of contract.
Warranty Performance: During the above one (1) Year warranty period, a product with a defect will be replaced with a comparable model when the product is returned to WAGAN Corporation with an original store receipt. The replacement product will be in warranty for the balance of the one (1) Year warranty period.

User's Manual

Fast Air Auto Air Compressor by Wagan Tech

USER'S MANUAL — Please read before using this equipment.

Thank you for purchasing the Fast Air Auto Air Compressor by Wagan Tech. With normal care and proper treatment it will provide years of reliable service. Please read all operating instructions carefully before use.

FEATURES:

1. Special designed to service the larger tires used on vans, 4*4's, ATV's, SUV's, etc. It also works effectively on passenger car tires, bicycle tires, rubber boats, athletic balls and other inflatable articles
2. High airflow & low exhaust current
3. Durable operation life (Over 100 cycles continues running)
4. Easy grip handle
5. Convenience access ON / OFF switch
6. Plastic quick air releaser
7. Automatic pressure regulator

OPERATING INSTRUCTIONS:

1. Remove valve cap or valve extended from valve stem
2. Attach the universal quick-connect adapter from the air inflator to the tire valve stem with the locking lever in the up position. Be sure to press down over valve stem threads completely. When connector is firmly in place, press locking lever down to lock onto valve stem
3. To inflate, simply plug the power cord into cigarette light socket. Then set compressor on/off switch to "on" position
4. If tire is totally deflated, it is possible that the tire could separate from the rim allowing air to leak out when trying to inflate. This usually happens only on completely flat tires. In the event this situation occurs, you will have to jack up the car prior to inflating the tire
5. The time necessary to inflate a tire will vary from tire to tire and will vary depending on how deflated the tire is

SPECIFICATIONS:

Name	Description
Flow rate	22L / min
Input power	12 volts DC
Power cord	10 ft.
High pressure rubber air hose	2 ft.
Accessories	2 nozzle adapters + 1 sports needle
Maximum power	120 PSI, 8.3 bar or 827 KPA

PRECAUTIONS:

- Check the pneumatic pressure regularly. (when cold)
Always pump your tires until the recommended tire pressure level is reached
- Never leave the compressor in operation without supervision
- Do not use for more than 30 minutes to avoid overheating
- Let the unit have breaks to prolong its use
- Do not exceed the recommended tire pressure
- Always remove the compressor with the latch open
- Keep out of reach of children

TROUBLESHOOTING:

1. Problem: - The compressor cannot start functioning
Solution: - Move the plug inside the cigarette lighter socket and rotate it in different directions

- Check the cigarette lighter device socket and power contact outputs cleanness. Probably the contact is hindered by the tobacco of which has got there. Clean it with the object, which does not conduct current
- Check the cigarette lighter fuse in the car. Its minimum power must be 10A

2. Problem: - The compressor functions but no pumping takes place
Solution: - Make sure that the connector is the maximum distance inside the valve stem before latching
- Check the object being pumped does not let the air out
 - Check that the tube is not damaged and that it does not let the air out

3. Problem: - The compressor functions in a slow mode
Solution: - Overheating caused by overusing
- Disconnect the device and let it cool for 30 minutes
 - The voltage is too low. Check the battery state
